“One of the most dynamic and innovative modern universities.”

The Times and Sunday Times Good University Guide 2021
Having support from teaching staff is essential to navigate the postgraduate process successfully. We believe that Coventry University doesn’t just have great teachers, but genuine experts in their field who help students at every stage. See page 16 to find out more.

*Times Higher Education metrics ranking 2017*
Our postgraduate courses can help you to develop practical subject research and business management skills. These are vitally important whether you intend to work for an organisation or to set up your own initiative. See page 19 to find out more.

*QS Stars Rating 2020
Go global

1st for overseas student experiences, five years running*

A global mindset could enhance your career and personal development. With a reputation for just that, we aim to help you immerse yourself in different cultures and experiences, both in the UK and abroad. See page 23 to find out more.

*Based on student trips abroad from HESA 2014/15-2018/19 UK data
Live in a city of culture

Top 5 UK Student City*

Coventry is a vibrant and affordable place to live and study. As the UK City of Culture 2021, the city is poised for a year of festivities in which you could play a part. See page 24 to find out more.

*QS Best Student Cities Index 2019
Coventry University's assessment strategy ensures that our courses are fairly assessed and allows us to monitor student progression towards achieving the intended learning outcomes. Assessments may include exams, individual assignments or group work elements. Please check your course page for specific information. Information is correct at the time of going to print, however, changes may occur. Check our website, www.coventry.ac.uk (or, for Coventry University London, www.coventry.ac.uk/london) or contact us on +44 (0)24 7765 7688 before applying to study at Coventry University to check the most up-to-date position. Where there is a difference between the contents of this prospectus and the Coventry University or Coventry University London website, the contents of the applicable website take precedence and represent the basis on which we intend to deliver our services to you. EU students should be aware that there may be a change to UK laws following the UK’s exit from the European Union which may change their student status and/or their conditions of study. Coventry University will act in accordance with the UK’s laws in force at that time. By accepting your offer of a place with us, a Student Contract (“the Contract”) will be formed between you and the university. The Contract will detail all of your rights and also the obligations you will be bound by during your time as a student and will also contain all of the obligations that the university owes to you. You should read the Contract before you accept an offer of a place and before you enrol at the university.
As both the Vice-Chancellor and a double graduate of Coventry University, you will struggle to find someone to whom this university means as much as it does to me. That’s why it gives me great pleasure to be able to play a small part in your decision to study with us.

I hope we will show you in this prospectus what sets Coventry apart. Our forward-thinking approach, modern facilities and focus on practical learning have resulted in Coventry being ranked the Top Modern University in the Midlands¹ as well as being shortlisted for University of the Year 2021².

We are proud to be consistently rated highly in the National Student Survey, as well as being rated Gold for outstanding teaching and learning³ and the only UK university rated 5 QS stars for online learning⁴. The best thing about this, especially from your point of view, is that it shows we have a great track record in delivering a quality education that meets our students’ expectations.

It’s an exciting time for the city too – since our historic inception back in 1843 as the Coventry School of Art and Design, we have played an integral role in the narrative of the city, and are proud to have contributed towards Coventry being named UK City of Culture 2021. This is a fantastic achievement for our city and we cannot wait to see what winning this award brings for us in the near future.

Experience one of our Open Days (real or virtual) and discover for yourself why thousands of students choose this award-winning university every year.

We aim to put your future first.

Professor John Latham CBE
Vice-Chancellor and CEO, Coventry University
Extraordinary Professor, Stellenbosch University

³Teaching Excellence Framework (TEF) 2017-2020
⁴QS Stars University Ratings 2020
Teaching excellence

Feel inspired by our passionate tutors, who strive to offer excellent teaching support, and active and engaging learning. Our knowledgeable staff use a wide range of teaching methods and give you support to encourage you to take responsibility for your own learning and development.

Our teaching staff consider employability when creating our courses, to respond to the changing needs of society and industry. The courses are designed to meet the needs of commerce today, with contemporary teaching and learning activities. There are opportunities to develop work-based learning and skills to flourish in the workplace.

As a postgraduate student, you will be required to participate in assessments throughout your study to drive your learning. Our students experience a wide range of assessment techniques, and formative and summative feedback will enable you to demonstrate what you’re learning. We know that learning happens in a variety of contexts, so we offer extra-curricular opportunities as well, which give you the opportunity to boost your employability and encourage an understanding of social responsibility.

You will join a global community of staff and students committed to lifelong learning and, upon graduating, will become a valued member of our alumni.

Professional accreditations and memberships

The majority of our courses are formally recognised by professional bodies, which means they have been reviewed and found to meet or exceed a set level. In some cases, studying an accredited course can give extra benefits, such as exemptions from professional exams (subject to availability, fees may apply).

Accreditations, partnerships, exemptions and memberships are renewed in accordance with the relevant bodies’ standard review processes and are subject to Coventry University maintaining the same high standards of course delivery. If accreditation of any course changes, we will notify students and applicants as soon as possible. You can check the accreditation status on the relevant course webpage.

www.coventry.ac.uk/awards

Diversity

We value diversity and our staff come from a wide variety of cultures. We employ pioneering research, extensive performance data and stakeholder feedback to enable us to understand and address inequalities.

Inspiring research

Our Research Centres are focused on real-world issues, ranging from novel approaches to migrant integration by the Centre for Trust, Peace and Social Relations, to driving inclusivity in international universities via transformational health outcomes and cyber security by the Centre for Postdigital Cultures.

Online learning capability

To support our on-campus learning, we have committed to an online mobile-first teaching and learning setup that puts community and conversation at its core. Students now use Aula, our online learning platform, to help support on-campus studies. It focuses on lowering any barriers between staff and students to help boost the engagement.

Stimulating environments

Our stimulating learning environments include a mock ambulance, hospital wards, an environment chamber, a gaming and virtual reality studio, a real Harrier jump jet, flight simulators, a wind tunnel, a media studio, a trading floor, a mock courtroom and a DigiComm Lab.

*The online learning platform provider may be subject to change.
Employability

Talent Team offers you a new type of professional careers support. Not only do we aim to guide you towards a successful graduate life, we also intend to serve your individual needs and aspirations by providing the right kind of careers advice, from enrolment to graduation – and beyond.

We combine all activities related to support, career development and advice, employer engagement and core skills development, into one unit. This includes:

- proactive, personalised engagement and support through one-to-one consultations
- Talent Connect – a personalised, online environment to engage with career enhancing activities and resources
- support with CV writing and job application processes
- advice and support on UK and overseas internship options
- course-embedded employability skills, including employer input where appropriate
- specialist support for two years after graduation.

Talent Connect is a new employability and careers online portal through which you can connect with us, access support and book appointments for career development. Think of it as your go-to platform to:

- build your career profile
- get personal help to identify and develop your path
- apply for internships and graduate job vacancies
- book onto networking and careers events (subject to availability).

With Talent Connect, you can set up communication and engagement preferences for the type of careers and employability information you need. You can also log your career-planning progress to help keep yourself on track.

Talent Team and Talent Connect can be accessed by Coventry University, Coventry University London and Coventry University Online.

*Please note that we are unable to guarantee any placement/internship, work experience, industry, field trips or study abroad and international opportunities and that any such opportunities referred to in this brochure may be subject to additional costs (e.g. travel, visas and accommodation etc.), competitive application, availability and/or meeting any applicable visa requirements. To ensure that you fully understand the requirements in this regard, please contact the International Office for further details if you are an EU or International student.

www.coventry.ac.uk/employability
Leadership skills

The university offers opportunities to learn some of the essential skills you will need for engaging staff or successfully managing your own business to sustain high-level business performance. If you intend to be an effective manager in today’s and tomorrow’s business world, then a professional postgraduate qualification with us can be an excellent route to achieving this. Many of our postgraduate courses have elements of leadership embedded within the course content. There are other opportunities to also develop management skills such as with Coventry University Students’ Union, as an elected Student Leader, or by joining one of more than 180 student societies and taking a leadership role.

The majority of our postgraduate courses include a Professional Development module accredited by the Chartered Management Institute (CMI). Successful completion of this mandatory module can lead to a CMI professional qualification which can be later used as an opportunity to work towards Chartered Manager status (highest award) via the qualified route, once the other entry criteria have been met. See the CMI website for more details on qualification criteria, application, fees, etc. The CMI modules are designed to aid your transition from academia to the workplace, by giving you increased confidence and awareness in understanding and practising critical skills required by employers to achieve strategic, reputational and competitive excellence within a high-performance working environment. Visit your course web page to see if the module is included. If it is, participation in the course enrols you automatically as an Affiliate CMI Member while studying and, if you complete it successfully, leads to Foundation Chartered Manager (fCMgr) status.

We engage with many leading organisations whose top management volunteer through interview to hold an audience with our students on the world of work. The transferable learning allows you to use your acquired skills to collaboratively work with students from other courses. This can help you to understand and value the contributions and diverse experience of others. You can also refine networking skills and get a better understanding of leading and engaging people in different career routes and employment.

www.coventry.ac.uk/professional-development

CMI module
The university partners with the Chartered Management Institute to offer students a unique programme of CMI-accredited modules. These are embedded within our postgraduate courses, to help you to develop useful employability skills.

Student Leaders
Coventry University Students’ Union is student-led. Student Leaders are elected from and by students to represent their views within the union and across the university. The roles are an excellent opportunity to develop leadership skills and make a difference.

Ambassadors
We recruit Postgraduate Ambassadors to help at Open Days, campus tours, the start of the year, etc. The work is part-time, paid and can fit around your studies and could help you to develop leadership skills by offering advice and guidance to others*.

Student societies
We currently have more than 180 student societies and more than 50 sports clubs, so you’re bound to find something you like. We also offer a great opportunity to take on a leadership role with your peers which will support you in developing transferable workplace skills.

*International students should check visa status before taking on any paid work.
Global opportunities

We’re the university chosen by Coventry locals as well as students from over 160 countries. Our current academic staff, tutors and researchers hail from around the world too and some of their work has a global impact, making a difference to communities ranging from Amazonian Brazil to Singapore.

As a university with a diverse population, we run various projects promoting diversity. Our aim is to create a greater sense of community and to aid inclusion and dialogue between those with cultural differences, through activities.

The Centre for Global Engagement (CGE) has a dedicated team that offers many global opportunities for UK and non-UK postgraduates. CGE can help you to gain an international experience in a choice of over 100 different countries. It offers a variety of programmes, such as the extracurricular Global Leaders Programme (GLP). It’s designed to develop global leadership skills with advanced workshops, global networking, international experience and exposure to inspirational industry leaders. International trips may be available to North America, Europe, South America and Asia*.

We believe that students benefit from an overseas experience and that studying in another country helps you to acquire a broader range of skills and makes you more employable. There are credited and non-credited options available, enhancing your postgraduate degree and overall student experience*.

CGE promotes and sources opportunities for students to participate in a wide range of international activities, such as short field trips, conferences, research projects and placements*. CGE can help you to gain an international experience in a choice of more than 100 different countries*.

The Centre for Global Engagement (CGE) has a dedicated team that offers many global opportunities for UK and non-UK postgraduates. CGE can help you to gain an international experience in a choice of over 100 different countries.

The International Experience programme – also known as Go Explore – is a programme unique to Coventry that gives postgraduate taught, postgraduate research, and PhD students the chance for short-term experiences outside the UK. Erasmus funding may be available for long-term placements and you will have an opportunity to benefit from International Experience Funding*. 

*Please note that we are unable to guarantee any placements/ internships, work experience, industry, field trips or study abroad and international opportunities and that any such opportunities referred to in this brochure may be subject to additional costs (e.g. travel, visas and accommodation etc.), competitive application, availability and/or meeting any applicable visa requirements. To ensure that you fully understand the requirements in this regard, please contact the International Office for further details if you are an EU or International student.

Go Explore
City-centre campus

You’re choosing a global city as well as a global university – and ours has a truly international feel. Coventry University and Coventry University London currently have more than 13,000 international students studying with us from more than 140 different countries.

Coventry is an affordable city for students – it was named 104th most affordable student city in the world in 2019. You’ll find shops that cater to different budgets, ranging from the Coventry Market to bistro restaurants. Coventry is also a top 5 UK student city and one of the top 50 student cities in the world.

Coventry has been named UK City of Culture 2021 and is bursting with opportunities for culture fans. For art and history fans, the Herbert Art Gallery & Museum could be worth a visit, especially for its curated arts events, while the nearby Fargo Village – the city’s creative quarter – looks to run a calendar of events throughout the 12-month period.

In 2018, we celebrated 175 years of teaching in Coventry. We’ve evolved from humble beginnings, starting as a Design School with around 50 students in 1843, to a global institution today, with currently more than 30,000 students across the UK alone. The city is evolving too. Multi-million-pound investments have transformed the city, whose planned future developments include a £59m central business quarter and £300m city-centre improvement scheme.

We have invested around £89m (between 2016-19) in brand new student accommodation which will help to boost the regeneration of shops and services in the city centre.

Culture

Coventry is famous for many things – including Lady Godiva, the magnificent cathedral and an acclaimed Transport Museum. It’s the birthplace of 2-Tone music, jet engine pioneer, Sir Frank Whittle and an early example of the Penny Farthing bicycle. We are also the home of the iconic Black Cab taxi.

Food and social

The city-centre shops and restaurants cater to global tastes with food from around the world. There’s a choice of theatres and cinemas in the city, and student societies are great for meeting friends and gaining transferable workplace skills.

Sport

The city is home to Wasps, the Premiership rugby club team, and to Championship team, Coventry RFC. You will also find Coventry City Football Club, a top-tier ice hockey team, Coventry Blaze, and a rugby league club, the Bears. Our own Students’ Union also runs around 50 sports clubs for students.

Central location

Coventry is situated right in the heart of England, just one hour from London and 20 minutes from Birmingham by train. If you choose to live in our modern, city-centre accommodation, you’ll be really close to campus with all of the benefits that Coventry city-centre living has to offer.

www.coventry.ac.uk/cityliving

Study options

Postgraduate study
There is more than one way to study after you graduate and we offer a summary of the options here. We offer postgraduate qualifications through teaching, online learning or research.

Currently, with more than 140 taught courses across Coventry University and Coventry University London, as well as two types of postgraduate research degrees (master’s by research and PhD), we hope you’ll find something you like. By evolving our courses to respond to the needs of society, government and business, we look to ensure that your qualification will help you to steer your career in the right direction.

Certificate (PGCert) and Diploma (PGDip)
- A standalone award.
- Structured in a similar way to a master’s course.
- Typically six to nine months in length.
- Usually assessed by exams and coursework.
- No dissertation required.

Master’s degree
- Usually intensive taught courses with a dissertation or project.
- Full-time study typically run over one full year.
- Part-time study is typically two years.
- Option to exit the master’s early with a postgraduate certificate or diploma – check the course specification or contact the relevant faculty registry for further details.
- Choose from: Master of Arts (MA), Master of Business Administration (MBA), Master of Laws (LLM) and Master of Science (MSc).

Master’s by research
- Choose from: Master of Arts Research (MAR) and Master of Science Research (MScR).
- Pursue an independent research project with expert supervision and support.
- Typically one year full-time or two to three years part-time.
- Opportunity to link your research project directly to career interests.
- A taste of what it might be like to do a full PhD.

Master’s 100% online
- All learning is online – study from anywhere in the world.
- Internationally recognised qualifications.
- Access to world-class teaching, to fit with your lifestyle.
- Options to spread the course over two to five years.
- A dedicated Student Experience Officer for support.

PhD (Doctor of Philosophy)
- Intensive study requiring students to make a substantial time commitment.
- Courses are usually three to four years full-time or five to six years part-time.
- Conduct original, independent research to make a significant contribution to a specific subject.
- Includes research training sessions.
- Guidance available from a designated academic team.
- Produce a supervised thesis (80,000-100,000 words), suitable for publication.
- Gain the title of PhD (Doctor of Philosophy) upon successful completion.

For more details on all research degrees, please visit www.coventry.ac.uk/research/research-opportunities/research-students/research-degrees

Professional Development module
Coventry University was the first university in the UK to offer a postgraduate module developed in conjunction with the Chartered Management Institute (CMI) at no extra cost to the student. The CMI-accredited Professional Development module is a unique opportunity on most of our full-time master’s courses. Please visit the Coventry University website to find out if this module is offered on your chosen course. The module is designed to aid your transition from academia to the workplace and aims to develop practical leadership skills, and the ability to find solutions to the complex issues that you may experience in organisations.

If you successfully complete the module, you can gain an extra qualification, which includes a CMI Postgraduate Certificate in Strategic Leadership and Management, and a CMI module transcript award for the module undertaken. The CMI professional qualification can later be used as a chance to work towards Chartered Manager status (highest award) via the qualified route, once other entry criteria are met. See the CMI website for qualification criteria, application, fees, etc. CMI module participation enrols you as a CMI Affiliate Member during your studies and then, upon successful completion, Foundation Chartered Manager (fCMgr) status. On registration with CMI, you gain access to LeadershipDirect, a dedicated online multimedia knowledge base, the online portal Career Development Centre, and an online mentoring service.

www.coventry.ac.uk/professional-development
Professional experience

Extended master’s courses with a professional/workplace experience option

As employability is at the core of what we do, some of our master’s courses at Coventry University and Coventry University London are designed specifically with a ‘professional experience’ or ‘workplace experience’ option.

We offer a number of courses with this option and, across each of our faculties, there are some differences in format and delivery. Although the scheme name may vary between faculties, the same fantastic opportunity is on offer – to extend your study period to include time to put theory into practice in a professional setting.

As a result, you should then be able to develop your knowledge and skills to strengthen what you’ve learnt in your academic studies.

www.coventry.ac.uk/extended-masters

- Engineering, Environment and Computing
  A number of our courses now have a work-placement option, providing you with the opportunity to add a nine to 12 months’ work-placement to your one-year master’s course. The work-placement is designed to further develop your skills, knowledge and professional experience with the aim of maximising your employability prospects. The optional placement modules incur an additional tuition fee of £4,000*.
  
  Engineering, Environment and Computing courses can be found on pages 78-105.

- Business and Law
  We know how important professional experience can be in helping you progress your career, offering you the chance to hone and progress the skills and knowledge you will need in the workplace, after you graduate. We have, for this reason, added ‘professional experience’ options to a range of our business and law courses, allowing you the opportunity to add a placement of six-to-eight months to your master’s course.
  A further £4,000 tuition fee applies when extending your master’s*.
  
  Business and Law courses can be found on pages 58-77.

- Health and Life Sciences
  Many of our courses now offer a ‘with professional experience’ option where you could take a six-month placement* as part of the course. The skills you could gain from this would be a valuable addition to your CV. The placements can take the form of an internship (which may be paid or unpaid – this will depend on what is being offered and agreed with the host organisation) in a relevant field. If you do not want an internship or are not successful in securing one, you may conduct campus-based professional experience*. This will deliver similar learning outcomes to those of a placement, through supervised projects and activities designed to offer you the opportunity to integrate theory with professional practice.
  
  Health and Life Science courses can be found on pages 106-125.

