Redefine Possible

Top 15
5 years running
theguardian University Guide 2016–2020
Dream big. Because you can.
We believe you should always receive high quality teaching and the best student experience. With this in mind, we aim to ensure that your learning applies to the real world and your student experience is second to none. See pages 17-18 to find out more.

*Times Higher Education metrics ranking 2017.*
Go global

1st for overseas student experiences*

A global mindset could enhance your career and personal development. With a reputation for just that, we aim to help you immerse yourself in different cultures and experiences, both in the UK and abroad. See page 21 to find out more.

*Based on the number of student trips abroad - HESA 2017/18 UK data, published 2019
97% employed or in further study six months after graduation*

To stand out from the crowd, your career should be something you focus on throughout your degree. Our approach aims to develop your career skills from the outset, helping you to build confidence and make your mark. See page 22 to find out more.

Live in a city of culture

Top 5 UK Student City*

As one of the UK’s youngest top 5 cities, **Coventry is a vibrant and affordable place to live and study. And as the UK City of Culture 2021, the city is poised for a year of festivities in which you could play a part. See page 25 to find out more.

*QS Best Student Cities Index 2019.
**BBC ‘Where are the UK’s youngest and oldest city populations?’ Monday 19 March 2018.
The Coventry University Group assessment strategy ensures that our courses are fairly assessed and allows us to monitor student progression towards achieving the intended learning outcomes. Assessments may include exams, individual assignments or group work elements. Please check your course page for specific information.

Information is correct at the time of going to print, however, changes may occur. Check our website, www.coventry.ac.uk (or, for Coventry University London, www.coventry.ac.uk/london) or contact us on +44 (0)24 7765 7688 before applying to study at Coventry University to check the most up-to-date position. Where there is a difference between the contents of this prospectus and the Coventry University or Coventry University London website, the contents of the applicable website take precedence and represent the basis on which we intend to deliver our services to you.

EU students should be aware that there may be a change to UK laws following the UK’s exit from the European Union which may change their student status and/or their conditions of study. Coventry University will act in accordance with the UK’s laws in force at that time.

By accepting your offer of a place with us, a Student Contract (“the Contract”) will be formed between you and the university. The Contract will detail all of your rights and also the obligations you will be bound by during your time as a student and will also contain all of the obligations that the university owes to you. You should read the Contract before you accept an offer of a place and before you enrol at the university.
Investing in the future

See page 40 for further information on campus developments
When you come to Coventry University, we believe that you can expect more from your experience here. In fact, we were voted University of the Year for Student Experience (The Times and Sunday Times Good University Guide 2019), largely due to improvements made following input from our students. So what does this mean for you? Well, we like to give you as many opportunities as possible to gain new experiences while at university, and we aim to offer support while you try new things.

So, if you’re interested in travel, we offer a range of opportunities to go on overseas trips, and work or study abroad. Coventry University Students’ Union (CUSU) runs a range of societies that are a great way to socialise. We care about your wellbeing and offer counselling as well as spiritual support through the Spirituality and Faith Centre in The Hub and subsidised gym membership in our modern sports facilities. For academic support, your course tutors can be contacted to discuss course content, and our library is open 24/7, 364 days a year for quiet study and resources. You’ll also find our Centre for Academic Writing (CAW) and sigma, the Mathematics and Statistics Support Centre there too.

As a Coventry University student, you’ll have the freedom and responsibility to attend all your classes and then, independently, do all work set. If you fall behind with your attendance for any reason, Student Services would check in with you to provide support and assistance.

When looking around at universities, you may not have considered the cost of course essentials such as printing your work, course books or compulsory UK visits. With our Flying Start scheme, we include some of these within your tuition fees, unlike many other universities. This support is tailored to your course content. What you get with Flying Start will depend upon your course content and what your course tutor selects as most useful. Previous students have attended field trips, obtained computer software and gained membership to industry-relevant professional bodies offering networking opportunities.

Subject to availability, application process and visa requirements. Fees apply.
Gold-standard teaching

In 2017, we were awarded the top accolade, Gold, in the Teaching Excellence Framework (TEF), a new government ranking that rates how well students are taught at UK universities. In the Guardian University Guide 2020, we ranked 15 of 121 institutions, ahead of 16 of the 24 Russell Group universities.

We believe our teaching staff know what it takes to succeed – many have postgraduate qualifications and/or industry experience too, acting as mentors and advisors to possibly help you gain a deeper understanding of your subject. They aim to help you develop skills you may need in your future career. That’s why 97% of our graduates are employed or in further study six months after graduation*, proving our teaching is useful beyond the classroom.

