

Postgraduate Consultancy Projects

JEWSON

The Project

Title: **Employee Engagement across a Multi-Site Business**

Objectives: **Review current employee engagement practices across Jewson, and identify ways to improve and strengthen these.**

Employer Testimonial

We brought 2 post-graduate Human Resource Management (HRM) students in to Jewson to deliver this project due to the importance this has within our company, our aim to improve all areas across engagement and to give the subject the focus it deserves.

The students have brought an un-biased view to the project which has been really helpful and their own experience which was invaluable.

The project outcome has generated a lot areas to focus on and some great ideas which will be followed up within our business.

We would definitely consider offering an internship project to students next year.

This has been an excellent experience for Jewson, which was made easy through the support of the team at Coventry University and the dedication of the postgraduate students.

Samantha Herdman
HR Manager

Student Testimonial

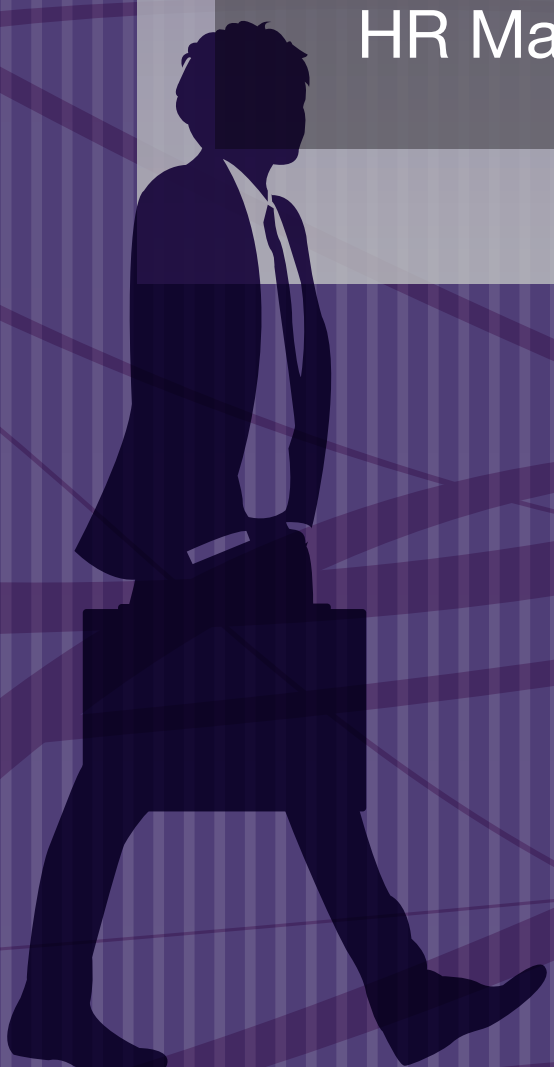

I chose the Masters work placement because I wanted to gain valuable work experience in the UK. The support prior to and during the work placement was immense and equipped me adequately for the period.

Through the work placement I can say I have developed my team working and interpersonal skills, as well as working to project deadlines and learning to communicate effectively.

The support and work experience I gained was invaluable and I would recommend this to future Masters internship or work placement students.

Working at Jewson gave me the opportunity to analyse findings on a multi-site project, speak with multiple employees and work face to face with a team member, with guidance and support available at all times from my managers and the University.