- Arts and Humanities
  Professional experience can be vitally important in helping you progress your career. It can offer you a chance to hone and progress the skills and knowledge you will need in the workplace, after you graduate. We have, for this reason, added ‘professional experience’ options to a range of our Arts and Humanities courses, allowing you the opportunity to add a placement of six-to-eight months to your master’s course.
  A further £4,000 tuition fee applies when extending your master’s*.
  
  Arts and Humanities courses can be found on pages 44-57.

*The work-placements, and professional experience options, may be subject to availability, competitive application and visa conditions (if applicable). Additional fees, expenses and costs may apply. These opportunities are not guaranteed but you will benefit from the support of dedicated staff in trying to find and secure an opportunity.
Research excellence

Excellence with impact

Our university’s research is focused on delivering ‘excellence with impact’. Our research goes beyond simply enhancing academic knowledge – it aims to effect real change in the wider world.

In line with our 2021 strategy, and to ensure we continue to deliver high-quality outputs, we have made significant investments in our research portfolio and supporting infrastructure in the last year.

With just under 600 academics working in our challenge-led interdisciplinary Research Centres, each excelling in its specialist areas, our aim is to be QS-listed as one of the world’s top 100 universities under 50 years old.

Our QS Stars ranking now sits at 4 Stars for research. Up from 1 Star only three years ago, we take pride in Coventry’s flourishing research environment in 2020 – a strong indicator of our continual growth and impact.

Our Research Centres

Research is undertaken by our dedicated and specialist Research Centres:

- The Centre for Agroecology, Water and Resilience (CAWR) drives transdisciplinary research on the understanding and development of resilient food and water systems internationally.
- The Centre for Arts, Memory and Communities (CAMC) explores historical, social and political dimensions of cultural production using both academic and practice-based research.
- The Centre for the Built and Natural Environment (BNE) focuses on closing the design versus ‘as-built’ performance gap found in the built environment.
- The Centre for Business in Society (CBiS) seeks to promote responsibility and to change organisations’ behaviours to achieve better outcomes for economies and societies.
- The Centre for Dance Research (C-DaRE) specialises in an inclusive interdisciplinary approach to diverse forms of artistic and scholarly research in dance.
- The Centre for Data Science (CDS) develops research in artificial intelligence, data science and future computing, linking fundamental science to applications in the real world.
- The Centre for Financial and Corporate Integrity (CFCI) examines the complex interrelationships between economics, finance, accounting and law to inform transformative issues and events facing global corporations.
- The Centre for Fluid and Complex Systems (FCS) connects applied mathematicians, statistical physicists, experimentalists, theoreticians and specialists in scientific computing, with a focus on measuring and predicting complex systems.
- The Institute for Future Transport and Cities (IFTC) combines expertise across design, human factors, engineering and manufacturing, to deliver safe and sustainable transport solutions for the cities of the future.
- The Centre for Global Learning: Education and Attainment (GLEA) aims to impact positively and ethically on teaching and learning across the higher education sector, and beyond.
- The Centre for Intelligent Healthcare (CIH) pioneers research in the area of digital healthcare to improve communities and enrich and prolong lives.
- The Centre for Postdigital Cultures (CPC) brings together media theorists, practitioners, activists and artists, and endeavours to promote a more socially just and sustainable ‘post-capitalist’ knowledge economy.
- The Centre for Sport, Exercise and Life Sciences (CSELS) undertakes scientific research to understand life from the molecular level through to the whole body.
- The Centre for Trust, Peace and Social Relations (CTPSR) undertakes impactful research that enables dialogue and the building of trust to foster peaceful relations, strengthen human security and challenge inequality worldwide.

www.coventry.ac.uk/research
Our research degrees

We give as much priority to high-quality research as we give to high-quality teaching. In addition to self-funded opportunities, we offer an extensive portfolio of funded PhD projects with expert supervisory teams based in one of our leading research centres. We invest more than £5m in doctoral researchers annually.

From autonomous vehicles and digital culture to sustainability and data sciences, we have a wide range of research opportunities that will stimulate and inspire. To search for currently available PhD opportunities, visit www.coventry.ac.uk/studentships.

As an enterprising university, we also offer a range of professional doctorates, industrial and international programmes. These opportunities use a distance-learning model with our partner universities around the world.

Our students are fundamental to our research mission and our Doctoral College provides outstanding support, guidance and comprehensive research training including technical, personal and professional skills for all students and staff.

Doctoral College
Currently home to more than 700 postgraduate researchers across a broad range of research degrees, our Doctoral College and Centre for Research Capability and Development (ReCap) brings together PGR, researchers and expertise from across the university. It delivers centralised support for doctoral education and a comprehensive “PhD to Professor” programme of development and training.

The Centre for Research Capability and Development offers continuing researcher development on a broad range of themes, driving the Coventry University ethos of ‘PhD to Professor’. The team delivers a wide range of researcher-development programmes designed to support careers at all stages. These include workshops, conferences and discipline-specific opportunities to support development at team, centre and institutional levels.

The university also offers a range of online developmental modules for researchers, including career planning, managing your doctorate, communication skills, research ethics and integrity, research methods, and research supervision.

www.coventry.ac.uk/research/doctoral-college-and-centre
International students

We understand that moving to a new country can be daunting, which is why we’re here to welcome and support you during your time with us in Coventry.

You won’t be alone – we currently have over 13,000 international and EU students from more than 140 different countries at Coventry University and Coventry University London, and more than 3,000 of them are postgraduate students. We’re here to help you settle in quickly, offering support and activities to help international students during enrolment, including an airport transfer service and dedicated orientation events.

International Office team

Our International Office includes multilingual staff, many of them with personal experience of living and studying abroad. They can help you to immediately feel at home as they understand how differences in language, culture and education systems affect people.

The team can answer general questions on pre-arrival, visas, immigration, finances, employment regulations, culture differences and post-study ideas.

Airport transfer services

If you fly into Birmingham Airport or London Heathrow, we offer you a Free Airport Meet and Greet service. We also offer a Premium Meet and Greet service all-year-round, where a chauffeur meets you at the airport to take you directly to your accommodation in Coventry. Typical costs are £75 (Birmingham Airport to Coventry) and £220 (London Heathrow to Coventry). This service is subject to availability and costs are subject to change.

Please note that both services must be booked in advance. To book or to find out more, please visit www.futurelets.co.uk/airport-transfers

English language support

Coming to a new learning environment can be challenging. Our Pre-sessional English courses will help prepare you for UK academic study before you start your chosen course. You will have the opportunity to improve your English language ability – and to further develop your academic and research skills.

You can work with highly qualified and experienced tutors who understand the challenges that international students face. To be successful in your degree, you must be able to demonstrate use of all four language skills for English – reading, writing, speaking and listening. The length of your course will be determined by your current level of English and the score you achieve for each of the above four skill components.

You can use the table opposite to calculate the length of course you may need. Pre-sessional English is not compulsory if you can demonstrate the right level of IELTS for your chosen course.

You can also study our five-week Pre-sessional English course 100% online.

If you need a Tier 4 visa to study in the UK, you will need a Secure English Language Test (SELT) certificate to gain entry onto a Pre-sessional English course. You must sit an IELTS test at a test centre that is approved by UK Visas and Immigration (UKVI) to deliver a SELT.

For more information, including fees, please visit www.coventry.ac.uk/pse

Master’s qualifying courses

Even if you don’t currently meet the academic entry requirements for our postgraduate courses, you could participate in an ONCAMPUS Coventry master’s qualifying course, which offers progression to a number of our postgraduate courses.

Postgraduate support

We offer a range of helpful support services to our postgraduates, whether you’re looking for quiet places to study or to network and be seen.

Social and wellbeing
Right at the heart of our campus is The Hub, a place to meet friends, buy essentials, have a coffee, or eat in the food court. The Hub is also home to organisations that are here for you during your time as a postgraduate.

- Information Points
  These are located across campus, in the Student Centre and in The Hub. These are the first points of contact for students, where staff aim to respond to queries from start to finish, resolving any issues presented.

- Health and Wellbeing
  This is home to the Medical Centre in case you need to see a doctor. Our Health and Wellbeing team also includes welfare officers, counsellors and mental health advisers who provide support for a range of issues, such as health or relationship concerns. Services are strictly confidential and, after an initial assessment, students may be offered one-to-one counselling or referred to specialist external organisations. Our Disability Support team provides guidance and assistance to disabled students from the point of application through to graduation. We offer support to students with a variety of disabilities including: Specific Learning Difficulty (Dyslexia); Physical and Sensory Disabilities and Aspergers (Autistic Spectrum).

- The Spirituality and Faith Centre
  With a spiritually focused social space, this centre is located at the heart of the campus and is a warm, safe environment for all students and staff, whatever your beliefs. It houses a multi-faith meeting room, chapel, Muslim prayer rooms (with ablution facilities), lounge, multi-faith library and kitchen. Private appointments can also be made with our multi-faith chaplains.

- Sport and Recreation Centre
  The Sport and Recreation Centre is just a short walk from The Hub. As a postgraduate, you can gain subsidised membership and enjoy a range of activities and classes facilitated by dedicated staff.

- CUSU Postgraduate Community
  Part of Coventry University Students’ Union (CUSU), the CUSU Postgraduate Community was established to foster a vibrant and active community of postgraduates from all walks of life. Here, you’ll find opportunities to network with peers and university staff and attend social events. You can sign up to become a member of the Students’ Union by visiting cusu.org and then you can ‘opt in’ to the Postgraduate Community in order to become a member. Members of the CUSU PG Community Committee can receive funding to put together events for students.

Academic support
The Lanchester Library is open 24/7, 364 days a year and is home to 1,400 study spaces, including group and silent areas. We currently offer more than 650 computers and an additional 120 free-to-loan laptops. Our Academic Liaison Librarians can offer specialist subject support and help you to access more than 142,000 ejournal titles, 331,000 ebooks and 313,000 print books (figures may change).

- Maths and stats support
  Our mathematics and statistics support team, sigma, is based in the Maths and Stats Support Centre in the library. We provide free, drop-in assistance on-site, or virtually via our website which also offers hour-long online individual appointments – useful if you’re collecting and analysing data for projects. Stats tutors also run courses and workshops in a variety of areas you may find useful. www.coventry.ac.uk/sigma

- Academic writing support
  The Centre for Academic Writing (CAW) offers online and face-to-face advice on all types of postgraduate-level writing, including essays, reports, doctoral theses, master’s dissertations, and writing for publication. Our Academic Writing Studio provides dedicated space and time for writing sessions, while our Live Online Writing Cafe offers remote support for your writing. To develop and progress your writing, you can also enrol in credit-bearing postgraduate modules: ‘Reviewing Research Literature’, ‘Crafting a Research Article’ and ‘Writing for Scholarly publication’ (Modules subject to availability). writing.caw@coventry.ac.uk
Accommodation

We currently have more than 3,000 rooms in halls of residence located in and around Coventry city centre for Coventry University students.

We offer university-owned, as well as partner-owned, halls of residence. We have a city-centre campus, so our accommodation is located near to the action, and makes it easier to meet friends and arrive at lectures on time.

As a postgraduate student, you may find your taste in accommodation has changed since your undergraduate days. We offer accommodation specifically designed for postgraduate study. You can opt to live in a postgraduate room in a building shared with undergraduates, or live in a property which is specifically allocated for postgraduates.

You will have the opportunity to meet and live with other postgraduate students, and there are kitchen and lounge areas for socialising. Students often form bonds with flatmates and we think it’s great to have other postgraduates around to talk to when you’re on a postgraduate course yourself.

We have a range of accommodation located near the university campus and the city centre, with an array of restaurants, bars and shops all closely located. There’s a range of amenities located near each accommodation too, including shops and supermarkets, so you’ll have lots of handy places right on your doorstep.

We also currently offer a comprehensive free-to-access Residence Life (ResLife) programme in university-owned halls. This offers you free or low-cost day trips, workshops, events and competitions to enhance your hall experience.

Postgraduate accommodation is available in Bishop Gate, Godiva Place, The Cycle Works, Hawkins Road, Singer Hall, Parish Rooms and Priory Hall. See more details at www.coventry.ac.uk/pgaccommodation

For a step-by-step guide on how to apply for your choice of accommodation, please visit the website section www.coventry.ac.uk/life-on-campus/accommodation/how-to-apply

E: unihalls@futurelets.co.uk
T: +44 (0)24 7615 8158

Please note that available accommodation can change as nomination and partner agreements may change. Please check the Coventry University website for an up-to-date position.

www.coventry.ac.uk/pgaccommodation
We believe that if you commit to us and make us your chosen place of learning, then we need to give you the very best facilities possible when you arrive. A key element of our corporate strategy is investing heavily in our future.

The investment in infrastructure underpins the excellence of our activities, with the aim of offering world-class spaces for student education, research and enterprise. With this happening, we can continue to drive organisational performance and output through digital and technology-led transformation. This will support and improve our core pillars of student experience, teaching and learning, research, and enterprise capability.

Coventry University Group is aiming to invest in excess of £400 million pounds over the next 10 or so years. This includes investment for some very significant projects, some of which have recently completed, some are in progress and some are due to start in the coming year or so.

In 2019, we started work on some significant projects to help further enhance our campus network for our students, staff and visitors. A number of buildings have been demolished, or will be soon, including the James Starley building as well as the former Civic Centre. Our plan is to develop new, modern spaces, with significant funds being invested in the coming years to further improve the working environment for both students and staff. This aims to address emerging expectations in student experience and research.

The new Beatrice Shilling building links to the existing engineering and computing building with an elevated glass walkway. Students have also taken up residence in our newly-opened student accommodation buildings, Bishop Gate and Godiva Place, which have together provided 1,500+ new bed spaces.

To further improve your campus experience, we are in the middle of fully reviewing our catering facilities city-wide. New cafés are open in three buildings for students, staff and visitors, while existing catering provision at other locations has been refreshed and improved.

We are committed to environmental responsibility and sustainability and have improved the library with lighting that is brighter and significantly more energy-efficient. We have also renewed our energy centres in three of our main buildings to reduce our consumption and carbon footprint. A key priority for us is that our buildings create spaces for students to have an enhanced experience that is innovative, collaborative and which facilitates new methods of learning.

The old James Starley building was demolished to make way for the fabulous new Starley Gardens due in 2021. Inventor of the Penny Farthing and the Coventry Tricycle, James Starley is generally regarded as the father of the modern-day bicycle industry. Named after him, this eco-friendly landscaping scheme will benefit students, staff and the wider community, by providing a tranquil zone that promotes wellness in the heart of the campus and Coventry city-centre. As well as opening up the whole area, the new gardens will maximise the view of Coventry Cathedral from other university buildings.

The university has begun work on a significant long-term project to transform this former Civic Centre site into new university buildings. Demolition started in 2018 and was completed in the summer of 2020. The final plans retain parts of the old Grade II listed Civic Centre II building which will be incorporated into the design of the new building. The medieval vaults, at basement level, which are also Grade II* listed will be integrated into the building and used as part of the new facilities.

The current Faculty of Arts and Humanities buildings are also being reworked, which will result in a modern and all-encompassing “super” building, due in 2022. It intends to offer the latest facilities, such as a multi-use studio, new film and immersive media studios and enhanced social spaces, as well as a gallery space, open to the public.

At Coventry University London, the recently opened Cutlers Exchange in Devonshire Square gives an extra 20,000 square feet of new teaching spaces, a Postgraduate Centre, a Financial Suite, seven new collaborative working spaces and a new event space. The facility features the latest technologies including Bloomberg terminals, computer and IT labs, and a Standards and Poor’s Market Intelligence Suite. All students at Coventry University London benefit from the extra studying and learning space as well as the breakout areas. Postgraduate students also now benefit from their own dedicated centre and facilities.

Why Art and Design at Coventry?

When you study an art and design-related subject with us, you’re joining a school with a long tradition of making a distinct contribution to creative industries across the UK and internationally. Coventry University was originally established as Coventry School of Art and Design in 1843, so we have a rich heritage of teaching artists and designers in the city. As a postgraduate, you’ll be encouraged to cultivate your own unique practice, working from an initial concept right through to the finished product. You’ll be supported by active practitioners, researchers and writers in their respective fields. As Coventry is the UK City of Culture 2021, you could be studying in a city that’s developing relationships with communities of practice nationally and internationally.

Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.

Architecture MArch draws upon Coventry’s unique architectural heritage as a utopian, modernist city model and an international centre for Peace and Reconciliation. These powerful narratives help you create and explore projects of impact and meaning, with the tackling of real-world issues and agendas at its core. Supported by a teaching team with vast international experience, you should develop your role as expert and enabler with professional agencies in challenging contexts. You will have the opportunity to access the latest production and modelling facilities.

Automotive and Transport Design MA is developed to teach critical and creative responses to the automotive and transport design sector. You will explore briefs and investigate design drivers, markets and emerging opportunities to produce solutions at the forefront of the sector. The overall aim is to innovatively challenge existing or future design through investigative and creative approaches. You will build upon professional design competencies that are industry relevant. You can also focus on their capability to explore transport issues, opportunities and solutions at a more holistic or systems-based level.

Design Management MA has a professional and practical focus. It has been developed in collaboration with leading professional design managers from companies including Imagination Ltd, Xerox (HCL), Cyber-Duck and Knight Design Innovation. Such companies need leaders who understand the value of design and manage creative processes to achieve successful business outcomes. We have produced design leaders and innovators in their field and some of our past graduates have worked in design consultancies and manufacturing industries worldwide.

Graphic Design MA has been developed in partnership with commercial directors, designers, photographers and typographers. The course is aimed at those who would like to enhance their existing professional portfolio and expand their understanding of current and emerging trends in graphic design practice. Learning by doing, you will explore a range of design methodologies, then put them into practice with “live” collaborative briefs, creating valuable links with the professional design community.

The university was ranked 10th for Architecture in the Guardian University Guide 2021.
Illustration and Animation MA looks to expand your digital and physical knowledge of your craft, and help you find your own ‘voice’ and style. It covers illustration, publishing, photography, image generation and animation. While you further your conceptual and technical talent, we help you to better understand your role as a visual interpreter, as well as the importance of adapting to market needs and to a developing field.

Interior Design MA works to deepen your knowledge and experience of interior architecture and design. The MA encompasses interior design within architectural and transport design to help prepare you for future employment opportunities. We encourage you to develop your design capabilities within a global context. You can explore the human relationship with, and taking into account the scale of, a range of spatial environments, manufacturing processes and the desire for uniqueness.

Painting MA encourages you to learn first-hand about painting and the art world in major British, European and worldwide centres. Spanning a variety of cultures and a range of art styles, painting is now a vibrant part of contemporary fine art practice. Our creative community has already provided a wide range of exciting opportunities for our previous graduates, including painting, residency, exhibition opportunities, community work and curating.

Product Design Innovation MA prepares you for global employment as creative, innovative and strategic problem-solvers. The focus is on employing research and critical and creative thinking skills to solve complex 3D design problems with imagination and insight. The course invites applications from students of all design and technology-based disciplines, and particularly mid-career applicants who may be considering a change, as part of their personal and professional development.