However, our most important feedback comes from our students and we are proud they have recently rated us highly in national surveys, both for overall experience and teaching standards. Student-elected course representatives communicate the views of their fellow students to their tutors and other university staff. This is just one of the ways we help to improve our course content and delivery for you.

Our multi-million-pound, learning environments should immerse you in situations close to real-life work. Depending on your course, you could feel what it’s like to work in an ambulance, a courtroom, in a fashion show or with the cars of the future. We offer innovative ways of learning too, like our Disruptive Media Learning Lab which incorporates games and playful thinking. You’ll also find experimental learning areas and themed creative project labs designed to help you think outside the box. We hope you’ll be inspired by our teaching staff, their experience, enthusiasm and genuine desire to help you learn.

Many of our courses are accredited by leading awarding bodies. We renew course accreditations and memberships in line with the relevant body’s standard review process and subject to Coventry University meeting all of the relevant criteria. If our applications or renewals are unsuccessful, we will seek to inform all applicants and students as soon as possible. Please check the relevant course website for up-to-date information.

Global opportunities

We are keen to try and give you the opportunities to enhance your employability on a global scale. Our programmes aim to strengthen your problem-solving skills, make you more independent and further your self-confidence – all skills which global employers are currently seeking.

Through our global programmes, we helped more than 5,600 students to travel, work and study abroad last year. This included locations such as Brazil, Australia, China, Japan and the USA. As a Coventry University student, you may have the opportunity to apply to spend around three to 12 months abroad, with options to study, work, combine study and work, or embark upon international field trips or research.

Our reputation for helping you to become global-ready is based on a lot more than just our standing as the UK’s number-one provider of overseas student experiences. You may also have the opportunity to learn a new language, visit large multi-national organisations to learn how they operate and to gain exclusive access to internationally renowned speakers, from CEOs to high-profile specialists, offering you invaluable networking opportunities to give real depth to your CV.

You can gain global skills and experiences here in Coventry too – it’s a multicultural city that has welcomed students from more than 160 countries around the world. All students have the opportunity to learn another language too, and internationally-flavoured events are run on campus throughout the year alongside gatherings by student societies.

We’ve already helped thousands of students to gain a competitive edge in the employment market with the global skills, knowledge and experience they gained with us. Choose Coventry University and you could join them.

Global languages and Short courses

Learn a new language with this innovative programme, offering more than 30 languages, with face-to-face classes run by native speakers. We offer the official exams for Spanish (DELE, SIELE), English (Trinity) and more. You might even be able to earn extra money while at university by becoming a Certified Language Tutor in your native language.

Erasmus+ and study exchange

The Erasmus+ scheme is a Europe-wide project which gives you the opportunity to study at a partner university or complete a work placement for up to a full academic year. You also have the option to combine them, so that you can both work and study abroad.

Global Leaders Programme (GLP)

This exciting, members-only programme aims to develop industry leaders of the future. Expand your global skills in our specialist workshops, experience different countries, such as North and South America, Malaysia and many more. Hear inspirational business speakers from across the globe, such as NASA, Barclays, NHS, Facebook and Microsoft.

Academic field trips

Our international experience grants allow you to get involved with many exciting and transformative academic field trips overseas. Students learn about opportunities through their faculty, as well as centrally with our ‘Be the Change’ trips and via our Moodle online course platform.

www.coventry.ac.uk/go-global
Career prospects

We believe there are many good reasons to study a degree at Coventry University, but one of the most important is to gain access to the graduate jobs market. Our careers support is designed to help you do just that. We also offer support related to your subject to help you to gain an edge.

Courses at Coventry University aims to help you develop the skills and qualities many employers look for, such as entrepreneurship, good communication, problem-solving and analytical skills, as well as a global outlook. For work experience, our careers specialists can try to help you to secure a work placement or internship, which can be taken as part of a degree course, a sandwich year or during university holidays*.

Our ‘Add-vantage’ modules should help you to prepare for the transition from study to work. Options include learning a foreign language, entrepreneurship, or enhanced research skills. You could try work experience, join international field trips, gain professional accreditation or study towards industry qualifications*.

If you strive to create the next Uber, Snapchat or Hype, our International Centre for Transformational Entrepreneurship (ICTE) could offer you the opportunity to gain access to entrepreneurial support, with skills development, networking, workshops and events which should all useful if you’re thinking of starting a business or becoming self-employed. If you’d like to start a socially-conscious business, our Enterprise HUB aims to support and develop social enterprises created and run by our staff, students and alumni. We have been awarded the Social Enterprise Mark in recognition of our commitment to sustainable local businesses. If you’re looking for work during or after your degree, Coventry University has its own recruitment agency, thefutureworks, which can help you with finding temporary and permanent employment opportunities.

We hope you’ll be inspired by some of our successful alumni. Read about how their chosen courses set them on the path to the successful careers that they now enjoy. Your dream career could start right here.

Stephanie studied Economics and is now a Cyber Intelligence Analyst for the UK Home Office and co-founder of Uttr., a public speaking agency promoting women of different ethnic origins. She says: “The career service at the university was extremely supportive in helping me”.

Marco studied Aviation Management and is now Airport Operations Manager at Heathrow Airport, the busiest airport in Europe and the fifth busiest in the world. He says of his course: “I gained a very broad understanding of the industry, which helped prepare me for the workplace”.

Aisling studied Adult Nursing after being inspired by her mother, also a nurse, who cared for her terminally ill grandmother. Aisling became Deputy Director for Nursing, NHS England in the West Midlands just 10 years after graduating. She says: “I have the best job in the world”.

*Please refer to the degree course for specific information relating to your study choice and module availability.
Coventry is a global city – our university has more than 13,000 international and EU students studying with us in the UK. We have welcomed students from more than 160 different countries, of all faiths and beliefs. As a multicultural city, there are shops and restaurants with truly international flavours.

Coventry is an affordable city for students and was voted as the 4th most affordable university town in the UK (Marbles 2016) and in the top 100 most affordable student cities in the world in 2019. You’ll find shops that cater to different budgets, ranging from the Coventry Market to bistro restaurants. Coventry is also a top 5 UK student city and one of the top 50 student cities in the world.

Coventry has been named UK City of Culture 2021 and is bursting with opportunities for culture fans. For art and history fans, the Herbert Art Gallery & Museum could be worth a visit, especially for its curated arts events, while the nearby Fargo Village – the city’s creative quarter – looks to run a calendar of events throughout the year.

Theatre-goers are well-catered for with the Belgrade, Warwick Arts Centre, Albany Theatre, the Criterion and even the Shop Front Theatre (Theatre Absolute), a unique space in a former fish and chip shop. For something a little different, there’s numerous ‘escape rooms’ around the city too.

Movie-goers have the multiscreen Odeon at the SkyDome, the university’s own cinema at Square One in TheHub, and the Showcase on the edge of the city. Music fans have plenty to enjoy in Coventry too, with live venues such as The Golden Cross, The Kasbah, Empire, JJ’s and ‘The Tin’ Music and Arts. Coventry’s iconic musicians are also celebrated in the city’s very own Music Museum.

Retail
We have five retail parks on the city outskirts, but the benefit of an urban campus less than five minutes’ walk from the city-centre means you also have popular high street shops right on your doorstep. These include New Look, Primark, River Island, Waterstones, M&S and Topshop. For online fans, you can even have Amazon orders delivered to secure lockers in TheHub.

Sport
The Ricoh Arena is home to Premiership rugby club Wasps, while Coventry RFC, our Championship team, plays at Butts Park Arena. The city is also home to Coventry City Football Club, a top-tier ice hockey team, Coventry Blaze, and a semi-pro rugby league club, the Bears. Our own Students’ Union also runs over 50 sports clubs for students.

Food
Our shops and restaurants cater to global tastes with food from around the world. In the city-centre alone, you could sample Middle Eastern, Caribbean, Indian, British, Asian, Italian, French, Japanese, Latin American and American food, and more. Not to mention our dessert parlours.

Central location
Coventry is situated right in the heart of England, just one hour from London and 20 minutes from Birmingham by train. If you choose to live in our modern, city-centre accommodation, you’ll be really close to campus with all of the benefits that Coventry city-centre living has to offer.

1QS Best Student Cities Index 2019.
2Some societies charge a fee for membership.
3Information provided is the current fastest available route at time of printing. Please refer to National Rail for more information.
At Coventry, we are proud that the reputation of our student experience is based on a solid foundation of both academic and welfare support for students.

From our Information Points across campus – with friendly, trained staff who can deal with a range of queries on behalf of our academic faculties – to our specialist support areas covering learning, academic writing, IT, mathematics and statistics, we work hard to make sure we add value to your learning experience.