Links with industry and professional bodies
You may have an opportunity to work on live projects with industry partners. Our Automotive and Transport Design course is supported by visiting industry design staff who have come from companies such as Jaguar Land Rover, SAIC Motors and more. Visual Arts Research in the Faculty of Arts and Humanities has established collaborations with the National Gallery and the Royal College of Art in London. It also collaborates with other UK, European and American universities and institutions.

Currently in partnership with the Chartered Management Institute (CMI), most courses incorporate a mandatory Professional Development module. This will give you an additional accreditation and qualification, if you successfully complete the course. www.coventry.ac.uk/professional-development

Professional experience
Our Design Management, Product Design Innovation and Automotive and Transport Design ‘with professional experience’ courses can give you real-life exposure through industry engagement. Work-placements are a great way to gain practical experience to help further your employability. Please note that professional experience opportunities may be subject to additional costs, application, meeting applicable visa requirements and availability – and cannot be guaranteed. Visit the website for further details. www.coventry.ac.uk/fah-extended-masters

Employability
Our employment support gives you the opportunity to develop the confidence you’ll need for a highly rewarding career. We help with workshops, embedded learning, lectures, professional experience, mentoring and one-to-one guidance sessions. Some of our past graduates have worked within the creative industries with Marvel, Aston Martin, the BBC and H&M. Many of them have gone on to create their own labels and run their own studios. We offer ‘enterprise’ support, advising students how to begin as a freelancer/entrepreneur and start a business.

Facilities
We have a range of specialist facilities and an expert team of technicians available to support your work and creative experimentation, whatever your choice of media. You’ll get the opportunity to access to milling machines, rapid prototyping and laser cutting machines, as well as 3D printing and hand tools, plus automotive designers can make great use of our clay studio. You may get the chance to exhibit work across the city, as well as in the Lanchester Gallery. This is our own space where you can showcase work and where we welcome contemporary practitioners to exhibit and share their approaches to practice.

Why Humanities at Coventry?
The School of Humanities has an excellent reputation for applied research in education, linguistics, creative writing and international human security. Research-informed learning is thoroughly embedded in our courses and you are encouraged to engage with active practitioners, writers and published academics who are experts in their field.

Academic Writing Development and Research PGDip/MA is an online distance-learning course for those interested in researching, studying and teaching writing. Its focus is on writing, rhetoric and literacies research, and how this research informs the teaching of writing and writing development work. Based in the Centre for Academic Writing, we have earned an international reputation in Academic Writing research and practice.

Diplomacy, Law and Global Change MA is aimed at those interested in the nature of the world in which we live, the problems it faces and how to respond to them. The course focuses on the emerging global order of the 21st century. It aims to give you an understanding of the development and contemporary practice of diplomacy and the rules of international law. We designed the course to prepare you with the useful skills you will need for careers in the diplomatic services, international organisations, non-governmental organisations or international business.

English and Education Management MA provides advanced academic study of English literature and language, as well as offering you the knowledge base necessary to become an effective manager in a variety of education settings (e.g. higher and further education and/or state and private schools). You can gain the Teaching Knowledge Test, a recognised professional teaching qualification awarded by Cambridge Assessment English.

English Language Teaching and Applied Linguistics PGCert/PGDip/MA provides specialist professional development for English Language Teaching (ELT). It draws on research carried out by our English language specialists and focuses on the theory and practice of teaching English in a variety of contexts. We offer two pathways – one focusing on Teaching English to Speakers of Other Languages (TESOL) and one focusing on Linguistics and English for Academic Purposes (EAP).

International Relations MA is for those interested in an international career in government, public administration, diplomacy, policy formation or research. The course helps you understand and interpret issues and challenges facing our increasingly interconnected world. Covering themes as varied as globalisation, international law and trade, war and peace, and diplomacy, it explores our strengths in the field of international politics and security.

Continued overpage

“...I decided to take a master’s course to pursue a better education and future, as well as to meet other students from different cultures.”

Yenan Hu
English Language Teaching and Applied Linguistics MA
Humanities (continued)

Post-Digital Humanities MA is an inter-disciplinary course uniting humanist enquiry with digital media expression. It focuses on creative application of humanities-inspired critical thinking to real-world challenges. It explores the relationship created by emerging technologies (digital) and the real-world (analogue) that defines everyday experiences. Students of history, international relations politics, sociology and literature can enjoy exploring and expressing ideas in creative, disruptive ways. You are encouraged to use participatory and digital media and public spaces to help shape and inspire societal dialogue.

Terrorism, International Crime and Global Security MA explores the challenges that threats pose to national and global governance, human rights and ethics, and to criminality and regionalism. It gives you the opportunity to build on our established expertise in the fields of politics, international relations, global and human security, and peace and reconciliation studies. Subject to availability, guest speakers and field trips are integral part of the course, which include visits to the counter-crime, counter terrorism and counter modern slavery organisations.

Links with industry and professional bodies
Research-informed teaching is delivered by our experts on criminal mafias, security, policing, trafficking and diplomacy, as well as by professional creative writers and leading academics in the linguistics field. Students have the chance to attend workshops at the foreign affairs think tank Chatham House, the International Slavery Museum or the UN Office on Drugs and Crime. They could get to participate in lectures and workshops with renowned applied linguists, such as Professor David Crystal, or spend a week on a writers’ retreat in the UK or abroad*.

Our courses have a strong international dimension and can offer the chance to enjoy overseas field trips. We seek to immerse students into the community of practice that we have built with our partners working in the field. Accreditations and memberships may apply to courses in this section. For more details, see page 16. In partnership with the Chartered Management Institute (CMI), most courses include a mandatory Professional Development module, so giving students an opportunity for a further accreditation and qualification.

Employability
We offer dedicated support and bespoke career advice, including CV writing, psychometric testing and interviews. The interdisciplinary approach of our courses aims to provide transferable skills valued by employers.

Facilities
Our facilities encourage a global outlook that can add an extra dimension to a course. Nationally and internationally we deliver on COIL (Collaborative Online International Learning), MOOC (Massive Open Online Courses) integration into the curriculum and MALL (Mobile Assisted Language Learning). Students can engage in webinars with students globally. We enrich course material with tutorials, workshops and inter/multi-cultural perspectives and offer extensive academic and English support.

Further information
Visit our website for detailed course information or see pages 139-140 for information about entry requirements and course fees.

*Please note that we are unable to guarantee any placement/internships, work experience, industry, field trips or study abroad and international opportunities and that any such opportunities referred to in this brochure may be subject to additional costs (e.g. travel, visas and accommodation etc.), competitive application, availability and/or meeting any applicable visa requirements. To ensure that you fully understand the requirements in this regard, please contact the International Office for further details if you are an EU or international student.
This course content is correct at the time of going to print. We regularly review our course content, to keep it relevant and current for the benefit of our students. For these reasons, course modules and entry requirements may be updated. 2021 course web pages start to go live autumn 2020.

**Why Media and Performing Arts at Coventry?**

Join the School of Media and Performing Arts and you’ll have the opportunity to gain skills you can use in all kinds of careers. We encourage collaborative work across all disciplines to develop the kind of real-life skills you’ll need. You’ll have opportunities to spread your wings too – our previous students have travelled across the globe on professional experiences and projects (subject to availability, application process and possible visa requirements. Fees may apply). We pride ourselves on being an important part of the cultural life of the city. As Coventry is UK City of Culture 2021, you could be studying in a city that’s developing relationships with communities of practice nationally and internationally.

**Automotive Journalism MA** aims to help you turn a passion for cars and communication into a career and is endorsed by the Guild of Motoring Writers. The course capitalises on our strong industry links with motoring publishers like Haymarket, Dennis and Bauer; motoring journalist groups like the Guild and the Midland Group of Motoring Writers; and successful car makers like Jaguar Land Rover and Aston Martin. It is delivered in partnership with experts from the automotive publishing industry. Some of our previous graduates have worked for automotive media such as Autocar, Car Throttle, EVO, Top Gear, Pistonheads and What Car?. Others manage PR for automotive companies such as Mercedes-Benz, Tesla and Continental.

**Communication, Culture and Media MA** engages with contemporary developments and debates in media, communication and culture. You will learn to question, critique and make your voice stand out from the crowd on topical debates. These could include feminism, identity in a digital world, global and transnational media events, international media industries, distribution networks and viral campaigns. Our teaching is underpinned by research-based and real-life projects and collaborations with our network of international partners.

**Global Journalism and Public Relations MA** prepares you for practice and analysis of global journalism and media and online outlets in the UK and the US. The MA covers all the areas of journalism, from legal and ethical issues to practical interviewing, writing, broadcast and web skills. You will be taught by award-winning journalists and presenters, and be able to attend guest lectures.

**Immersive and Virtual Media MA** aims to develop the creative, critical and technical skills required for practitioners to develop, craft, perform, co-create and share immersive arts experiences. You can gain practical experience, creating and sharing immersive works across a broad range of mixed-reality technologies, including Virtual Reality (VR) and Augmented Reality (AR). The course takes a broad interdisciplinary interpretation of what we mean by immersive practices. These include performance capture and networked performance, spatial and volumetric filmmaking, installation, projection and site-specific working, immersive sound design and music composition, animation, play and games design.

Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.

**Continued overpage**

The university is ranked 2nd for Journalism, Publishing and Public Relations and 9th for Film Production and Photography in the Guardian University Guide 2021.
Media and Performing Arts (continued)

Media Management MA allows you to develop leadership, management, creative and business skills in the media industry. The course capitalises on our extensive experience of partnering with business and working closely with creative industry partners. It aims to give you the capability to support effective strategic outcomes and operations in businesses where creative activity is part of the overall strategy. The course should appeal, in particular, to those with media backgrounds or with a media industry focus. Through practical application in real-life scenarios, you can develop new perspectives and personal networks leading to enhanced employability. This course is intended to develop the creative, media-savvy and digitally fluent strategic thinkers of tomorrow.

Media Practice MA aims to foster individuality, confidence and creativity, so you focus on the processes of making and critiquing media that is socially, politically, economically and ethically engaged. You will join our community of critical thinkers and makers, and be taught by staff who currently include filmmakers, authors and artists. We’ll encourage you to experiment and develop new forms that take full advantage of the possibilities of blending analogue with digital media.

Photography MA offers emerging practitioners of photography, and its associated forms, chance to develop their work via a series of key interrogations. The course aims to challenge you to connect with new audiences, processes and professional futures, by considering the role of publics, visual strategies and the contextual location of independent work. We welcome students from diverse backgrounds and adopt an approach which considers practice as not isolated from associated mediums and methodologies, but within an “expanded field” (Baker, 2005). You have the opportunity to work with archives, produce installation pieces, run collaborative projects, publish and blur traditional genre and medium boundaries.

Professional experience
Our ‘with professional experience’ courses give you real-life exposure through industry engagement. Doing a work-placement is a great way to gain practical experience to further your employability. Please note that professional experience opportunities may be subject to meeting applicable visa requirements, additional costs, application and availability, and cannot be guaranteed.

www.coventry.ac.uk/fah-extended-masters

Links with industry and professional bodies
Many of our courses have strong links with industry, visiting speakers and global opportunities (subject to availability, application process and possible visa requirements. Fees may apply). Currently in partnership with the Chartered Management Institute (CMI), most courses include a mandatory Professional Development module which, upon successful completion, gives you an additional accreditation and qualification. We’re also in the process of developing collaborative links with institutions across the globe, particularly in China and America. www.coventry.ac.uk/professional-development

Employability
As a postgraduate student within the School of Media and Performing Arts, you’ll have the opportunity to continually develop skills to enhance your career prospects and highlight your skills and passion. Our learning environment is distinguished by a strong practical focus with industry input. We aim to help you develop into a creative and independent practitioner who thrives in demanding and competitive fields. We have excellent links and close relationships with artistic employers and organisations locally, nationally and internationally. When you have successfully completed the course, you can combine the skills you have learnt, with guidance from us, which should help you to confidently develop your future career prospects in media, journalism or theatre.

Facilities
We’re based in the Ellen Terry building, a converted 1930s art deco cinema that houses professional-style spaces. You can gain hands-on experience in our theatre, with professional lighting and audience seating that provides an authentic atmosphere at every performance. Other facilities include music studios, video recording, music editing suites, and radio studios. Media courses can access The Tank Studio, a live HD audio/video production studio that houses high-end broadcasting technology.

AHT032/AHT031/AHT030
www.coventry.ac.uk/protective-security-ma

Why Trust, Peace and Social Relations at Coventry?
The Centre for Trust, Peace and Social Relations is distinctive both in terms of the research undertaken and the approaches used. We are a truly multi-disciplinary centre and, by drawing from academic disciplines, knowledge and skills across the social sciences and beyond, we tackle many of the most critical and sensitive current challenges facing society. The centre exemplifies the university’s long-standing commitment to research that makes a strong impact on society and on the security and quality of life of ordinary people worldwide.

We offer master’s level courses by blended learning designed for graduates and professionals interested in global security, peacebuilding and diversity. Our courses are delivered online, combining short residential workshops with online modules, one-to-one tutoring and independent study. The courses are highly participatory, which should enable students to engage in our programme of study wherever you are in the world.

Global Diversity Governance MPA is an international master's for professionals in public, private and voluntary sectors. It is aimed at those working in diverse contexts and who aim to be more effective in their work, gain a wider knowledge, and further their career. As a defining characteristic of our time, diversity affects all of society, from politics and press to education and the economy.

In our connected world, the need to understand diversity’s impact and dynamics in local areas is more vital than ever. This course helps you develop the skills, understanding and perspectives globally to manage cultural diversity and create lasting, positive change in your own community or organisation.

Maritime Security PGCert/PGDip/MA can be considered one of the most dynamic and expanding sectors in the security industry. It has an impact on development efforts, insurance, international law, and global shipping. It encompasses the headline issue of piracy alongside other security challenges such as trafficking by sea, illegal fishing and port security. The course is shaped by research-active staff and real-world events. Delivered in a friendly and supportive learning environment, it should allow you to understand and analyse current issues and develop skills in response.

Peace and Conflict Studies PGCert/PGDip/MA is the flagship course at our largest research centre, the Centre for Trust, Peace and Social Relations. It provides you with a comprehensive knowledge and understanding of issues, theories and practices in peace and conflict, and gives you the opportunity to learn how to apply theory and case studies to peacebuilding in complex situations.

Protective Security and Resilience PG Cert/PG Dip/MSc is shaped by research-active staff and real-world events. Protective security and resilience is becoming an important and influential consideration in the counter-terrorism, security and development disciplines, particularly for crowded places and critical infrastructure protection. This new and influential course focuses on the complex security-related challenges faced by law enforcement, governments and businesses. It also asks how these issues are understood and mitigated to help keep people safe. You can develop skills which will help you to understand and analyse these issues, within a supportive, learning environment.

Further information
Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.

Visit our website for detailed course information or see pages 139-140 for information about entry requirements and course fees.
Coventry Business School was rated as “excellent” in 2019 by Eduniversal, a ranking of business schools and universities in more than 150 countries, which analyses international influence and teaching quality. Our facilities and technology are close to what you’d expect in real-world business environments, which should give you the transferable skills and experience you may need for your career. With more than 90 years of business heritage at the university, our courses sit within one of three specialist areas:

- business and management (which includes our MBA programme)
- economics, finance and accounting
- marketing, human resources, sport and events.

Facilities
As a postgraduate student at Coventry Business School, you’ll be based in the Jaguar building, a bespoke building with spacious study and social facilities, as well as the William Morris building.

Coventry Business School also houses the International Centre for Transformational Entrepreneurship, a unique institution that brings together experts and leaders in enterprise and entrepreneurship. The centre delivers our International Entrepreneurship MSc. This helps to inform teaching across our courses, ensuring it reflects the latest in entrepreneurial thinking and help prepare you for the working world.

You could benefit from our Trading Floor, currently one of the largest academic trading rooms in Europe, our Business Simulation Suite, allowing for strategic problem solving through ‘real-life’ simulations, and for marketing students, the DigiComm lab. All are equipped with industry-relevant software and platforms, which aim to give you an experience that reflects the business world. Wi-Fis are available throughout all buildings, computer rooms and study hubs and – to make this setting even better for Coventry Business School students – the Lanchester Library is just across the road.

www.coventry.ac.uk/cbsfacilities

Employability
Our postgraduate courses are designed with employability in mind, with a focus on practical teaching to develop your skills, while taking account of your career prospects. Alongside our teaching, we also understand the importance of you developing practical skills. As such, we have a range of master’s courses available with the option to add a professional experience placement. These can last up to 11 months and are designed to help you further develop practical business skills and knowledge. While not guaranteed, many of our courses offer you the chance to do a consultancy project as part of your course. Previous students have done projects such as investigating job satisfaction in a charity. These opportunities are subject to availability, a competitive application process, and fees may apply.

Alongside our courses, our Talent Team is on hand to offer help and advice, including one-to-one support, drop-in CV and application checks, skills development workshops, mock interviews and assessment centres, and support with psychometric testing. It also provides online resources and organises employer events that can be great networking opportunities. Employability is considered within the design of every course at the university and the support available is designed to help you launch your career.

Links with industry and professional bodies
We are currently an active member of the European Foundation for Management Development (EFMD) and the Chartered Association of Business Schools (CABS), as well as being a signatory to the United Nations Principles for Responsible Management Education (UNPRME) initiative. We also hold a Small Business Charter award, which recognises our focus on student entrepreneurship, support for small businesses and key role in the local economy.

Many of our courses also hold accreditations with professional bodies. This is further evidence that our courses aim to produce graduates equipped with the skills and knowledge that industry expects.

#### Why Business and Management at Coventry?

Our business and management courses have been designed to reflect the evolving business landscape, and touch upon areas such as entrepreneurship, analytics and project management. Our goal is to create the thought-leaders and decision-makers of tomorrow with courses that reflect the needs and motivations of business today.

With a focus on practical teaching, supported by strong professional contacts and industry-standard technology, studying one of our courses could equip you with the knowledge and skills you’ll need for a successful career.

To help further hone your leadership skills, most of our courses also contain a module produced in partnership with the Chartered Management Institute. See page 62.

Related courses:
MBA - see page 72

Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.

---

**Advanced International Business MSc** is ideal for business graduates seeking the skills and knowledge to become flexible, effective leaders. The course aims to develop your strategic outlook and skills, thus increasing your knowledge and understanding of business and management within an international context. Some traditional business tools and techniques are now outdated due to globalisation, increasing interconnectivity and the fast pace of change. This course explores new approaches to strategy, organisation, operations and finance to open up new market and trade opportunities.

**Business Administration DBA** is a professional doctorate. It offers top management and business leaders the chance to conduct business-focused research that can facilitate impactful change in their organisations. The DBA is studied part-time over three to six years to allow you to fit it around other commitments. It is taught in the Centre for Business in Society, a global research centre, which means that – in addition to expanding your leadership capabilities, critical thinking and decision-making skills – you can also benefit from valuable insight and support from leading industry-focused researchers.