We aim to help you feel settled at Coventry and to ensure you have as many opportunities as possible to succeed in your studies and achieve your goals. We have a dedicated Student Engagement Centre with a team of trained advisers to help you before you arrive, while you settle in and then throughout your studies as required.

Additional academic support
Our dedicated Centre for Academic Writing (CAW) is on hand to provide guidance on all your writing tasks throughout your degree, including your dissertation or final year project. CAW offers face-to-face and online writing tutorials, as well as writing development workshops and Add+vantage modules.

Whatever your degree, if you need any help with statistics or mathematics, then our support centre, sigma, is open throughout term time and for several weeks during vacations. You can call in for advice, make appointments online or sign up to courses to develop skills in statistics, numeracy and the use of SPSS statistical software.

Welfare support
Our Health and Wellbeing team includes welfare officers, counsellors and mental health advisers who provide support for a range of issues, such as health or relationship concerns. Services are confidential and, following an initial assessment, students may be offered one-to-one counselling or referred to specialist external organisations.

Our Disability Support team provides guidance and assistance to disabled students from the point of application through to graduation. We offer support to students with a variety of disabilities including: Specific Learning Difficulty (Dyslexia); Physical and Sensory Disabilities and Aspergers (Autistic Spectrum).

www.coventry.ac.uk/welfare

The Spirituality and Faith Centre is located at the heart of the campus and is a warm, safe environment for all students and staff, whatever your beliefs. Facilities include a multi-faith meeting room, chapel, Muslim prayer rooms (with ablution facilities), lounge, multi-faith library and kitchen. Private appointments can also be made with our multi-faith chaplains.

The Lanchester Library
Open 24 hours a day, 364 days a year, the Lanchester Library offers a range of study environments across five floors. There are workspaces for silent and individual study as well as quiet and group areas, and bookable rooms. Incorporating our Disruptive Media Learning Lab (DMLL), we aim to inspire and challenge our students to think and act differently when studying, offering experimental learning areas such as The Grass and The Hill.

The library also houses the university’s IT Tech Bar along with 1,400 individual study spaces and more than 500 computer workstations, as well as free laptop loan. Wi-Fi is available throughout the building. You will also have access to more than a million learning resources at your fingertips, from ebooks and ejournals to print and multimedia resources. A team of dedicated academic liaison librarians are available to provide you with specialist help and support. They work in conjunction with course tutors and provide both class teaching and one-to-one appointments. Together with our enquiry services, we aim to ensure that you have everything you need to support your study.
Getting to Coventry

Coventry is an easy city to reach, thanks to its central location and excellent transport links.

Coventry railway station is just a 10-minute walk from campus and currently operates regular services on routes including Birmingham, London, Manchester, Leeds and Bristol, as well as to local stations.

The main coach and bus station is right on the doorstep of the campus, with regular services to both local destinations and cities across the UK.

The university is just a 15-minute drive from the M6 and M69, and less than 20 minutes from the M42 and M40. There is also a student car park on campus that costs just £2 to park all day.

Birmingham International Airport is just a 20-minute journey by road or rail, with other airports also easily accessible due to Coventry’s central positioning geographically.

If you live locally, then you also have the option of walking or cycling. There are plenty of sheltered bike-locking areas on campus. You can download local cycling maps and plan your journey by visiting www.coventry.gov.uk.

Coventry University Students’ Union (CUSU) is run by students for students – to help you make the most of your time at university.

When you enrol at Coventry University, you automatically become a member of CUSU and so gain access to a year-round programme of events, campaigns, support, representation, advice and personal development. From Freshers through Black History Month, Volunteering Week, Varsity, One World Week, Comedy Festival and Feedback Weeks, the Students’ Union is there for you.

CUSU supports more than 200 sports clubs and societies, all run by students. Joining a club or society is a great way to meet new people and spend time doing things you’re passionate about*.

Sports clubs
Our sports clubs range from football, netball and rugby to taekwondo, snowboarding and even e-sports. We have an elite performance programme for our top clubs and athletes, and participation opportunities for all. There are also a growing number of disability sports clubs where those with a disability can volunteer, train and compete. See page 33 for more information about Sport at Coventry University.

Societies
Societies cover culture, performance, music, literature, politics, skills, networking, academia and more. If you have a passion or interest, it’s quite likely that there is a society for it or, if not, you can always start your own. Music societies range from the DJ, MC and Producer Society to Music Theatre and wind band. Cultural societies span more than 30 countries and regions. Student Media gives you the chance to work on its radio, TV or news platform. There are also societies for flying drones, photography, gaming, fashion, vegetarian food, book club, language exchange, ballet, your course, your faith and many more. A full list of societies is available on the CUSU website: www.cusu.org.

Volunteering
The Students’ Union works with a range of groups to provide volunteering placements to students in local schools, community organisations, and charities. There are opportunities for ongoing placements and one-off ‘Make a Difference’ days. Your placement can even contribute to your degree.

Support and community
The Students’ Union provides support and advice around housing, money, safety, mental health and your course. Academic and service representatives (all students) feed your views on teaching and learning back to the university, and the Students’ Union ensures those views are heard by those able to make changes to your academic experience. The Advice Centre offers year-round, free, independent and confidential advice on housing, money and academic issues.

There’s also the Housing Fair to help you have a good residential experience, Student Wardens building positive relationships with the local community and many other campaigns (including regular visits from some very cuddly lambs).

Personal development
The Students’ Union really is run by students. There are opportunities to run your own club or society, lead on campaigns, be an academic representative or even take a full-time paid role as one of our sabbatical officers.

All the experience gained in these roles and others can be put towards the Leadership Award, a formal recognition of the skills and expertise you’ve developed alongside your degree which can help ensure that your extra-curricular activities continue to provide lasting benefits beyond your time at Coventry University.

For more about everything that the Students’ Union offers, just visit www.cusu.org.

www.cusu.org

*Some societies and sport clubs charge a fee for membership.
Whatever your aim, interest or ability, there is something for you at Sport Coventry.

Sport Coventry, a collaboration between Coventry University and Coventry University Students’ Union (CUSU), is designed to support, develop and promote success in all areas of university sport. We provide a range of opportunities and activities, aimed at all levels and abilities.

You could choose to get involved at the level that’s right for you, from trying something new to representing the university competitively. We have over 50 sports clubs, many of which compete in the British Universities and Colleges Sport (BUCS) leagues and individual competitions. One of the highlights of the student year is our annual Varsity tournament where our teams compete against local rivals from the University of Warwick.

Team Phoenix

Sport Coventry’s “Team Phoenix” programme was established to enhance the sporting experience and performance of our flagship teams. Qualifying clubs have the opportunity to apply for extra resources and additional support, from professional expertise to funding. As part of the Team Phoenix programme, we bring in the best coaching talent possible to ensure continuity and long-term success for our clubs. The programme provides a challenging and competitive environment that aims to develop our athletes’ abilities, provide confidence and self-awareness, that could lead them to success in the sporting arena and beyond.

Sports Scholarship award

If you play sport at a high level, you may also be interested in applying for our Sports Scholarship award. It provides both a cash bursary and tailored support to help you balance the demands of performance sport and life at university. You can find out more by visiting www.coventry.ac.uk/sportsscholarships.

Fitness

Our large, modern fitness suite contains a variety of cardiovascular and resistance machines, free-weight equipment and a functional core area to help you stay fit and healthy. Our professionally-qualified fitness team can provide you with a free induction, a personal training plan, and any tips or advice that you may need.

Indoor

Previous students have taken advantage of our indoor sports halls and you could participate in five-a-side football, basketball, badminton, table tennis and more. Playing team sports is a great way to meet new people as well as staying fit and healthy. If you want to join a team and/or play at a recreational level, our Active Sport programme supports a number of leagues, games and tournaments*.

Outdoor

Outdoor sport facilities, including several full-sized football, rugby and hockey pitches, an artificial grass pitch and a cricket strip, are just a short bus journey away at The Place in Westwood Heath. This is where many of our Team Phoenix sides play their home matches against other universities.

High-performance

We also have a brand-new high-performance suite designed to support the physical training needs of athletes across a wide range of sports. This is managed full-time by two UKSCA-accredited coaches. Our on-site physiotherapy clinic can assist students with any sport-related injuries*.

*Fees apply.

www.coventry.ac.uk/sportcoventry
Accommodation

Make the most of your time at university by living near to campus with other students.

Coventry offers a range of accommodation options, all designed to meet your needs. University-owned, managed and partner options are available. All first-year applicants are guaranteed a place in university accommodation if they hold a firm offer with the university and apply on time for accommodation by the guarantor deadline. See the accommodation section on our website for terms and conditions.