**Business Analytics MSc** gives you the opportunity to develop the skills needed to help businesses harness the powerful insights that can be gleaned from analysing all available data. There is a focus on the competitive advantage that using “big data” can create. We developed this course due to growing demand for, and significant shortage of, highly-trained analysts capable of interpreting data. The course has a hands-on approach to help you harness data to inform business decision-making.

**International Business Management MSc** is designed for non-business graduates. It aims to equip you with a comprehensive understanding of international business challenges and the skills to negotiate them successfully. Focusing on the practical process of doing business globally, we use our industry links to share real-world business experiences with you. We highlight the issues and challenges facing modern businesses through guest speakers, industry visits, case studies and internship opportunities. The intention is to prepare you for managerial roles across the emerging borderless global economy. Industry visits are subject to availability, application process, possible visa requirements and fees may apply.

---

"I like how the teaching is practical as well as theoretical. We work on real case studies which have helped prepare me for my future career."

Natali Alsunna
International Business Management MSc
Business and Management (continued)

International Entrepreneurship MSc aims to help you pursue your entrepreneurial ambitions and provide the knowledge you need to start, expand or grow a venture into international markets. Aimed at recent graduates, potential entrepreneurs and those already in business, this course offers you opportunity to understand both the theoretical and practical elements of entrepreneurship. It has a strong international focus across its teaching staff, student body and module content.

Leadership and Management PGDip/PGCert/MA is aimed at professional students who want a career and/or have research interests, in leadership and management. It focuses on strategic workplace issues to help prepare you for an advanced managerial role within an organisation. At this level, middle to top managers must develop the ability to reflect on their management practice. This should allow them to “learn to learn” effectively and to repeatedly apply this skill to complex issues. Studied part-time, you can end the course with a PGCert or a PGDip, but the MA is the pinnacle of our leadership and management courses.

Project Management MSc is designed to give you the opportunity to learn the knowledge, skills and expertise to drive new ways of working and successfully implement change across a variety of industries. The course focuses on addressing a range of complex project management issues and aims to provide you with the tools to lead projects across geographical boundaries.

Risk Management MSc focuses on training individuals who want to build an understanding of risk analysis to respond to organisational challenges, enact positive change and ensure sustainable business resilience. This course can prepare you for, or further develop, a career in the fast-paced risk management sector. It can give you hands-on experience of market-leading risk management software, guest lectures from industry experts and teaching delivered by experienced academic staff.

Links with industry and professional bodies
The Business School is currently a member of several relevant bodies, as evidence that our courses should meet the standards employers expect. In partnership with the Chartered Management Institute (CMI), most courses incorporate a mandatory Professional Development module, giving you a further accreditation and qualification and many other benefits upon successful completion. www.coventry.ac.uk/globalprofdev

Facilities
As part of Coventry Business School, you could learn in our Business Simulation Suite. This can allow you to engage in “real-life” simulations that provide useful experiences for helping launch your career, and to smooth the transition from university to the workplace. It offers you the opportunity to gain knowledge and experience by honing your pitches and negotiation skills in the Boardroom Simulator, or by using strategic decision-making to tackle challenges set by the latest simulation software in the Strategy Lab. This should enable you to learn skills and gain experience to take into the real world of business. www.coventry.ac.uk/business-simulation-suite

Employability
Our courses are designed with employability in mind. We teach relevant skills and knowledge that are useful beyond the classroom, with a focus on applying theory to practical, professional situations. Our Advanced International Business MSc gives you the opportunity to secure a professional experience placement. This would extend your course by up to a year and allow you to graduate having further developed your practical business skills. Professional experience opportunities are subject to competitive application, availability, possible visa requirements and additional costs may apply – and are not guaranteed.

In addition, our dedicated employment and work-placement advisors offer you support in securing work-placements or future roles, through contacts with companies at a local, national and international level. You’ll also have opportunities to gain work experience with local and national organisations (subject to availability, competitive application, possible visa requirements and additional fees), as part of the final semester of your course.

Why Economics, Finance and Accounting at Coventry?
Roles in economics, finance and accounting have an impact in the financial sector and across society. These roles may be as diverse as an accountant working for a major business, or an advisor working for governments on the implementation of economic policies. Our courses are designed to offer a practically focused learning experience which should help prepare you for your career. They cover a variety of specific areas, such as banking, investment management and accountancy, as well as offering courses to provide a broader grounding in management principles alongside financial theories and frameworks.

Accounting and Financial Management MSc
is broad in scope and is aimed at graduates wishing to further their learning in accounting, finance and business management. The course is designed to best meet the need for quality accounting and financial management practitioners who can understand the impact, and manage the effects, of rapid global change on organisations, economies and societies.

Finance MSc focuses on the application of financial concepts and principles and is designed to cover both traditional and modern financial theories. It aims to equip you with specialist financial knowledge from a strategic and managerial perspective.

To allow you to specialise in some of the key areas of finance, this course offers three pathways of study – Banking, Investment Management or Finance.

- The Banking pathway explores the role, structure, function and regulation of banks and the banking sector. It offers the opportunity to gain key skills that could help to develop a career in the banking sector.
- The Investment Management pathway focuses on asset pricing and investment management. It allows you to get hands-on experience of some of the leading software and data packages used by financial services professionals, such as Bloomberg and Thomson Reuters Eikon.
- The Finance pathway, allows for a broader perspective on finance. It includes modules on institutional investments and financial statement analysis, as well as the growing area of behavioural finance. It allows you to explore how to interpret, evaluate, and communicate financial information within real business situations.

Across all three pathways, you will be taught by staff with real-world experience as finance professionals, alongside research-active academics exploring some of the key topics facing the finance industry today. With a focus on practical integration between theory and practice, our Finance MSc should prepare you for a rewarding career in a variety of roles across the finance sector.

FinTech MSc addresses the technology driving financial markets, which is becoming ever more innovative and dynamic. Our course is designed to help you gain the theoretical grounding and practical skills you need to pursue a career in this rapidly growing sector, or to work effectively in other financial sectors being disrupted by technology. The course offers hands-on training in big data analytics and data mining, using Python and/or R data languages.

Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.

This course content is correct at the time of going to print. We regularly review our course content to keep it relevant and current for the benefit of our students. For these reasons, course modules and entry requirements may be updated. 2021 course web pages start to go live autumn 2020.
Economics, Finance and Accounting (continued)

International Business Economics MSc is designed to bring you up to speed with the main challenges facing businesses. It focuses on practical economic analysis, policy formulation and market efficiency in a real-world context. Upon successful completion, it helps you develop into a highly qualified economist with a range of analytical and technical skills, equipping you to cope with the complexities of the modern world.

Professional Accountancy MSc aims to bridge the gap between an accountancy degree and the workplace, giving you a chance to develop strategic knowledge, critical thinking, and skills in an international accounting context. Alongside a master’s degree, the course prepares you for the Strategic Professional qualification of the world’s leading body for accountants, the Association of Chartered Certified Accountants.

Facilities
When studying an economics, finance or accounting course at Coventry Business School, you will have access to our Trading Floor, currently one of the largest academic trading floors in Europe. Consisting of 42 dual-screen Bloomberg terminals, it allows you to gain hands-on experience of trading stocks and shares using various industry-standard tools such as Thomson Reuters Eikon and Bloomberg, with the chance to also gain professional certifications alongside your studies. Exposure to industry-standard technology, experienced in a modern facility, could strengthen your employability in the financial or banking industries.

www.coventry.ac.uk/trading-floor

Links with industry and professional bodies
We currently maintain professional accreditations and memberships with a number of leading professional bodies. This includes the Chartered Insurance Institute, of which our Accounting and Financial Management MSc is an accredited course, and the Chartered Financial Advisor Institute. These links help us ensure our courses remain relevant to industry and to the sectors where our graduates seek employment.

Currently in partnership with the Chartered Management Institute (CMI), most courses incorporate a mandatory Professional Development module which, upon successful completion, should give you an additional accreditation and qualification and many other benefits.

www.coventry.ac.uk/globalprofdev

Employability
Our courses are designed with employability in mind. They aim to teach you relevant skills and knowledge that may be useful beyond the classroom, with a focus on applying theory to practical, professional situations. While not guaranteed, our Accounting and Financial Management MSc, Finance MSc and FinTech MSc courses give you the option to apply for a professional experience placement (subject to competitive application, availability, possible visa requirements and additional costs may apply). This would extend your course by up to a year and, upon successful completion, allow you to graduate having further developed your practical skills in the highly competitive investment and financial management industries.

In addition, our dedicated employment and work-placement advisors offer you support in securing work-placements or future roles, through contacts with relevant companies at a local, national and international level. You’ll also have opportunities to gain work experience with local and national organisations (subject to availability, application process, possible visa requirements and fees may apply), as part of the final semester of your course.

Why Marketing, Human Resources and Sport and Events at Coventry?
Marketing is present in almost every exchange of goods and services, and so plays a crucial part in our everyday lives. Our marketing courses all focus on providing a broad understanding of this important discipline. Importantly however, they also allow you to specialise in a specific area, such as advertising, digital marketing, brand management or marketing management in an international context.

Human resource management (HRM) is the business discipline that deals with helping organisations get the most out of their people – from hiring the best staff to developing current staff and managing performance. If you successfully complete this degree, it can lead to a rewarding HRM career in many sectors or industries.

The sport and events sectors have become very important to the global economy. The aim of our courses in these areas are to prepare you for your future career with specialist knowledge, as well as the exploration of a variety of business topics and how they can be applied to the sport and events industries.

Advertising and Marketing MA focuses on the creative aspects of marketing communications, covering the skills required within the advertising sector. The course aims to help you to develop your ability to mix creativity with business acumen, giving you the chance to put marketing theories into advertising strategies.

Brand Management MA aims to allow you to explore how a powerful brand is vital for businesses to differentiate and succeed in the global marketplace. This course gives you the opportunity to develop your knowledge in areas including luxury branding, brand research and crisis management, to help you build the skills needed to be a professional brand manager.

Digital Marketing Management MSc is concerned with exploring how an evolving digital landscape has changed the way businesses connect and engage with their customers. This course gives you the opportunity to learn a mix of marketing and project management skills, as well as developing specialised digital marketing expertise.

Human Resource Management MA has been designed for those looking to pursue senior level careers within HRM and covers the theoretical knowledge and practical skills required by employers. The course allows you the chance to consider how business environments impact upon HRM, and how HRM can lead to greater productivity and better working lives.

Continued overpage
Marketing, Human Resources and Sport and Events (continued)

International Marketing Management MSc is for those aiming to pursue top-level careers within HRM and covers the theoretical knowledge and practical skills required by employers. The course allows you to consider how business environments impact upon HRM, and how HRM can lead to greater productivity and better working lives.

International Human Resource Management MSc is designed specifically for those who want to pursue HRM careers in the competitive global market. It covers many of the key skills you would require within the sector, with a focus on how they relate to a range of international business environments.

International Events Management MSc gives you the opportunity to explore the diverse and dynamic global events sector and to gain experience of major events. Students joining this course will be here during and after Coventry’s exciting year as UK City of Culture 2021.

Sport Management MSc aims to help you acquire the skills to become a leader in your chosen area of the growing sport sector. Specialist modules focus on diverse areas such as sport sponsorship and the governance of sport, while offering strong industry links with a range of local and national organisations.

Facilities
You will primarily study in two buildings – the William Morris and Jaguar buildings – which have a range of bespoke teaching rooms, study spaces and social areas. For marketing students, you will have the opportunity to learn in our DigiComm Lab, which aims to recreate the atmosphere and experience of working for a contemporary marketing agency. In the DigiComm Lab, we have the latest industry software, such as Adobe Creative Suite, which allows you to put theory into practice through the production of marketing campaigns, or to work with others to visualise creative ideas.

Employability
Our courses are designed with employability in mind, teaching relevant skills and knowledge that are useful beyond the classroom, with a focus on applying theory to practical, work-based situations. While not guaranteed, a number of our courses give you the option to apply for a professional experience placement*, which would extend your course by up to a year and allow you to graduate having further developed your practical business skills.

For our sport management and event management students, we also have strong links with local events firms, such as Phoenix Events, which aim to provide priority involvement for you to help run events such as the Coventry Festival of Running and Coventry Comedy Festival.

Links with industry and professional bodies
Our courses have been designed to meet the needs of students and industry, which is reflected in our long-established links with business organisations. Through a mixture of talks, visits and work-placements*, previous students can put theory into practice and experience numerous opportunities to develop their local, national and international networks.

Our marketing courses are accredited by the Chartered Institute of Marketing (CIM), as part of the Graduate Gateway scheme, which gives you the opportunity to gain exemptions from certain modules of professional qualifications (additional fees apply).

We are currently a Chartered Institute of Personnel and Development (CIPD) approved centre so, if you study HRM, you have an opportunity for CIPD qualifications (additional fees apply) alongside your degree.

Further information
Visit our website for detailed course information or see pages 139-140 for information about entry requirements and course fees.

*Please note we are unable to guarantee any placement/internships, work experience, industry, field trips or study abroad and international opportunities and that any such opportunities mentioned in this brochure may be subject to additional costs (e.g. travel, visas and accommodation etc.), competitive application, availability and/or meeting any applicable visa requirements. To ensure you fully understand the requirements in this regard, please contact the International Office for further details if you are an EU or international student.
Master of Business Administration (MBA)

Courses

Master of Business Administration (MBA)
FBLT026 www.coventry.ac.uk/coventry-mba

MBA (Artificial Intelligence)*
FBLT030 www.coventry.ac.uk/coventry-mba

MBA (Health Care Sector)*
FBLT034 www.coventry.ac.uk/coventry-mba

Duration: 1 year full-time.
Entry: As the university has three entry points during each year, please check course-specific entry points on the individual course web pages.

*Please note that the final award certificate for an MBA with a pathway option will still be Master of Business Administration and will not refer to the pathway studied. For more details, please refer to the course web page or contact us directly.

Why an MBA at Coventry Business School?
Our MBA, and the pathways from it, are designed to enhance your ability to respond to the needs of the modern world by thinking critically and strategically in seeking solutions to complex problems, helping you to work towards better career prospects and salary.

When you study with us, you can access expert staff from a range of backgrounds. You also have the opportunity to attend guest lectures given by speakers from industry, and can network with our alumni who work across a variety of sectors. Whether you are looking to develop your career, move into management or change career completely, our course, with its sector-specific pathway options, aims to help you succeed. Our MBA can also be studied 100% online, with a wider variety of pathways available. See page 136 for more details.

Our MBA has been developed for current or aspiring managers who wish to develop their careers. It allows you to gain the knowledge and skills required to progress to more advanced roles. The course covers three distinct but interconnected stages – the certificate, the diploma and the master’s stage. The master’s stage focuses on key management topics, such as project management, decision-making and risk, to allow you the opportunity to complete a comprehensive management qualification.

Our MBA (Artificial Intelligence) is designed to equip you with the skills and knowledge needed to manage the complexity that comes from an Artificial Intelligence (AI) driven world, focusing on AI technologies, their use in business management practices and the broader impact on companies and society.

During the certificate and diploma stages, you should gain a grounding in key management disciplines through modules shared across all of our MBA pathways, before specialising during the master’s stage of the course.

Our MBA (Health Care Sector) has been developed in recognition of the need to strengthen leadership and management within healthcare, social care and third sector organisations. It is aimed specifically at those who wish to develop their careers and take on higher leadership positions. You undertake modules across both Coventry Business School and the Faculty of Health and Life Sciences. We aim to give you access to experts in the disciplines of management, health and the relevant application of management to the healthcare sector. Delivered with a strong practitioner focus, the course places a strong emphasis on processes and practices that develop leadership, financial and project management skills within the healthcare sector.

Links with industry and professional bodies
Coventry Business School is currently an active member of the European Foundation for Management Development (EFMD) and the Chartered Association of Business Schools (CABS). This evidences our focus on delivering courses that, upon successful completion, can produce graduates equipped with the skills and knowledge that industry expects. Students studying the MBA (Health Care Sector) may also benefit from the numerous links to professional bodies and industry partners offered by the Faculty of Health and Life Sciences.

Employability
As well as offering careers support through dedicated employment and work-placement advisors, our MBA courses allow you direct access to expert teaching staff, with strong industry links. They also allow you the chance to grow your professional network through engaging with your peers, who will have a diverse range of backgrounds. You will also be able to tap in to our growing number of MBA alumni, who could be well-placed to offer advice and opportunities as you continue to develop your career.

Further information
Visit our website for detailed course information or see pages 139-140 for information about entry requirements and course fees.

By learning alongside a diverse cohort of other managers, as well as having access to a growing network of alumni, our MBA can help develop you into a strategic leader.
This course content is correct at the time of going to print. We regularly review our course content to keep it relevant and current for the benefit of our students. For these reasons, course modules and entry requirements may be updated. 2021 course web pages start to go live autumn 2020.

  FBLT087  [www.coventry.ac.uk/public-int-law-llm](www.coventry.ac.uk/public-int-law-llm)

Duration: 1 year full-time or up to 2 years with professional experience option. *2 years part-time available. **Various study duration options.

### Why study at Coventry Law School?

We have been teaching law at Coventry for more than 50 years and pride ourselves in providing friendly, accessible staff that can support you through your studies.

We offer a range of LLM courses, as follows, all of which have an international focus. You could find yourself learning about the latest developments in topics such as the regulation of international corporations, the laws governing the relationships between states or the rights attached to owning intellectual property.

We also offer a Financial Crime PgC, aimed at professionals in the financial and legal sectors. Our courses are designed to develop your legal knowledge and help you to specialise in your chosen field. They aim to provide in-depth, relevant content to help you acquire the specialist knowledge and research skills you'll need to embark on a legal career, study towards a PhD or work in other business sectors, such as non-governmental organisations.

**Financial Crime PgC**

is aimed at professionals working in the financial and legal sectors, and could equip you with the skills needed to tackle the increasingly complex methods used by financial criminals. Delivered through a range of workshops, which can be taken individually or built into modules towards a full PgC qualification, the course is designed to be flexible around your career, and is delivered at Coventry University London.

**International Commercial Law LLM** has been designed to challenge and cultivate your knowledge around international commercial law. It aims to expose you to the numerous contemporary issues that exist in the field, with recent world events highlighting the importance of a rules-based international order for trade and commerce. You will examine, amongst other topics, the obligations of buyers and sellers in commercial transactions, the rights attaching to ownership of goods and intellectual property, and the tax consequences that flow from commercial transactions.

**International Corporate Law LLM** provides you with the opportunity to gain knowledge and understanding of contemporary issues in the international corporate sphere. With the globalisation of business fuelled by the growth of e-commerce, there have been challenges posed to the regulation of corporations. Accordingly, in your first semester studies, you will get to consider the obligations owed by corporations to their employees and broader society. In contrast, your later study modules will focus on the obligations owed by corporations to their shareholders, markets and States.

**International Human Rights Law LLM** provides you with an opportunity to develop recognised expertise in emergent issues within the area of international human rights law. You will explore the social realities that inform how human rights law is applied. The course takes an interdisciplinary approach that will introduce you to both the international and regional protection of human rights. It offers you the chance to gain the necessary skills to understand the rules, systems, techniques, and practices of human rights.