Future Lets

Our accommodation service, Future Lets, takes the stress out of moving away from home by helping you find a place that suits your needs and your budget.

Future Lets manages accommodation in all of the university-owned developments as well as in halls owned by partner providers and private lettings in Coventry. All Future Lets accommodation is located either on campus or within walking distance of the university and city-centre. Available accommodation includes rooms with en-suite or shared bathroom facilities in catered or self-catered halls, studios and apartments and houses.

Catered accommodation

If you would prefer to live in a hall of residence where meals are provided, the university’s Priory Hall provides breakfast and dinner every weekday.

Priory Hall – This is our oldest hall, but has been modernised and extensively refurbished to a high standard. It is a popular choice due to its campus-central location, social atmosphere and proximity to the city-centre. It also boasts unrivalled views of the historic Coventry Cathedral. Residents of Priory Hall have catering provided for them in The Hub in the centre of campus, from Monday to Friday.

Self-catered accommodation

Providing the peace of mind of living in university-owned accommodation, yet with the independence and communal atmosphere of a flat share, we have a range of halls from which to choose.

www.coventry.ac.uk/accommodation

The Cycle Works – This centrally-located hall provides a lively community feel and is near to all the cultural and social activities that the city-centre provides. With sports facilities and shops within easy walking distance, The Cycle Works is a great base for your time here at Coventry University.

Singer Hall – Located close to the city-centre and local amenities, Singer Hall is perfectly positioned for student life. Singer Hall is also close to the main campus and library.

Bishop Gate – Our latest accommodation, Bishop Gate, is a development that has been built with the student experience at the forefront. It features an on-site gym, TV room, private dining room, study rooms and social spaces.

Godiva Place – Opened in 2016, Godiva Place has a modern interior and exterior design. There are a range of rooms available from cluster en-suite flats to studios and ‘twudios’. These halls feature an open space social space, study areas and cinema room.

Other halls of residence

We partner with a range of private accommodation providers with facilities that are close to campus. Visit our website for more information.

Private lettings

Future Lets makes it as easy as possible for you to find private accommodation in and around the city-centre, including rooms to rent, houses and apartments. We work with approved landlords to provide students with the best private accommodation in Coventry.

ResLife

The Residence Life programme (ResLife) is run by Partner Providers and private lettings in Coventry.

Pricing

A guide to catered and self-catered accommodation fees can be seen on page 37. Please note that these fees relate to the 2020/21 academic year and are intended as a guide only. Check the website for up-to-date information.
A guide to our accommodation fees*

**Catered single room**
From £5,070 (39 week contracts)
Catered accommodation. Rent includes 10 meals per week, utility bills, contents insurance, gym membership and ResLife programme.

**Catered single room with en-suite**
£5,285 - £6,513 (40-44 week contracts)
Self-catered en-suite accommodation. Rent includes utility bills and contents insurance. University-owned properties include gym membership and the ResLife (ResLife) programme.

**Self-catered single room**
From £4,290 (39 week contracts)
Self-catered accommodation. Rent includes utility bills and contents insurance. University-owned properties include gym membership and the ResLife (ResLife) programme.

---

*Please note that these fees relate to the 2020/21 academic year and are intended as a guide only. Please check the website for up-to-date information.

[www.coventry.ac.uk/accommodation](http://www.coventry.ac.uk/accommodation)
International students

Welcoming international students
Coventry University is a truly global university. We currently have more than 13,000 international and EU students studying with us in the UK and have welcomed students from over 160 different countries. We also have over 17,000 students studying our degrees in partner institutions around the world.

We offer a range of support and activities to help international students to settle in quickly, including an airport transfer service and dedicated orientation events during enrolment.

International Office team
Many members of our International Office have lived and studied overseas themselves. They can help you to immediately feel at home as they understand how differences in language, culture and education systems affect anyone who wants to enjoy international study.

Support starts from the moment you consider studying with us. We can answer questions on a range of subjects, including visas, immigration, finances, employment regulations and culture.

We will stay in contact with you throughout the application process, sending updates to make sure that you have all the information you need to start your course. We have local offices in many countries ready to talk to you in your own language and at a time that works best for you.

Top-up courses
If you have already successfully completed Years 1 and 2 of an equivalent course (or have successfully completed a foundation or HND degree), then a top-up course is a great way to increase your employability and secure a full qualification at degree level.

These courses are studied full-time over one year and are offered at both Coventry University and Coventry University London.

For more information about top-up courses, please see page 136.