---

“I’ve travelled quite a lot, met new people and made lots of friends from different cultures – which makes university life more enjoyable.”

Mahnoor Sultan

LLM Law
Law (continued)

Law LLM provides you with an opportunity to explore the area of complex legal frameworks and develop your knowledge around law, particularly in areas affected by international and comparative law. The course will introduce you to the relevant rules, values and institutions of comparative and international law. Following that, you get the chance to develop and challenge your knowledge through study topics including public international law, international human rights, commercial law, and corporate social responsibility.

Public International Law LLM provides you with the opportunity to develop legal expertise in the system of public international law. This focuses on the treaties, rules and conduct governing the relationship between states. We will approach public international law by looking at the foreign relations, ideas and substantive issues that shape its development. Initially, you will explore the frameworks and practices of public international law. You will then go on to engage with specific branches of public international law, to try and develop a deeper understanding of the inner workings of this field.

Employability
We strive to help you enter the job market with the kind of skills employers seek. We have dedicated employment and work-placement advisors on hand to offer support to all students and recent graduates, through one-to-one sessions, skills development workshops and employer networking events – subject to availability.

Three of our law courses also offer the option to extend your degree to up to two years with a professional experience placement, giving you the chance to gain practical skills and knowledge that could help you launch your career in law. Although not guaranteed, a professional experience opportunity can last for one, two or three semesters, providing you with the flexibility to seek experience from a wider range of employers. Professional experience placements are subject to availability, a competitive application process, possible visa requirements and fees may apply.

www.coventry.ac.uk/law-professional-experience-masters

Links with industry and professional bodies
As an LLM student, subject to availability, you will have opportunity to advance your knowledge through attendance at conferences, special guest seminars, and guest speakers, many of whom are drawn from industry.

Coventry Law School is currently a member of the International Association of Law Schools, which represents around 160 law schools around the world, and the European Law Faculties Association, which represents members across 49 European countries. Both of these memberships allow us to build strong international links, furthering the global focus of our courses.

Duration: 1 year full-time. 2 years with professional experience option.
Entry: As the university has three entry points during each year, please check course-specific entry points on the individual course web pages.

Why Computing and Data Science at Coventry?
We recognise the importance of developing a strong practical insight into the subject area of a degree, as well as a solid theoretical foundation. We aim to do this via an Activity-Led Learning (ALL) approach, cementing academic knowledge through exploration of practical, real-world examples taught individually and in groups.

Our blended learning methods are led and inspired by our active academic research in areas such as applied mathematics, advanced computing, big data, wireless sensing, serious games, robotics and energy harvesting. We offer a range of traditional master’s courses alongside courses in emerging and specialist areas such as data science and cyber security.

Computer Science MSc aims to expand your capability and expertise in computing or IT-related fields. The course focuses on the underpinnings of computer science and their practical applications in the latest technological developments. The course is designed and delivered with input from our industry contacts. Upon completion of the course, you should have acquired advanced skills and knowledge which could lead to roles such as a computer system designer, programmer, consultant or researcher.

Connected Autonomous Vehicle Systems MSc is designed to give students from software engineering, computer science and similar backgrounds, the critical skills to produce, upon successful course completion, robust and safe Automated Driving Systems (ADS) for use in Connected Autonomous Vehicle (CAV) applications. The course is intended for graduates with existing computer science-related specialisations or individuals with prior industrial experience who are looking to specialise or transition into the CAV sector. Coventry University’s current connection and delivery with HORIBA MIRA is a unique offering, distinguishing the course from others in the market.

Cyber Security MSc aims to provide you with a comprehensive and deep understanding of security principles, as well as the practical techniques used in solving security problems and addressing related issues. It is designed to equip you to work at a professional level and develop a range of industry-informed knowledge and skills in areas such as network security, secure design, cryptography, risk assessment, ethical hacking, digital forensics and incident response.

Data Science MSc is a conversion course for graduates, from a range of disciplines and backgrounds, looking to pursue a career, or upskill, in this rapidly developing field. Data scientists are in short supply and there is high demand for their skills across sectors including business, government, healthcare, science, finance and marketing. Data scientists combine, explore and analyse the huge volume of data collected every day to make it meaningful – including helping prevent fraud, identifying disease spread and predicting online purchasing behaviour.

Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.
Computing and Data Science (continued)

Data Science and Computational Intelligence MSc
aims to respond to the demand for data scientists who have the skills to develop innovative computational intelligence applications, capable of analysing large amounts of complex data to inform businesses decisions and market strategies. Multidisciplinary content covers: machine learning; neural networks; big data analysis; information retrieval; fuzzy systems; and evolutionary computation. You will also have opportunities to undertake practical projects, applying your learning to real-life problems in business, finance, security, industry control, engineering, natural language processing, information retrieval and bioinformatics.

Digital Technology for Business MSc aims to provide you with an understanding of the intermeshing of business and IT. It explores how IT is utilised for different aspects of business. This includes how organisations use IT to get a strategic or competitive advantage, and to optimise business performance. The course is designed to produce graduates with the technical and business skills required in a wide range of careers spanning both the IT and business fields. These areas include IT consulting, project management, software development, database administration and business consulting.

Management of Information Systems and Technology MSc is designed to build your skills and knowledge in key aspects of Information Systems (IS) and Information Technology (IT) management. The course provides a framework within which you have the opportunity to develop essential skills required by a wide range of industries both locally and globally. Examples of these are systems applications and products in data processing (SAP), enterprise resource planning (ERP), project management, AGILE, Scrum and PRINCE2.

Software Development MSc aims to equip you with the professional and technical skills needed to specify, design, develop and test modern software systems in a variety of contexts and organisational settings. The course is designed and delivered with input from our industry contacts. You will have the opportunity to learn how to construct and deliver software solutions either working with clients or on real-world case scenarios, which may lead to careers in software design and development.

Facilities
Facilities within our £50m Engineering and Computing building include a CISCO laboratory with certified support staff and a bespoke ‘ethical hacking’ lab, for exploring the skills of security analysis and penetration testing.

Our new £25m Beatrice Shilling building includes a gaming and virtual reality studio, a specialist area for 3D printing and rapid prototyping, a laser facility, physics and electronics labs and specialist PC labs.

In addition to this, an award-winning mathematics and statistics support team, sigma, is based in the Maths and Stats Support Centre in the library. It provides free, drop-in assistance on-site, or virtually via its website that also offers hour-long online individual appointments – useful if you’re collecting and analysing project data.

www.coventry.ac.uk/sigma

Links with industry and professional bodies
Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.

In partnership with the Chartered Management Institute (CMI), many courses in this subject area incorporate a mandatory professional development module which, upon successful completion, can give you an additional accreditation and qualification.

www.coventry.ac.uk/professional-development

Employability
We aim to provide you with a comprehensive package of career support. With employability embedded into the curriculum, we work with key industrial partners, such as TATA Technologies, GE Aviation and Intel, and offer a wide range of employer initiatives with the aim of helping you to secure the right graduate role. Some of our courses offer a work-placement pathway, enabling you to apply for an optional 12-month work-placement module, extending the duration of your master’s to 24 months. Work-placements are not guaranteed and are subject to availability, application process, possible visa requirements and additional fees may apply.

Structural Engineering MSc* 3,4,5,6,7 (Option for professional experience)
EECT012 www.coventry.ac.uk/structural-eng-msc

*2 years part-time available.

Why Construction and Civil Engineering at Coventry?
These courses focus on developing employability for the construction and civil engineering industries. As testimony to the quality of teaching, we were ranked 1st in the UK for Building and Town and Country Planning by the Guardian University Guide 2021.

Civil Engineering MSc is designed to develop your high-level knowledge and wide-ranging understanding of the planning, design, construction and operation of civil engineering works. The course explores traditional and innovative practices behind iconic constructions such as Wembley stadium. It also aims to provide you with practical knowledge and innovative strides applicable to strategic management of construction and engineering projects. This includes the relevant importance of Building Information Modelling (BIM) in construction project management. Civil Engineering MSc is offered to graduates of relevant accredited Civil Engineering and cognate science/engineering courses seeking a professional qualification as Chartered Engineers.

Civil Engineering (Technical Route) MSc is a highly practical course delivered with input from industry to help you establish or advance your career in construction. It is available to holders of an overseas bachelor’s degree or a UK bachelor’s degree, accredited as the educational base for an Incorporated Engineer (IEng), for example, a BSc in Civil Engineering or cognate science/engineering disciplines, for those seeking a professional qualification as Chartered Engineers through a “Technical Route”.

Construction Management with BIM MSc is designed to have a wide appeal – for architects, engineers, surveyors, construction managers, facilities managers, legal practitioners or any construction professional seeking a management career in the industry. Accredited by the Chartered Institute of Builders (CIob), our industry-focused course contains Building Information Modelling (BIM) and has been developed in conjunction with employers. This course can be studied part-time or online if you are already working in construction.

Construction Project and Cost Management MSc focuses on developing the core skills and competencies identified by the professional bodies for roles as construction project managers, cost managers and quantity surveyors. Accredited by both the Royal Institution of Chartered Surveyors (RICS) and Chartered Institute of Building (CIob), this practice-led course aims to prepare you to embark on or advance your career in one of the largest and most influential industries in the world today.

Structural Engineering MSc is offered to UK and overseas civil engineering and cognate science/engineering graduates wishing to specialise in structural engineering. This course is designed to provide advanced analytical and professional skills. These skills could be applied across a number of disciplines, including planning, design and operational areas of timber, steel, concrete, sustainable composite and lightweight materials and structures. Some of our previous graduates have gone on to work for international engineering firms as structural and civil engineers.

Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.

This course content is correct at the time of going to print. We regularly review our course content, to keep it relevant and current for the benefit of our students. For these reasons, course modules and entry requirements may be updated. 2021 course web pages start to go live autumn 2020.
Facilities
Laboratory work is a core aspect of our courses and we aim to enable you to develop a range of practical skills. For example, civil engineering and building workshops could see you using hydraulics, building structures or testing tension in building materials. You’ll have opportunities to join a wide range of UK and international field trips, so that you can learn “in the field” and replicate industry practice.

You will also have access to our Simulation Centre, which uses immersive technology to recreate environments with a 120° curved, 10-metre projection screen and a 30-square metre activity space. The Simulation Centre also features an observation deck and activity hubs, with audio and video recording capabilities enabling replays and feedback. It’s an incredible space where you can practise techniques and responses to realistic scenarios, subject to availability.

Links with industry and professional bodies
Relevant professional bodies currently accredit many of our courses, including the Energy Institute, the Institution of Civil Engineers, the Institution of Structural Engineers, the Chartered Institute of Architectural Technologists, the Royal Institution of Chartered Surveyors, the Chartered Institute of Building and the Chartered Institute of Building Services Engineers. This means that our courses aim to offer the standard of teaching that employers expect and should help you to gain the skills you’ll need for a successful career.

We also have excellent links with employers like Arup, Arcadis, Atkins, Balfour Beatty, BAM, Buro Happold, CGL, Galliford Try, Geotechnics Ltd, Interserve, Kier, Laing O’Rourke, Morgan Sindall, Mott MacDonald, Severn Trent Water, Warwickshire County Council and Willmott Dixon.

Currently in partnership with the Chartered Management Institute (CMI), most courses incorporate a mandatory Professional Development module which, upon successful completion, can give you an additional accreditation and qualification. Visit the website for further details.

www.coventry.ac.uk/globalprofdev

Employability
We provide a comprehensive package of career support. With employability embedded into the curriculum, we work with key industrial partners and offer a dedicated careers fair that attracts a wide range of employers, subject to availability.

Some of our courses offer a work-placement pathway, enabling you to apply for an optional 12-month work-placement module, extending the duration of your master’s to 24 months. Work-placements are subject to availability, application process, possible visa requirements and fees may apply – and these are not guaranteed. Visit the website for further details.

www.coventry.ac.uk/masters-work-placement

Further information
Visit our website for detailed course information or see pages 139-140 for information about entry requirements and course fees.

Visit our website for detailed course information or see pages 139-140 for information about entry requirements and course fees.

*Please note that we are unable to guarantee any placement/internships, work experience, industry, field trips or study abroad and international opportunities and that any such opportunities referred to in this brochure may be subject to additional costs (e.g. travel, visas and accommodation etc.), competitive application, availability and/or meeting any applicable visa requirements. To ensure that you fully understand the requirements in this regard, please contact the International Office for further details if you are an EU or International student.

(Option for professional experience)
ECT040 www.coventry.ac.uk/microelectronics-msc

Duration: 1 year full-time. 2 years with professional experience option.
Entry: As the university has three entry points during each year, please check course-specific entry points on the individual course web pages.

Why Electrical and Electronic Engineering at Coventry?

Courses in this area aim to help you develop a strong practical insight into your chosen subject alongside a solid theoretical foundation. We look to achieve this through an Activity-Led Learning (ALL) approach, where academic knowledge is cemented with practical real-world examples, which you can explore on your own and in groups.

Our blended learning methods are led and inspired by our active academic research across a range of electrical and electronic engineering disciplines.

Electrical and Electronic Engineering MSc

encompasses theoretical and practical subjects within the broad area of electrical and electronic engineering, as used by industries as diverse as aerospace and automotive, chemical and construction. You will have the opportunity to develop practical skills and theoretical knowledge in a range of electronics fields. These include digital systems, image and signal processing, robotics and sensors, together with electrical systems such as renewable energy, smart grids, embedded microcontrollers, electrical machines and power generation. This accredited master’s is designed to follow the Engineering Council UK-SPEC standard.

Electrical Automotive Engineering MSc aims to provide the expertise required to meet the modern transportation market demands. Carefully planned, it consists of a balanced mix between electric power, electronics and communications. Climate change and the consequent need to reduce CO₂ emissions has progressively led to major advances in many modern developments of power engineering such as in photovoltaics, wind turbines and biofuels. Our vision is to create experienced and specialised engineers who will be highly sought after by the electrical automotive engineering market.

Embedded Systems Engineering MSc aims to prepare you for careers both within and outside of engineering that rely on the rapidly developing, high-speed technology of embedded microelectronics and wireless systems. This includes a focus on real-time applications, such as mobile communications and wireless sensing. Course content is regularly updated to reflect emerging trends and knowledge fields which aims to enrich your technical and transferable skills, often drawing on our own research findings.

Facilities
Our electronics labs are equipped with a range of test and measurement equipment. There are various development boards for embedded electronics and a variety of interface applications such as different microcontrollers, GSM, Ethernet and numerous communications and motor solutions.

We provide the latest facilities for the design, simulation verification and prototyping of circuits and software. This includes PCB milling facilities, a 3D printer, educational DC machines for different types of motors and generators and a range of test equipment. Our new £25m Beatrice Shilling building also includes a range of unique spaces, such as a gaming and virtual reality studio, a specialist area for 3D printing and rapid prototyping, a laser facility, and physics and electronics laboratories.

In addition to this, an award-winning mathematics and statistics support team, sigma, is based in the Maths and Stats Support Centre in the library. It provides free, drop-in assistance on-site, or virtually via its website that also offers hour-long online individual appointments – useful if you’re collecting and analysing project data. www.coventry.ac.uk/sigma

**Courses**

**Oil and Gas Engineering MSc**
(Option for professional experience)
ECT096 www.coventry.ac.uk/oil-gas-eng-msc

**Oil and Gas Management MSc**
(Option for professional experience)
ECT097 www.coventry.ac.uk/oil-gas-mgt-msc

**Petroleum and Environmental Technology MSc**
(Option for professional experience)
ECT098 www.coventry.ac.uk/petroleum-msc

**Renewable Energy Engineering MSc**
(Option for professional experience)
ECT099 www.coventry.ac.uk/renewable-energy-msc

**Why Energy, Oil and Gas at Coventry?**

With emerging superpowers, China and India, competing for a larger share of global energy resources, more countries are now looking to develop their own natural resources. At the same time, the renewable energy industry continues to grow rapidly as it looks to tackle the catastrophic issues posed by climate change. This has led to increased demand for highly skilled professionals and managers in the rapidly expanding energy sector.

**Oil and Gas Engineering MSc** is designed and delivered in collaboration with experienced industry professionals. It enables you to become a student member of the Society of Petroleum Engineers (SPE), European Association of Geoscientists and Engineers (EAGE) and Institute of Mechanical Engineers (IME). The course aims to equip you with the sector-specific knowledge and skills you need to succeed in the competitive, ever-evolving energy industry. You can study engineering theory, technology, systems and practice associated with the full oil and gas lifecycle. You will also examine upstream, midstream and downstream operations from exploration and production, right through to refining and marketing.

**Oil and Gas Management MSc** has been developed in collaboration with the industry, with input from SPE International, Cuadrilla Resources Ltd, Petronall Ltd and Subsea Engineering News, who sit on our Industry Advisory Board. This accredited master’s has been designed specifically with the aim of building management capacity within the petroleum industry. This course will demonstrate the complexities of management within the extractive industry and should help you to gain a strong understanding of the interconnections between the different value chains within the oil and gas industry. This course aims to help you prepare for working with a wide range of potential employers, including national and multinational energy companies, consultancies, energy ministries and international agencies.

**Petroleum and Environmental Technology MSc** aims to develop your comprehensive understanding of the technical operation of the petroleum industry, together with some of the sector’s most important environmental issues – such as oil spillages, climate change and renewable energies. Depending on your interests or career aspirations, you will have the opportunity to tailor your studies by choosing from a range of modules on topics such as the impacts of petroleum exploration and production, environmental monitoring, wastewater treatment processes, and laboratory etiquette. Upon successful completion, this MSc gives you the opportunity to graduate as an oil and gas specialist with an environmental bias, much valued by potential employers.

**Renewable Energy Engineering MSc** could help you support the renewable energy industry as it enjoys rapid growth. The course provides opportunities to develop and critically analyse technologies and applications for renewable heat, power and transportation. You will have the chance to learn how to apply your engineering knowledge to address the requirement for cost-effective carbon reduction solutions and appraise the global socio-economic challenges associated with renewable energy. Through the exploration of current and emerging technologies and applications for renewable energy, the course aims to prepare you to make significant contributions to your profession, the economy and society.

Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.

This course content is correct at the time of going to print. We regularly review our course content to keep it relevant and current for the benefit of our students. For these reasons, course modules and entry requirements may be updated. 2021 course web pages start to go live autumn 2020.
Energy, Oil and Gas (continued)

Facilities
Laboratory work is a core aspect of our courses and you’ll have the chance to develop a range of practical skills. Teaching will take place in the university’s £50m Engineering and Computing building with modern equipment and student facilities, including wind tunnels and a solar simulator. You will also have the opportunity to access sector-leading software used by over 500 international oil and gas companies across the world, such as standard Petrel and ECLIPSE reservoir simulation software worth US$12.5m (donated by Schlumberger), Petex Integrated Product Modelling (IPM) software worth over £1m (donated by Petex), Weatherford’s ParSystem and WellFlo, Honeywell’s UniSims Design Suite and IHS Kingdom GeoSyn.

Links with industry and professional bodies
We aim to provide opportunities for you to hear from professionals and practitioners, who will share their experiences and challenges – subject to availability. Past speakers have covered topics such as ‘Oil and Gas Discovery, Development and Demise’ and ‘The Shale Gas Revolution’. Speakers have included a range of experts, including a former Vice President, from companies such as Schlumberger, Statoil and British Petroleum.

You could also benefit from field trips and visits to national and international workshops and conferences run by professional bodies. Past visits have included the International Petroleum Conference and Exhibition in the United Arab Emirates, and the Society of Petroleum Engineers (SPE) Intelligent Energy Conference here in the UK. Some field trips are subject to availability, application process and possible visa requirements. Fees may apply.

In partnership with the Chartered Management Institute (CMI), most courses incorporate a mandatory Professional Development module which, upon successful completion, can give you an additional accreditation and qualification. Visit the website for further details.
www.coventry.ac.uk/professional-development

Employability
You will have the opportunity to access a really comprehensive package of career support. With employability embedded into the curriculum, we work with key industrial partners and usually offer a dedicated careers fair each year which attracts a wide range of employers.

Some of our courses offer a work-placement pathway, enabling you to apply for an optional 12-month work-placement module, extending the duration of your master’s to 24 months. These placements are not guaranteed and are subject to availability, application process, possible visa requirements and fees may apply. Visit the website for further details.

Further information
Visit our website for detailed course information or see pages 139-140 for information about entry requirements and course fees.
Advanced Supply Chain Management MSc aims to appeal to you if you seek a course that focuses on future digital technologies and their application to supply chain management. It has been designed to reflect emerging trends in the sector and how they are applied to optimise the supply chain and gain a competitive advantage. The course focuses strongly on supply chain design, modeling, simulation and optimisation. It also explores the application of linked digital technologies which enable the design of localised, intelligent, reactive, flexible and customised asset-efficient supply chains.

Air Transport Management MSc capitalises on our extensive links with airlines, aircraft manufacturers and airports in the UK, Ireland and overseas. This accredited course aims to provide you with an advanced study of air transport organisations globally, how they are managed and the changing external environment in which they operate. Ideal for those seeking leadership positions in all areas of the airline, airport and the wider air transport industry, from planning and marketing, to logistics, operations and scheduling. Successful completion of this course can set you on the path to achieving membership of the Chartered Institute of Logistics and Transport (CILT).

Engineering Management MSc is designed to help you prepare to begin or advance your career as a leader within an ever-changing, competitive international engineering environment. Through a blend of carefully selected management and technical learning opportunities, we aim to introduce you to key aspects and challenges of managing a company across a wide range of sectors. This should enable you to develop an integrated understanding of strategic and operational management.

Engineering Project Management MSc is designed for graduates and professionals who have already acquired expertise in their field of engineering. You may now want the opportunity to develop engineering project management skills to provide leadership and contribute to successful project deliveries. This accredited course has been specifically developed with feedback from our industry partners.
Human Factors in Aviation MSc is a specialist distance-learning course. It aims to equip aviation professionals with a thorough appreciation of all aspects of the discipline and how to apply that knowledge to best effect in the aviation industry. The course covers the theoretical basis for the study of human factors in aviation, demonstrating how these concepts are applied in aspects of aviation operations. Throughout the modules, you are encouraged to apply the theoretical material to real-world issues within the aviation industry, as human factors practitioners would.

Supply Chain Management and Logistics MSc addresses the growing demand from organisations for highly trained individuals who are capable of developing diverse, bespoke and innovative supply chain and logistical solutions. Competition and the globalisation of supply markets are redefining how modern supply chains and logistics are managed. We have developed this course in collaboration with industry partners. It aims to develop your knowledge, skills and capabilities in the key areas of strategic supply chain management, logistics, sourcing, procurement, contracts, ecommerce, forecasting and environmental management.

Facilities
Study in this area offers opportunities to access outstanding facilities and study areas within our £50m Engineering and Computing building. You will also have access to our new £25m Beatrice Shilling building which opened in 2020. The building includes a range of study areas, labs and collaborative teaching rooms.

As well as our faculty facility, we are also home to the UK’s first ‘Faculty on the Factory Floor’, the £32m Institute for Advanced Manufacturing and Engineering (AME) based at the Unipart Powertrain Applications company site in Coventry.

In addition to this, an award-winning mathematics and statistics support team, sigma, is based in the Maths and Stats Support Centre in the library. It provides free, drop-in assistance on-site, or virtually via its website that also offers hour-long online individual appointments. [www.coventry.ac.uk/sigma](http://www.coventry.ac.uk/sigma)

Links with industry and professional bodies
Delivering industrially and commercially relevant courses can positively impact your graduate employability, and we embed this within our course design.

Many of our courses are accredited by professional bodies such as the Chartered Institute of Logistics and Transport (CILT), the Association for Project Management (APM) and the European Association for Aviation Psychology (EAAP).

Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.

Employability
We are strongly focused on preparing our students for their first professional graduate roles or career progression. You will have the opportunity to access a comprehensive package of career support. Our students and graduates may have the opportunity to benefit significantly from our industrial and strategic partnerships with companies such as Emirates, Jaguar Land Rover, Airbus, Rolls Royce, Unipart and Birmingham International Airport.

Some of our courses offer a work-placement pathway, enabling you to apply for an optional 12-month work-placement module, extending the duration of your master’s to 24 months. These placements are not guaranteed and are subject to availability, application process, possible visa requirements and fees may apply. Visit the website for further details. [www.coventry.ac.uk/masters-work-placement](http://www.coventry.ac.uk/masters-work-placement)

Further information
Visit our website for detailed course information or see pages 139-140 for information about entry requirements and course fees.

### Why Environment at Coventry?

Courses within this subject area focus on disciplines that can lead to employability within the environmental, disaster management, crowd safety and emergency management sectors.

Coventry University was the first UK university to establish courses in disaster management and emergency planning more than 20 years ago. We are a leading provider of higher education courses and consultancy services in emergency and disaster management capabilities. We have more than 25 years of alumni who sit in top positions in organisational resilience across the world.

We also have a range of Postgraduate Certificate courses available in these subject areas. Some offer the opportunity to progress from PGCert to a full MSc, taking into account the credits already achieved. Please visit our website to view the full list of available courses and for further information.

---

**Agroecology, Water and Food Sovereignty MSc**

Tackles issues related to food production, access and management of natural resources, climate change and land degradation, and the environmental, socio-economic and institutional implications in the building of resilient societies. You will find it has a strong focus on resilient food and water systems. These are critically analysed under environmental, socio-economic and political lenses to reflect the broad range of food and water sovereignty issues and how agroecology can alleviate them.

**Crowded Places and Public Safety Management MSc**

Addresses the increasing challenges of keeping people safe as mass gatherings grow in both scale and complexity. These events range from international sporting events and concerts to world-class retail and transport hubs. This course aims to provide the academic underpinning to analyse the features that make for best practice planning, policy and process, to enable you to devise effective crowded places arrangements of your own. The course aims to support the development of your skills in problem-solving, teamwork and leadership, project management and communication, all of which are qualities employers demand.

**Disaster Management and Resilience MSc**

Is a specialist course encompassing up-to-date thinking in disaster theory, management policy, strategy and practice. It is ideal if you are interested in a career focused on disaster intervention or if you are a current practitioner who wants to update their knowledge in disaster management, humanitarian assistance, capacity building and disaster risk reduction. This postgraduate course covers the advanced research skills, knowledge and management expertise. On successful completion of the course, you should be able to deal effectively with future disasters, encouraging you to adopt a strategic and holistic perspective.

---

Coventry University was the first UK university to establish courses in disaster management and emergency planning, more than 20 years ago.
Emergency Management and Resilience MSc
is designed to enable you to develop the necessary
knowledge and practical skills you need to identify,
critically analyse, assess and successfully manage
a range of emergencies. You can learn how to
operate confidently in policy development, strategy
implementation, and response and recovery
management. The course also aims to provide you with
an understanding of the issues and problems faced by
emergency planning and management practitioners,
such as multi-agency cooperation and coordination.

Sustainability and Environmental Management
MSc aims to equip you with a range of knowledge,
skills and experience integral to becoming a sustainability
and environmental professional. The course focuses
on the environmental, technological, political and social
issues associated with environmental management and
sustainability issues that face organisations. Demand
for sustainability practitioners is growing and is likely to
continue to grow. You will be guided in development
planning and reflective practice as a current or future
leader, with a focus on influencing and managing change
in your team, organisation and the sector more widely.

Facilities
Our Simulation Centre uses immersive technology to
recreate environments with a 120° curved, 10-metre
projection screen and 30-square-metre activity space.
The Simulation Centre also features an observation
deck and activity hubs, with audio and video recording
capabilities enabling replays and feedback. It’s an
incredible space where you can practise techniques and
responses to realistic scenarios.

You will get opportunities to join a range of field trips in
the UK and overseas, to learn ‘in the field’ and replicate
industry practice. Some trips are subject to availability,
application process, possible visa requirements and fees
may apply.

Links with industry and professional bodies
We have extensive industry links, including the Foreign
and Commonwealth Office, Asia Disaster Preparedness
Centre, Oxfam, Lloyd’s Register, Environment Agency,
Forestry Commission, Severn Trent, Atkins and more.

In partnership with the Chartered Management Institute
(CMI), most courses include a mandatory Professional
Development module, which upon successful
completion, can give you a further accreditation
and qualification. Visit the website for further details.
www.coventry.ac.uk/globalprofdev

Employability
You will have the opportunity to access a comprehensive
package of career support. With employability embedded
into the curriculum, we work with key industrial partners
and usually offer a dedicated careers fair each year that
attracts a wide range of employers. Some of our courses
offer a work-placement pathway, enabling you to apply
for an optional 12-month work-placement module,
extending the duration of your master’s to 24 months.
Work-placements are not guaranteed and are subject to
availability, application process, possible visa requirements
and fees may apply. Visit the website for further details.

#### Why Mechanical, Aerospace and Automotive Engineering at Coventry?

We deliver an extensive portfolio of engineering master’s courses and command a global reputation for teaching, student experience and research.

By delivering expert education informed by research, we aim to empower our graduates as future global engineering and management professionals.

Current examples of research in mechanical, aerospace and automotive engineering include kinetic energy recovery systems (KERS); hybrid powertrain; autonomous vehicle and drone technology; human factors in aviation and multi-phase flow for oil and gas extraction.

#### Advanced Mechanical Engineering MSc

Aims to produce postgraduates with the versatility and depth of understanding needed to deal with new and unusual challenges in mechanical engineering, alongside the necessary imagination and creativity to innovate. The course is informed by our commercial and academic research in areas such as vehicle dynamics, light weighting, advanced simulation and future concepts. Our collaborative links with industry means we can usually facilitate a programme of guest speakers who will share their knowledge of technological advances, issues and trends. These will give students opportunities to engage with companies on ‘live’ collaborative projects – subject to availability.

#### Aerospace Engineering MSc

Is designed to expand your knowledge and expertise in aerospace and aeronautical engineering. The course aims to include subjects such as computer-aided engineering, advanced engineering simulation and emerging advanced aircraft technologies like unmanned air vehicles, commonly known as drones. The work you can undertake on this course is designed to provide you with the demonstrable expertise and skills you will need for professional-level employment in the highly demanding aviation and aerospace industries.

#### Automotive Engineering MSc

Aims to provide you with technical and managerial skills that are highly sought after by the automotive industry, as well as to equip you with the know-how to design and test vehicles that are more fuel efficient, refined and safe. We aim to study the design, performance and operation of automotive powertrains and vehicle systems, examining individual components and entire vehicles. This could lead to a career as an automotive engineering specialist in a wide range of engineering, manufacturing, and service organisations.

#### Control, Automation and Artificial Intelligence MSc

Is designed for engineering or science graduates who may wish to specialise in control systems engineering, and for practising engineers looking to stay abreast of advances and developments. The course covers three specialist pathways within the field of control systems engineering, which feature a balance between theoretical and practical content. The course aims to help you develop skills that would be beneficial in most fields of engineering: automotive, aviation, automation, power and energy, the process industry including oil and gas, food and drink, the pharmaceutical industry and many others.

Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.
Production Engineering and Operations Management MSc aims to help you pursue a managerial role in factory operations. There is a growing demand for highly trained individuals with skills and expertise across engineering, business and management. This accredited master’s course is designed to meet that need, with the aim of developing multidisciplinary production engineers capable of designing lean and competitive manufacturing facilities and delivering operational excellence.

Facilities

Studying in this area offers opportunities to access outstanding facilities within our £50m Engineering and Computing building. Our innovative Activity-Led Learning (ALL) approach is designed to allow you to gain hands-on experience with specialist equipment.

We have a Mercedes Petronas AMG wind tunnel, Computer Numerical Control (CNC) manufacturing facility incorporating a 3D-printing suite, an industry-standard engine test cell, our inspirational Harrier jump jet and aircraft simulation suite, an automotive simulation suite which houses industry-standard equipment such as our Cruden F1 vehicle simulator, alongside a wide range of traditional, experimental and manufacturing equipment.

In addition to our faculty facility, we are home to the UK’s first “Faculty on the Factory Floor”, the £32m Institute for Advanced Manufacturing and Engineering (AME) based at the Unipart Powertrain Applications company site in Coventry.

Links with industry and professional bodies

We aim to deliver industrially and commercially relevant courses, as this can positively impact your graduate employability. Many of our courses are accredited by professional bodies such as the Institution of Engineering (IET) and the internationally renowned Royal Aeronautical Society (RAeS).

Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.

In partnership with the Chartered Management Institute (CMI), many courses in this subject area incorporate a mandatory professional development module, which upon successful completion can give you an additional accreditation and qualification as well as other benefits. Visit the website for further details.

www.coventry.ac.uk/professional-development

Employability

We are strongly focused on preparing our students for their first professional graduate roles and subsequent careers. You will have the opportunity to access a comprehensive package of career support. In addition, our students and graduates may have the opportunity to benefit significantly from our industrial and strategic relationships with companies such as Emirates, Jaguar Land Rover, Airbus, Rolls Royce, Unipart and Birmingham International Airport.

Some of our courses offer a work-placement pathway, enabling you to apply for an optional 12-month work-placement module, extending the duration of your master’s to 24 months. Work-placements are not guaranteed and are subject to availability, application process, possible visa requirements and fees may apply. Visit the website for further details.

www.coventry.ac.uk/masters-work-placement

Further information

Visit our website for detailed course information or see pages 139-140 for information about entry requirements and course fees.
Biomedical Science MSc is accredited by the Institute of Biomedical Science (IBMS). This course offers postgraduate training in selected disciplines – Haematology and Blood Transfusion Science, Clinical Biochemistry and Immunology, and Infection Science. You will have the opportunity to advance your skills in laboratory management as well as genomics and stem cell technology.

Biotechnology MSc expands your knowledge of the molecular, biochemical, cell biological and genetic techniques used across a wide range of products and services, from agriculture and environment to pharmaceuticals and healthcare. According to the National Centre for Biotechnology Information, biotechnology is predicted to be one of the most important applied sciences of the 21st Century and a key driver of the world economy.

Molecular Biology MSc is the study of the basis of life, focusing on the structure and function of DNA, RNA and protein, and their interactions with each other. Successful completion of this master’s course builds on your theoretical knowledge and competency in molecular laboratory techniques in health and disease, and synthetic biology.

Pharmacology and Drug Discovery MSc encompasses an emerging area of science known as ‘Translational Medicine’, a rapidly growing discipline in biomedical research which applies the knowledge from biology and clinical trials to techniques that address medical needs. The skills of professional pharmacologists are essential to speed up the critical task of translating laboratory medical research into commercially ready medical biotechnology and drugs that can be used to diagnose and treat patients.

Continued overpage

“Choosing a master’s with professional experience was the best decision I could have made. I gained new skills in a laboratory environment as well as in a desk-based role within the pharmaceutical industry.”

Victoria Korzhova
Pharmacology and Drug Discovery (With professional experience) MSc

Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.
Biological Sciences (continued)

Links with the industry and professional bodies
Many of our current staff have extensive professional experience and are members of the Institute of Biomedical Science (IBMS) and/or the Health and Care Professions Council (HCPC). We have close relationships with employers such as the National Health Service (NHS), Nemaura Pharmaceuticals and the food industry.

Professional experience
Our biological sciences with professional experience courses can provide you with real-life exposure through industry engagement, ‘live’ projects and actual case studies. Work-placements are a great way to gain practical experience to help further your employability. Previous students have had placements within pharmaceutical or NHS biomedical science testing laboratories, with opportunities both in the UK and abroad. Please note that professional experience opportunities are not guaranteed and may be subject to additional costs, application, meeting any applicable visa requirements and availability. Visit the website for further details. www.coventry.ac.uk/professional-development

Facilities
Our £59m Alison Gingell Building was opened in 2018. It is home to an extensive range of award-winning laboratory facilities where you can practise skills in microbiology, cell culture, molecular biology, genetics and biochemistry. Our super lab, Lab+, is capable of accommodating up to 250 students and is one of the largest educational laboratories in the UK.

Further information
Visit our website for detailed course information or see pages 139-140 for information about entry requirements and course fees.
Why Nursing, Midwifery and Health at Coventry?
The School of Nursing, Midwifery and Health delivers postgraduate and doctoral courses in healthcare practice, leadership and management. We were recently recognised as 7th in the UK for Nursing and Midwifery in the Guardian University Guide 2021.

Our master’s courses look to enhance and develop your knowledge, skills and expertise in health, to help you to develop your career and act as an innovator and leader in the field of nursing and healthcare in the 21st century.

These exciting courses will give you the opportunity to examine contemporary issues in healthcare through the analysis of political, social and economic influences on health. We are practice-led and our staff are committed to providing you with a learning environment that supports you on a journey of life-changing learning and exploration.

Advanced Clinical Practice MSc is aimed at healthcare practitioners who want to improve standards of practice across all aspects of healthcare provision. It has been created to meet the needs of practitioners who wish to be recognised as ‘Advanced Clinical Practitioners’. The course aims to develop your ability to enhance patient care, influence strategic direction and should help you to develop into an enquiring and reflective clinician. As well as having a General Advanced Clinical Practice route, the course also offers you a choice of pathways. These pathways enable you to focus on your own area of expertise, including Integrated Care, Urgent and Emergency Care, Generic, Mental Health, Musculoskeletal, Neonatal, and Children and Young People.

Critical Care Nursing PGCert is designed for qualified nurses wishing to specialise in Critical Care Nursing. It provides an opportunity to develop clinical skills in this specialist field of practice. You will develop your knowledge and skills of clinical decision-making in health assessment, treatments and therapies within the critical care environment, to independently lead and manage specialist care provision alongside other healthcare professionals. The course incorporates the National Competency Framework Step 3 Competencies for Critical Care Nurses as a core part of the assessment process to ensure that it is in aligned to National Standards for Critical Care Nurse Education.
Global Healthcare Management MSc is designed to draw on the expertise of health, social care and leadership and management from within the School of Nursing, Midwifery and Health. The course offers an opportunity for you to enhance your personal and professional attributes, the ability to think creatively and to apply entrepreneurial skills, in leading the delivery of quality health and social care services in response to global health challenges. This course can be further enhanced by choosing the extended programme with professional experience.