Scholarships
Coventry University offers a range of scholarships to help talented students with the financial costs of their education. You may be eligible for a scholarship on the basis of your academic achievements, the course you want to study or the country you are from. Many scholarships will help you meet the financial costs of your tuition fees when you study with us.

Check your eligibility for each scholarship by visiting www.coventry.ac.uk/internationalscholarship.

How to apply
Applying to Coventry University is a quick and easy process. You can directly apply online from any course page on our website. Alternatively, you can download an application form and return it by email.

You can find out more about how to apply by visiting www.coventry.ac.uk/international-apply.

IELTS
You are likely to need a minimum IELTS score of 6.0, or an equivalent English language qualification, for entry onto our undergraduate courses. To help you achieve this, we offer Pre-sessional English courses*. Courses range in length from five to 30 weeks, depending on your existing level of English proficiency.

To learn more about our Pre-sessional English courses, please visit www.coventry.ac.uk/pse.

Investing in the future

As a fundamental element of our corporate strategy, Coventry University continues to invest heavily in its future. We believe that if our students commit to make us their chosen place of learning, then we need to give them the very best facilities possible when they arrive.

The investment in infrastructure underpins the excellence of our activities, offering world-class spaces for student education, research and enterprise. With this happening, we can continue to drive organisational performance and output through digital and technology-led transformation to support and improve our core pillars of student experience, teaching and learning, research, and enterprise capability.

Coventry University as a Group is committed to investing in excess of £400 million pounds over the next ten or so years, including some very significant projects, some of which have recently completed, some are in progress and some are due to start in the coming year or so.

In 2019, we started work on some major projects to help further enhance our campus network for our students, staff and visitors. A number of demolitions have taken place or are in progress, including the James Starley building as well as the former Civic Centre. This will enable the development of new, modern spaces, with significant funds being invested in the coming years to further improve the working environment for both students and staff. This will address emerging expectations in student experience and research.

The new Beatrice Shilling building opening early 2020 links to the existing engineering and computing building with an elevated glass walkway. Students have also taken up residence in our newly-opened student accommodation buildings, Bishop Gate and Godiva Place, which have together provided 1,500+ new bed spaces.

To further improve your campus experience, we are in the middle of fully reviewing our catering facilities city-wide. New cafes are open in three buildings for students, staff and visitors, while existing catering provision at other locations has been refreshed and improved.

We are committed to environmental responsibility and sustainability and have improved the library with brighter and more energy efficient lighting.

We have also renewed our energy centres in three of our main buildings to reduce our consumption and carbon footprint. It remains key that our buildings create spaces which support an enhanced student experience that is innovative, collaborative and enables new methods of learning.

The old James Starley building is being demolished to make way for the fabulous new Starley Gardens by late 2020. Inventor of the Penny Farthing and the Coventry Tricycle, James Starley is generally regarded as the father of the modern-day bicycle industry. Named after him, this eco-friendly landscaping scheme will benefit students, staff and the wider community, by providing a tranquil zone that promotes wellness in the heart of the campus and Coventry city-centre. As well as opening up the whole area, the new gardens will maximise the view of Coventry Cathedral from other university buildings.

The university has begun work on a significant long-term project to transform the site of former Coventry City Council buildings into new university buildings, over a number of years. Demolition started in 2019 and redevelopment of the site is in progress. The final plans retain parts of the old Grade II listed Civic Centre II building which will be incorporated into the design of the new building. The medieval vaults, at basement level, which are also Grade II listed will be integrated into the building and used as part of the new facilities.

The current Art and Design and Humanities buildings are also being reworked, which will result in a modern and all-encompassing “super” building, due by late 2021.

At Coventry University London, the recently-opened Cutlers Exchange in Devonshire Square gives an extra 20,000 square feet of new teaching spaces, a Postgraduate Centre, a Financial Suite, seven new collaborative working spaces and a new event space. The facility features the latest technologies including Bloomberg terminals, computer and IT labs, and a Standard and Poor’s Market Intelligence Suite. All students at Coventry University London benefit from the extra studying and learning space as well as the break-out areas, while postgraduate students also now benefit from their own dedicated centre and facilities.
Coventry choices

In addition to our Coventry University offering, we provide a large number of alternatives as part of the wider Coventry University Group*. For instance, you could study in the heart of the City of London at Coventry University London. Alternatively, our CU options could provide you with the opportunity to study towards a Coventry University award in a more flexible and affordable manner at any of three locations in Coventry, Scarborough or London.