Nursing MSc is designed to offer continuing education and professional development to nurses who wish to enhance their knowledge to underpin practice in a wide range of care settings. You will examine contemporary issues in nursing, and in the role and practice of the nurse, through analysis of political, social, cultural and economic influences on health and social care needs and service design. Emphasis is given to the research and evidence base for leadership, service delivery and improvement.

Nursing MSc (Online) has been developed to meet the global need for postgraduate nursing skills. It is designed to enable a wide group of UK and internationally-based nurses with demanding workplace schedules to benefit from career development opportunities. The structure of this course is designed to allow for flexible study to fit around your life and we provide you with a dedicated support team to help with your study.

Public Health Nutrition MSc brings together the science of nutrition and the innovation of business with the aim of expanding your horizons beyond the more traditional approaches to public health nutrition. The increase in non-communicable diseases across the globe, including diabetes, cardiovascular disease, obesity and malnutrition is inextricably linked to poor diet. You will explore your understanding of nutrition and health and examine the research into public health policy at all levels.

Adolescent and Young Adult Cancer Care PGCert is an online course aimed at a wide range of health and social care professionals involved in cancer care for adolescents and young adults. It explores the complex social and political nature of cancer care, together with key issues such as adolescent development, societal perspectives and ethical challenges. This course is endorsed by, and has been developed in association with, the Teenage Cancer Trust.

MBA (Health Care Sector) is designed for current or aspiring managers who wish to develop their career in healthcare, social care and third sector organisations. It aims to provide the knowledge and skills required to progress to higher management and leadership roles. This course is taught in both Coventry Business School and the School of Nursing, Midwifery and Health at Coventry University.

Pre-registration masters courses in Nursing are designed for graduates in subjects other than Nursing who want to qualify as registered nurses with the Nursing and Midwifery Council. These courses offer the opportunity to qualify in a range of specialisms including Adult Nursing, Children and Young People’s Nursing, Learning Disabilities Nursing and Mental Health Nursing.

Links with industry and professional bodies
We work in partnership with professional bodies, employers and the health and social care sector. We are well connected locally, regionally, nationally and internationally – and we aim to provide you with the best possible opportunities. All of this is designed to give you the chance to graduate with the professional expertise and recognition you’ll need to work in healthcare professions. Many of our courses include a Professional Development module, in partnership with the Chartered Management Institute (CMI) which, upon successful completion, can give you an additional qualification. Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.

Facilities
Our £59m Alison Gingell Building opened in 2018. The facilities allow us to use people and technology to replicate real-life situations, giving you the opportunity to problem solve and build self-confidence as an advanced healthcare practitioner. Our fully-equipped ambulance, scrub area, hospital wards and adapted community houses feature assistive technology, allowing you to experience the full patient pathway – through clinical assessment, hospital treatment and rehabilitation.

Further information
Visit our website for detailed course information or see pages 139-140 for information about entry requirements and course fees.
Physiotherapy and Occupational Therapy

**Courses**

Advancing Physiotherapy Practice MSc
HLST210 [www.coventry.ac.uk/advancing-physio-msc](http://www.coventry.ac.uk/advancing-physio-msc)

Musculoskeletal Physiotherapy MSc
HLST246 (MACP pathway)
HLST246 (Non-MACP pathway)
[www.coventry.ac.uk/msk-physio-msc](http://www.coventry.ac.uk/msk-physio-msc)

Occupational Therapy (pre-registration) MSc
HLST241 [www.coventry.ac.uk/pre-reg-ot-msc](http://www.coventry.ac.uk/pre-reg-ot-msc)

Physiotherapy and Leadership (pre-registration) MSc
HLST242 [www.coventry.ac.uk/physio-leadership-msc](http://www.coventry.ac.uk/physio-leadership-msc)

**Why Physiotherapy and Occupational Therapy at Coventry?**

Our Advanced Practice master’s courses in physiotherapy have been specifically designed to widen your expertise and build it to a higher level. The aim is to develop your ability to allow you to potentially become a future leader and influencer and move into higher positions within your field of physiotherapy.

The pre-registration master’s courses in Physiotherapy and Occupational Therapy are designed for graduates in other subjects who wish to qualify as registered physiotherapists or occupational therapists with the Health and Care Professions Council.

**Advancing Physiotherapy Practice MSc** is focused on offering qualified physiotherapists the chance to develop your practice to a higher level. You will have the opportunity to develop your assessment, clinical reasoning and treatment skills in the three core areas of practice: cardiorespiratory, musculoskeletal and neurological physiotherapy. It also improves your employability and is designed to enhance your clinical management and leadership skills, to influence practice and service delivery.

**Musculoskeletal Physiotherapy MSc** is aimed at fully qualified, experienced practitioners who want to make a difference to clinical practice and work in high-level roles within the musculoskeletal field. It is a clinically focused course designed to equip you with high-level critical, evaluative and clinical skills across the four pillars of advanced practice of research, education, clinical and leadership.

**Occupational Therapy (pre-registration) MSc** gives you the opportunity to enhance your attributes as a compassionate and caring practitioner throughout the course. The skill set you will have developed on successful completion of this course can allow you to work in specialities such as paediatrics, elderly care, mental health, learning disabilities, end-of-life care, forensics, schools, and emergency services.

**Physiotherapy and Leadership (pre-registration) MSc** is designed to enable people with relevant previous degrees and patient-facing experience to become qualified physiotherapists. We aim to deliver this course using the latest facilities, including mock wards with interactive manikins, a high dependency unit, a strength and conditioning suite and gym, and community houses. These facilities allow the use of active teaching approaches including immersive high-fidelity simulation exercises which contextualise your learning.

**Links with industry and professional bodies**

We consistently receive excellent student feedback for our teaching which is done by staff members who have a real passion for therapy and healing. The current teaching team comprises staff who are both experienced in teaching and also clinical experts.

**Facilities**

Our £59m Alison Gingell Building opened in 2018. Our facilities allow us to use people and technology to replicate real-life situations which should enable you to problem solve and build self-confidence as an advanced healthcare practitioner. Our fully equipped and adapted community houses feature assistive technology, which should allow you to fully experience and practise patient treatment and rehabilitation.

Why Psychology at Coventry?
Underpinned by a passion for making a difference to local, national and international communities, our master’s courses in psychology, including health, forensic and occupational psychology explore the behaviours, thoughts and actions of people while applying these to contemporary real-world problems.

Many of our psychology courses are accredited by the British Psychological Society (BPS) and Coventry University was ranked 16th out of 116 in the UK for Psychology in the Guardian University Guide 2020.

Applied Psychology MSc is aimed at students who have studied psychology and want to further their knowledge to an advanced level. This course uses scientific psychological principles, methods and findings to study and solve problems associated with the human mind and behaviour. You will have the opportunity to develop an understanding of how psychology is applied to particular aspects of real life, such as educational psychology, child psychology, clinical psychology and counselling psychology.

Business and Organisational Psychology MSc is accredited by the Association for Business Psychology (ABP). This course works to improve your knowledge of how psychology can influence and assist the practice of managing, leading and motivating people within the workplace. It provides a thorough grounding in the theory and practical skills required to apply psychological research, business tools and methods within a variety of organisational settings and corporate cultures.

Clinical Psychology Doctorate is a joint award between Coventry University and the University of Warwick, focusing mainly on evidence-based practice and critical evaluation of both psychological literature and clinical practice. Study is divided between academic and research training – at both Coventry and Warwick Universities – and clinical placements in the NHS. During the course, you will be required to complete a research thesis of publishable quality.
This course content is correct at the time of going to print. We regularly review our course content, to keep it relevant and current for the benefit of our students. For these reasons, course modules and entry requirements may be updated. 2021 course web pages start to go live autumn 2020.

Cognitive Behavioural Therapy PGDip/MSc is an integrated one-year course and, upon successful completion, can lead to a professional qualification to work as a Cognitive Behavioural Therapist. Successful completion of the training equips you to be a skilled and independent CBT practitioner, providing practical, intensive and detailed training on the subject. Building upon your previous study of CBT, you will create and answer a research question into an area of CBT practice.

Forensic Psychology MSc covers the British Psychological Society’s (BPS) Division of Forensic Psychology’s (DFP) core curriculum and is BPS-accredited Stage 1 training to become a forensic psychologist. It offers a thorough grounding in the theory, themes, issues and practical skills key to psychological research into behaviour relevant to crime and forensic settings. We aim to cover the theoretical basis of forensic psychology through all stages of the criminal justice process and apply it to a broad range of crimes. We also provide courses in specialist disciplines, for example, Forensic Psychology and Mental Health MSc, and Forensic Psychology and Offender Rehabilitation MSc.

Health Psychology MSc is designed to help you support others dealing with the psychological and emotional aspects of health and illness, as well as promoting healthier lifestyles. It is accredited by the British Psychological Society as Stage 1 training towards becoming a health psychologist. You will be introduced to how psychological theory and evidence can help to change behaviour to improve health and well-being.

Mindfulness and Compassion PGDip/PGCert/MSc is a part-time course that aims to help you to develop a clear understanding of mindfulness and compassion, its origin, and the development of personal and teaching practice. You will examine the various contexts in which mindfulness can be utilised and explore the theories and rationale behind a range of meditation practices.

Occupational Psychology MSc is accredited by the British Psychological Society as Stage 1 training towards becoming an occupational psychologist. It focuses on using an understanding of psychology to improve effectiveness at both a corporate and individual level. We aim to cover a wide range of topics such as work and wellbeing, psychological assessment, leadership, engagement, motivation and learning, and training and development. This master’s is also available as an online course.

Psychology MSc is accredited by the British Psychological Society (BPS). This is a specialist conversion course designed for non-psychology graduates who wish to pursue a career as a psychologist. After successfully completing this course, you will have a thorough grounding in core psychological theories and methodologies, as well as their origins, history and development. It provides a focus on developing a comprehensive understanding and application of psychological theory and research to conduct your own empirical research project. This master’s is also available as an online course.

Links with industry and professional bodies
We have close relationships with employers across our sectors, including Age UK, Warwickshire County Council, the NSPCC, West Midlands Fire Service, Sunbeam Fostering Agency Ltd, and Police and Crime Commissioners. Many of our courses are formally recognised by accrediting bodies including the British Psychological Society (BPS).

Professional experience
The courses with professional experience provide you with real-life experience through industry engagement, ‘live’ projects and actual case studies. You could attend a placement in a variety of settings including law courts, police stations, hospitals and other public bodies, with opportunities both in the UK and abroad. Please note that professional experience opportunities are not guaranteed and may be subject to additional costs, application, meeting any applicable visa requirements and availability.

Facilities
Our specialist teaching facilities include an observation suite, counselling rooms and specialist software. A special projects room has a two-way mirror, video camera and separate control rooms for testing and experimentation to create simulated interrogation environments. Our psychopharmacology laboratory is used to investigate and test new ideas with our eye-tracker equipment that tracks human responses and our electroencephalography (EEG) technology to measure brain waves.

Social Work MA
HLST203 www.coventry.ac.uk/social-work

Practice Education PGCert
HLST173 www.coventry.ac.uk/practice-education

Duration: Please refer to the individual course web pages for duration. Entry: As the university has three entry points during each year, please check course-specific entry points on the individual course web pages.

Advanced Social Work PGCert is available in two disciplines; Advanced Adult Social Work PGCert and Advanced Child and Family Social Work PGCert. The courses are designed for social workers who have completed social work pre-registration training and are in employment. This provides you with the chance to enhance your career prospects by gaining a postgraduate-level qualification, upon successful course completion. After successfully gaining the PGCert, you may have the opportunity to progress to a full master’s degree.

Career Development and Management PGDip/MA enables you to demonstrate relevant and high-quality career guidance practitioner skills. Upon successful completion of this course, you will have enhanced your understanding of interviewing techniques and developing career learning programmes. You will also be familiar with designing and using labour market information to provide effective insight and advice. Accredited by the Career Development Institute (CDI), the course aims to help you to meet the special requirements of individuals looking for career development.

Social Work MA is approved by Social Work England and developed in line with government recommendations in response to a demand for a highly skilled workforce. Social work is a rewarding profession which gives you the chance to work with and support individuals, families and communities of all ages who face difficulties or distress in their lives. Once you successfully complete the internationally recognised Social Work MA, you can apply to register as a professional social worker.

Practice Education PGCert has been designed to allow you to develop your practice, extend your range of skills, enhance your critical reflective skills and thus improve service delivery. It is intended to be a key mechanism for social workers to use to gain an academic award at the same time as meeting their Continuing Professional Development (CPD), as required by the regulator, Social Work England.

Various accreditations and memberships may apply to the courses on this page. For more details, see page 16.

Why Social Sciences at Coventry?

Our social sciences master’s courses are designed for people who want to make a real difference to people’s lives and can open the door to a wide range of rewarding careers. Education, social development and social care have become increasingly complex both nationally and internationally, with a growing need for dynamic and effective individuals and leaders. You will get to focus on critical reflection, re-examining ‘real’ issues and problems, which aims to improve your decision-making and accountability.

Continued overpage
Social Sciences (continued)

Links with industry and professional bodies
We have been educating social workers for more than 50 years and have a strong reputation within the field. We also have a Social Work Partnership with the local authorities of Coventry, Warwickshire and Solihull. Our current team of expert teachers are regularly joined by leading guest speakers from the UK and a range of other countries to set the context of social and behavioural sciences internationally. Guest lectures may be subject to availability.

Sports and Exercise Nutrition MSc*
HLST206 www.coventry.ac.uk/sports-nutrition-msc

Sport Psychology MSc
HLST248 www.coventry.ac.uk/sport-psychology-msc

Duration: 1 year full-time. *Option for 2-3 years part-time (UK and EU students only).

Entry: As the university has three entry points during each year, please check course-specific entry points on the individual course web pages.

Why Sport, Exercise and Nutrition at Coventry?

Our master’s courses focus on an evidence-based approach to exploring human performance and applying scientific principles of sport and exercise across a range of domains; sport, strength and conditioning, and nutrition. We also examine the way the human body functions during sport and physical activity, the prevention and treatment of injuries, food science, nutrition and diet-related health issues.

Strength and Conditioning MSc gives you the opportunity to improve your understanding of the science of strength training, and the application of strength and conditioning, enhancing human performance. You can develop your expertise and practical ability to prescribe, monitor and evaluate exercise programmes, to optimise performance and recovery. During your studies, you will have the opportunity to work towards your accreditation as a strength and conditioning coach with the National Strength and Conditioning Association (NSCA) and the UK Strength and Conditioning Association (UKSCA).

Sports and Exercise Nutrition MSc improves your understanding of the science and application of sports nutrition and exercise, and how it can be applied to a diverse range of individuals to improve their health, fitness or sporting performance. The course explores the components of fitness, nutritional requirements, energy expenditure, body mass and body composition. It examines some of the common problems associated with general health and well-being, diet and nutrition, exercise and sport performance.

Sport Psychology MSc is designed for sport and exercise scientists who want to further develop their expertise in sport psychology. You will have the chance to study the theory and application of sport psychology to individual and team sports. You will also have the opportunity to apply your knowledge to develop and implement appropriate assessments and interventions to help individuals and teams to achieve their goals. The course content is mapped to the British Association of Sport and Exercise Sciences (BASES) Supervised Experience (SE) and Accreditation competencies. This is designed to enable you to progress your career pathway towards achieving the status of BASES Accredited Sport and Exercise Scientist (Psychology). BASES Accreditation is gained after completion of the MSc, plus a period of supervised experience.

Links with the industry and professional bodies

Many of our current staff have extensive professional experience and are members of the UK Strength and Conditioning Association (UKSCA) and British Association of Sport and Exercise Sciences (BASES). Our teams work closely with professional sports teams and athletes across the West Midlands, including Wasps RFC, and Coventry City, Birmingham City and West Bromwich Albion football clubs.

Facilities

Our award-winning Alison Gingell Building houses the latest sport and exercise science, and sports therapy equipment. This includes a running track for gait analysis, biomechanical assessment equipment and an environmental chamber that can simulate a range of environments including different altitude, temperature and humidity levels.

Further information

Visit our website for detailed course information or see pages 139-140 for information about entry requirements and course fees.
Our recently launched National School of Education and Teaching (NSET) provides initial and continuous teacher training throughout the country. At NSET, our aim is to set the standard in teacher training, both in the UK and globally and, in doing so, to raise the profile of teaching and education around the world.

Our courses look to develop teachers who are confident, inspiring and highly effective in transferring knowledge and skills to their pupils. Through the training, the courses are intended to:

- enable you to explore wider perspectives in education and to give you the opportunity to deepen your understanding of codes of practice and contemporary issues affecting schools
- equip you with the skills to reflect on your personal and professional development and to respond positively to feedback through critical analysis of your practice
- support you to develop an inquiry-led approach to research of your own practice and to reflect on strategies for effective teaching and learning
- encourage self-awareness and independent learning so you take responsibility for your own professional development, understanding your strengths and your weaknesses, and how to progress your own teaching.

Learn on the job in a location that best suits you
Most teacher training courses are either school-based or university-based. We combine the best of both worlds so you should receive the academic rigour of university education while learning your craft in the classroom. Not only will you have a tutor who comes to visit you in school, you will also have the benefit of online tutoring, so you can study at your own pace and pursue your own interests.

Our approach means you can do your course at a school almost anywhere in the country. You can study and train in a location to suit you, rather than being tied to a specific geographical area. All but six days of your 39-week course will be spent in a school, learning on the job with blended tuition delivered through a combination of online study, personal tutoring, in-school mentoring and attending education conferences. You can also opt to undertake all of your study online if you are working at a school abroad.

Flexible and cost-effective
There are lots of options when it comes to how you want to structure your studies. You can be a full-time student on placement in schools, or employed or salaried by a school, opening up a range of funding options. If you are based in England, we can help you to access the range of possible scholarships and bursaries available to train to teach. If you are employed or salaried by a school, they can also use their apprenticeship levy to fund the course fees, to reduce costs for them too. The course is available also on a part-time basis and you can begin when you are ready, as we offer multiple start dates throughout the year – September, January and April.

Links with industry and professional bodies
We are accredited by the Department for Education (DfE) in England to recommend the award of Qualified Teacher Status (QTS). We have a number of partner schools across the country and can help support you in finding a school placement or employer. We can also help schools recruit for their teaching vacancies.

Employability
Our Postgraduate Certificate in Education (PGCE) with QTS and Postgraduate Teaching Apprenticeship are teacher training courses which, upon successful completion, certify trainees to teach in state-maintained schools in England by recommending them for Qualified Teacher Status.

The standalone PGCE course is designed for teachers, teaching assistants or learning support assistants, who are employed in independent schools in the UK or in schools abroad but have not undergone any formal teacher training. Independent schools are increasingly requesting Qualified Teacher Status as well.

Our Initial Teacher Training Courses also carry 60 master’s credits, which can count towards gaining a full master’s degree in Education with NSET.

Courses – Continuing Teacher Training

Educational Leadership MA
www.coventry.ac.uk/educational-leadership-ma

Postgraduate Certificate in Education with Qualified Teacher Status PGCE with QTS
Our PGCE with QTS is an Initial Teacher Training course, which, once trainees successfully complete it, certifies them to teach in state-maintained schools in England. It is offered at primary level (5-11 and 7-11 age ranges) and secondary in all subjects (11-16, 11-18 and 14-19 age ranges). Applicants for the course can also teach in independent schools.

Postgraduate Certificate in Education PGCE
This option without QTS permits successful graduates to teach in independent schools in the UK or in schools abroad. It is ideal for those already employed as teaching assistants and learning support assistants who wish to train on the job.

Postgraduate Teaching Apprenticeship
(Level 6 with QTS)
This programme is available for both employees already salaried or contracted to work in a school, as well as new recruits to a school. We work closely with school leaders to ensure that apprentice teachers have the academic and pastoral support they need to successfully navigate through the 12-month course. Following successful completion of the course, the apprentice teacher will be recommended for Qualified Teacher Status.

Assessment-Only Route to QTS
If you are already an experienced teacher, we offer a fast-track to professional accreditation. This option is available to teachers in the UK or abroad, who have not undergone formal teacher training, and have more than two years of teaching experience in two or more contrasting schools.

Educational Leadership MA
New for 2021, we introduce an online MA in Educational Leadership, designed for current or aspiring senior leaders. Ideal for those teaching in primary or secondary schools in the UK or globally, the course is written by successful head teachers and combines their experience in leading schools with extensive research on leadership theory. The result is a taught course that exposes you to real leadership skill. The course shows how effective leadership makes a major difference to a school’s culture, the effectiveness and wellbeing of staff, and the quality of teaching and learning. You will delve into different themes such as changing a school culture and the needs of the people involved in school settings. Devised to be flexible in its delivery, the course allows students an option to study a modular pathway with optional exit awards that result in the award of either a PG Certificate (60 credits level 7) or PG Diploma (120 credits level 7).

School placements required
If your school would be interested in offering placements to students studying a PGCE course with us, get in touch. We are also keen to hear from SCITTs, School Direct Partnerships and Teaching School Alliances, as we have designed a PGCE which caters for your needs.

Further information
Please visit our website for further course information, including details on current course fees.
www.coventry.ac.uk/NSET
Coventry University London

Coventry University London offers you a chance to study innovative and employability-focused MBA and MSc courses in the UK capital, at the heart of one of the most successful business and financial centres in the world. We are just minutes from the London Stock Exchange, Bank of England and other world-leading organisations.

Opportunities in the heart of London
Make the city your classroom by studying at Coventry University London. Our bespoke courses in business, marketing, management, accounting and finance, fashion, and hospitality and tourism aim to give you first-class teaching, modern facilities and a London City student experience. We believe there is no better place to learn about business than in the centre of London’s financial district.

Industry links
You will get chance to build business skills through a range of possible experiences, from work-based learning in global organisations to top industry networking events. We currently have relationships with many employers, such as The Ritz London, Genesis, Deloitte and Barclays.

Practical business application
We try to put employability at the heart of everything we do, to help equip you with skills valued by employers. All of our courses are designed to be interactive and relevant to the business world. You can benefit from a mixture of lectures, seminars and group work, while many assessments are based upon coursework.

Careers and employability
Our dedicated Talent Team is available to offer you specialist careers advice, including support in learning the skills to market yourself to employers, guidance in identifying a career plan and preparing for interviews and graduate assessment centres. We recently hosted a mock assessment day at Tottenham Hotspur Football Club where students were able to experience typical one-to-one interviews, presentations and group exercises first-hand.

www.coventry.ac.uk/london

Entrepreneurship
We put entrepreneurship at the heart of all our courses. You may want to launch your own business, apply for graduate schemes or work elsewhere, so just having commercial acumen and thinking in an entrepreneurial way will be important. Our teams, in the classroom or in the specialist Enterprise Hub, are there to help you achieve your goals.

Learn from industry professionals
Not only will you be taught by a qualified academic team with industry experience (staff subject to change), but you will get the chance to learn from industry experts through guest lectures and masterclasses – subject to availability. In the past, our students enjoyed learning about the daily operations of world-renowned hotel The Ritz London, how to be a successful entrepreneur from Channel 4’s Secret Millionaire, Mike Greene, and the challenges of running a highly successful fashion brand, including putting on catwalk shows at London Fashion Week, from Victoria Lovelock, Production Manager at Topshop Unique.

Work experience opportunities on all courses
You will have an opportunity to develop your business skills through a range of work-related experiences or simulations. We help to prepare you for internships or other work-related projects, such as consulting projects, entrepreneurship projects and more. Please be aware that such opportunities cannot be guaranteed and may be subject to additional costs, application, availability and/or meeting any applicable visa requirements.

Extended Professional Practice
Our MSc courses are available as an 18-month Extended Professional Practice option, aimed at students who wish to develop a deeper understanding of business in a very practical way. Over two modules, it aims to give you the chance to undertake a longer project or internship as part of your course. At the end, students must produce a substantial problem-based piece of individual written work.

*I had a fantastic experience studying with passionate and dedicated teachers, and employability staff available to offer advice and support.*

Agathe Silvagni  
Global Financial Trading MSc
Coventry University Online

Coventry University Online is part of the Coventry University Group which means that you can study for a postgraduate qualification anywhere in the world that has an internet connection.

Due to feeling constrained by work, family commitments or simply a busy lifestyle, some potential postgraduate students may feel that they can’t easily access education. We deliberately developed Coventry University Online with the aim of providing you with a really alternative approach to studying a postgraduate degree. Instead of attending a campus to learn, the learning comes to you – so your living room, the bus you take to work and the park next to your house could become your lecture theatre.

Flexible online learning

Online learning is a way of studying from anywhere in the world. You’ll still have access to our world-class teaching, but all of your learning will take place online, as you work towards an internationally recognised qualification.

By studying 100% online, we put you in control of your postgraduate degree, allowing you the opportunity to balance learning with other commitments. If you have a full-time job, you can spread the course over five years – or if you are able to dedicate more hours, you can complete it within just two years.

All you need is a device with internet access, regardless of what time of day it is or where you are in the world. Instead of attending lectures and working with a fixed timetable, you can study at a time and place that suits you.

Students can access an online library, Centre for Academic Writing (CAW), sigma (Maths and Statistics support) and a range of other support services, as well as tutor support and 24/7 access to the virtual learning environment.

Benefits of online study

Fitting your study around your lifestyle and commitments can be helpful and there are many benefits that come with this kind of learning.

- Location does not matter – live on the other side of the country or even the globe? Travel a lot with your job? Online learning can overcome geography, wherever you might be.
- Study progresses at your own pace – online learning has the advantage of an adaptable routine. You can take whatever time you need to fully understand the learning material.
- You get flexible payment options – we offer our learners the ability to pay per module as well as three enrolment periods per year – January, May and September. Contact us to find out the specific details.
- We offer dedicated support – highly skilled student experience officers are available to provide help and support.

How to apply

Our dedicated Recruitment and Admissions team will support you through your application process and answer any queries you may have. We accept applications all year round and you can apply online or by contacting our team directly.

After you have submitted your application, our team will keep you updated as much as they can throughout your studying experience. If you receive an offer to study with us, we will support you through enrolment before introducing you to your dedicated student experience officer who you can have access to during your studies.

“I work with students who often start off by saying that they don’t think that they can do something, but then go on to complete their assessments and achieve fantastic grades.”

Serena
Online progression coach

Duration: Part-time/Flexible learning.
Entry: As the university has three entry points during each year, please check course-specific entry points on the individual course web pages.

This course content is correct at the time of going to print. We regularly review our course content, to keep it relevant and current for the benefit of our students. For these reasons, course modules and entry requirements may be updated. 2021 course web pages start to go live autumn 2020.
You may have concerns about whether you meet the entry requirements of the course for which you are applying.

We hope that the following information will help you to understand how we assess applications for postgraduate qualifications at the university. You are more than welcome to contact us at ukadmissions@coventry.ac.uk if you have any questions about the qualifications you hold.

Please be sure to always refer to the specific course pages on our website for the latest and most accurate information regarding detailed entry requirements and tuition fees.

Applications for all postgraduate degree programmes must be made via the university’s online application form that can be found on our main website. Please visit https://webapp.coventry.ac.uk/CUapply.

Every course page on our website shows the typical entry requirement grades that you will need to meet to be accepted for that course.

The university considers a wide range of UK, EU* and overseas qualifications for entry to postgraduate courses and assessment of qualifications is carried out by experienced admissions practitioners.

As a general guide, the minimum entry requirement for a taught master’s course is the equivalent of a 2:2 undergraduate honours degree or above.

Applicants who do not meet this minimum entry requirement, but can demonstrate considerable relevant work experience at an appropriate level, may also be admitted. Such applications will be sent to the course tutor for consideration on an individual basis.

Some of our courses (and especially those that are creative or professional in nature) may also require you to attend an interview before your place on the course can be confirmed.

Postgraduate Research (PGR)
For PGR entry requirements, visit www.coventry.ac.uk/pgr-making-an-application.
For further information about PGR opportunities within our dedicated research centres, visit www.coventry.ac.uk/our-pgr-environment.

*EU students should be aware that there may be a change to UK laws following the UK’s exit from the European Union which may change their student status and/or their conditions of study. Coventry University will obviously act in accordance with the UK’s laws in force at that time.
Fees and living costs

As a postgraduate student, your two main costs of study are likely to be academic fees and your living expenses.

Tuition fees
Course fees are calculated on the basis of what it costs to teach each course and will vary depending both on your chosen course of study and your fee status as a UK, EU* or non-EU student. Prices may change due to inflation and governmental factors. You can find course fees on the individual course pages in the online course finder at www.coventry.ac.uk.

More information on credit/module fees is available at www.coventry.ac.uk/pgfees

Please note that, at the time of going to print, the university has not set its fees for entrants in 2021. We set fees for individual courses, and fees from previous years are no indication of fees for future years.

Living expenses
If you are choosing where to live in the UK, you may well find your money goes further here in Coventry. While your cost of living depends on your lifestyle and spending habits, Numbeo.com, a worldwide database, reassuringly listed the cost-of-living index in Coventry as 20% lower than in London in August 2018.1

To discover more detailed information on London living and accommodation costs, then please visit www.coventry.ac.uk/london/student-life/living-in-london

Other costs
Please be aware that additional costs such as any accreditation fees, optional international and industrial field trips and any costs associated with workplacements, are not included within the course tuition fee. For more information about these additional costs, please use the contact details on page 140.

Living costs in Coventry
Here is an approximate guide to the minimum amount you could expect to pay for some usual living expenses in Coventry per month. These costs are for one person only, so please keep this in mind if you are working out a budget that includes children and dependants.

You will also need to consider how you will pay for travel to and from the university, plus the list does not include food, social, course materials (such as books) and clothing. Remember that Coventry is a more affordable city than London, and offers many places to socialise and buy affordable clothing.

*EU students should be aware that there may be a change to UK laws following the UK’s exit from the European Union which may change their student status and/or their conditions of study. Coventry University will act in accordance with the UK’s laws in force at that time.
Financial support

Achieving a postgraduate qualification is a real investment in your future and studies show that postgraduates earn more, on average, over a lifetime than undergraduates.

However, we know that the cost of a postgraduate course can be a barrier for some. Thankfully, there is a wide range of financial support available for postgraduate study, including loans, flexible payment options, discounts and scholarships.

**UK/EU* postgraduate loan scheme**

Government-backed student loans can support postgraduate study in England.

[www.gov.uk/funding-for-postgraduate-study](http://www.gov.uk/funding-for-postgraduate-study)

**Flexible payment scheme**

We offer flexible payments in accordance with the type of funding you are receiving and when you will receive it.

This should enable you to set up payment-due dates in line with your funding, designed to give you peace of mind that your course costs can be budgeted for and met, so avoiding unnecessary financial pressure.

We offer both direct debit and automated recurring card payments, which will need to be set up at the start of your course.

[www.coventry.ac.uk/pgfunding](http://www.coventry.ac.uk/pgfunding)

**International students**

International students must have paid a minimum of £8,000 to complete enrolment. This is typically in two instalments of £4,000. The first instalment must be received to release a Confirmation of Acceptance for Studies (CAS) letter. The second instalment must be paid before enrolment. The remaining balance of fees are payable in full by the end of enrolment, or can be split into two equal payments spread over three months.

This information is correct for our September 2021 intake, but is subject to change for future intakes.

[www.coventry.ac.uk/int-how-to-pay](http://www.coventry.ac.uk/int-how-to-pay)

**UK sports scholarships**

Our sports scholarships scheme awards scholarships competitively to approximately 30 students each year who have the sporting ability to represent us at a high level. Applications are open to all students participating in a sport recognised by Sport England. Sports scholarships are for one year and are worth either £3,000 (consisting of up to £1,500 cash and up to £1,500 worth of support) or £1,500 (consisting of £750 cash and £750 worth of support).

[sportingexcellence.ss@coventry.ac.uk](mailto:sportingexcellence.ss@coventry.ac.uk)

**UK postgraduate scholarships**

There are a limited number of UK postgraduate scholarships available worth £1,500 to undergraduates achieving a first-class degree classification.

[www.coventry.ac.uk/pgfunding](http://www.coventry.ac.uk/pgfunding)

*EU students should be aware that there may be a change to UK laws following the UK’s exit from the European Union which may change their student status and/or their conditions of study. Coventry University will obviously act in accordance with the UK’s laws in force at that time.*
Commonwealth scholarship scheme
The Commonwealth Scholarship Commission offers opportunities to Commonwealth citizens to study in the UK. If you are a citizen of a developed Commonwealth country, you can apply for scholarships for PhD and split-site (PhD) study. If you are a citizen of a developing Commonwealth country, you can apply for scholarships for master’s, PhD or split-site (PhD) study at UK universities, as well as shared scholarships for master’s study at selected UK universities.
https://cscuk.fcd.gov.uk/apply

International/EU* scholarships
We offer a wide variety of scholarships for high-achieving international and EU students.
www.coventry.ac.uk/cuscholarships

International/EU students can direct scholarship enquiries to the International Office at scholarships.io@coventry.ac.uk

Chevening scholarships
Chevening is the UK Government’s international awards scheme aimed at developing global leaders. Funded by the Foreign and Commonwealth Office, it offers full scholarships to outstanding individuals from more than 150 countries to study up to one year at master’s level. Recipients also benefit from an expanding suite of unique networking and engagement opportunities.
www.chevening.org/apply

Other philanthropic and professional support charities, trusts and societies, such as the Royal Society, Royal Academy of Engineering or the British Academy, sometimes provide grants, often for students from poorer backgrounds or those who have achieved academic excellence. Ask at your local library for publications such as the Educational Grants Directory, the Charities Digest, the Grants Register or the Directory of Grant Making Trusts for more information.

You can also search for funding options online
www.scholarship-search.org.uk
www.turn2us.org.uk

Part-time work
A number of postgraduate students fund further study through earnings from a part-time job. Our dedicated recruitment agency, thefutureworks, is on hand to help you find suitable employment opportunities.
www.thefutureworks.org.uk

Non-financial support (printer credits)
University is considered by many to be a great investment but we understand that many students and their parents are often concerned about hidden costs. Even small things can make a difference to help – for example, we provide you with printer credits at no cost (up to 1,000 A4 black and white laser print credits per year, depending on if you are full-time or part-time).

Contact
If you are a UK/EU student and have any queries about funding, including queries about financial support, please contact our Student Funding team.
T: +44 (0)24 7765 2040
E: fundingsupport@coventry.ac.uk

If you are an international student and have any scholarship queries, please contact the International Office.
scholarships.io@coventry.ac.uk

Visit us

Open Days (including virtual Open Days)
Whether real or virtual Open Days, we usually hold and attend postgraduate study events regularly throughout the year. These events are designed to answer all of your questions about postgraduate study. They provide the perfect opportunity to ‘meet’ academic staff and engage with some of our current students. For more details on student-led tours and real (and virtual) Open Days, visit www.coventry.ac.uk/opendays

Student-led tours
If you are unable to attend an Open Day, you may join one of our student-led tours of our campus and facilities that run between October and June.

Virtual tour online
For a virtual tour of the university right now, visit http://virtualtours.coventry.ac.uk

Overseas and virtual events
If you are an international student, we know that it is not always possible to visit the UK before starting your studies. That is why we attend regular in-person and virtual events around the world to meet with students and to help you to learn more about studying in the UK. www.coventry.ac.uk/internationalevents

Coventry University London
To find out more detailed information on Coventry University London visits, Open Days, etc, please visit www.coventry.ac.uk/london/study/meet-us

How to apply

UK students
If you are a UK student, you should complete an online postgraduate application form for full-time and part-time courses. This form is available via each course page on our website. The relevant web links are listed on the course pages in this prospectus.

You will need to send us some key information so we can process your application. You can send paper copies by post, or email us with scanned copies.

Please submit the following information with your form:

- One recently dated academic or work reference on official headed paper or emailed from a professional address direct to ukadmissions@coventry.ac.uk.
- Copies of academic transcripts, if available.
- Copies of degree/diploma certificates, if available.
- A portfolio of artwork for art-based courses.
- An English qualification equivalent to GCSE English at grade C (new grade 4) or above.
- Your personal statement.
- A sponsor letter on official headed paper or a completed fee authorisation form if you are being sponsored by an employer (fee authorisation form can be downloaded from www.coventry.ac.uk/pgfees and should be sent to Finance before enrolment).

You can also find details here of where to send the completed form.

Once received, we will assess your application and, aim to respond within 10 working days. This may take longer during our peak times.

International/EU* students
International and EU students should apply online or by downloading the application form available at www.coventry.ac.uk/apply or via the course pages on our website.

We also have local representatives in various countries around the world (including China, Nigeria, India, Pakistan, Indonesia, Malaysia and Hong Kong) who can support you with your application. Contact details for the various regions can be found on our website. www.coventry.ac.uk/international.

The International Office will need the following information to make a decision on your application:

- Copies of all relevant academic transcripts.
- Copies of degree/diploma certificates or a work reference if you are employed.
- One academic and/or one work reference on official headed paper (some courses require two reference letters).
- An acceptable English language test score (IELTS or equivalent).
- Your personal statement.
- A copy of your current passport.
- A portfolio, if required, for the course that you are applying to study.

We aim to provide an initial decision on your application in less than a week. This may take longer during peak periods.

If you require a Tier 4 visa to study in the UK, you will need to pay a deposit of £4,000 and meet all of your offer conditions so that we can issue you with a Confirmation of Acceptance for Studies (CAS) letter. You will then need to pay a second instalment of £4,000 before enrolment.

*EU students should be aware that there may be a change to UK laws following the UK’s exit from the European Union which may change their student status and/or their conditions of study. Coventry University will obviously act in accordance with the UK’s laws in force at that time.

Postgraduate Research (PGR)
For further information about PGR opportunities within our dedicated research centres, visit www.coventry.ac.uk/our-pgr-environment.
For PGR entry requirements, visit www.coventry.ac.uk/pgr-making-an-application.