Located on the outskirts of the Coventry University campus in the heart of the city, you will find everything you would expect from a vibrant ultra-modern city. We’ve invested heavily in a new £33m campus exclusively for CU Coventry students, which opened in March 2019. This modern and inspiring learning space accommodates up to 3,000 students, and features teaching rooms, IT suites, engineering and science labs, a moot room (mock law court) and a café, as well as extensive breakout areas for social learning to make teaching more flexible.

www.coventry.ac.uk/cuc

CU Scarborough is our campus on the Yorkshire coast. In Scarborough, you’ll find everything you’d expect from a vibrant town by the sea, plus a whole lot more. Scarborough is a remarkably beautiful place to study; there are the beaches, the North Yorkshire Moors and even a medieval castle guarding the town. CU Scarborough students have access to all the facilities needed to support their studies and student life, all located in a new £14m purpose-built seaside campus. To make things even better, nearly everything is within walking distance.

www.coventry.ac.uk/cus

Based in Dagenham and only 14 miles from central London, our campus is well located. The closest Tube Station is Dagenham Heathway. Our campus borders Eastbrookend Country Park, a beautiful expanse of greenery and lakes. Also, nearby are the Wantz Boating Lake, sports grounds and supermarkets. Being a student and living this close to the City of London means you will be able to soak up all that the capital has to offer, from international cuisine to cultural activities, allowing you to grow on a personal level as well as academically.

www.coventry.ac.uk/cul

Located in central London, just minutes away from the Bank of England, the London Stock Exchange, and the offices of numerous world-leading organisations. Specialist facilities include a Trading Floor equipped with Bloomberg terminals, a Standard and Poor’s computer suite, an Enterprise Hub and a fashion studio.

www.coventry.ac.uk/london

Coventry University London currently only offers postgraduate courses that you can study towards a Coventry University award. It is located in central London, and students can gain work-related experience, from business simulations to placements.

www.coventry.ac.uk/online

Provided through the FutureLearn virtual learning environment, all students have full online access to our teaching, tutor support and all the study materials they need. All of your lectures and assessments take place online too, so there is no need to attend one of our campuses. Upon successfully completing the course, you will graduate with the same degree as an on-campus student.

www.coventry.ac.uk/globalpartners

*For the purposes of this prospectus, the Coventry University Group means Coventry University, Coventry University London Campus Limited (trading as Coventry University London) and Coventry University College Limited (trading as CU London, CU Coventry and CU Scarborough), as well as Coventry University Online Limited.

**Why Accounting and Finance at Coventry?**

Whether providing vital financial performance information to businesses as an accountant or buying and selling securities as a stockbroker, studying an Accounting and Finance degree could open up a wealth of career opportunities. At Coventry, our focus is on helping you to unlock these opportunities with courses that aim to give you the professional skills and knowledge required to succeed, with a focus on developing your financial acumen, commercial awareness, and decision-making skills.

**Global opportunities**

You may have the opportunity to enhance your degree with our international experiences (fees and visas may apply). Previous trips include International Tax Week in the Netherlands, where students had the opportunity to develop global business skills, and visits to partner universities in South Korea, Spain and the USA.

**Specialist facilities**

Accounting and Finance students could access the Trading Floor, one of the largest academic trading floors in Europe. It features 42 dual-screen Bloomberg terminals and offers a hands-on experience of trading stocks and shares using industry-standard tools.

There is also opportunity to gain professional Bloomberg or Thomson Reuters certification through work on the Trading Floor (subject to availability).

**Possible careers**

For graduates of a Finance degree, possible careers include positions in financial advice firms, investment funds, commercial banking and investment banking; while for Accounting graduates, there is the opportunity to become a Chartered Accountant (additional fees, study, memberships and/or qualifications may apply).

**Further information**

Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

---

The teaching style at Coventry is unique, and it is very easy to contact tutors to arrange meetings with them.

Why Economics at Coventry?
Almost every aspect of modern society is influenced by economic policies, from the taxes we pay and the price of anything we buy to the stability of our government and the demand for products and services. Economics affects us all – whether it is as students, parents, consumers, workers, politicians or investors.

Our economics courses share a common first year, which aims to give you the opportunity to gain a grounding in economic concepts and principles, while deciding what area of economics most interests you. You can then focus on that area, moving between our economics courses upon successful completion of your first year (for international students, course changes are subject to Tier 4 approval).

Business Economics will help you to develop your application of economic principles to situations related to commerce and enterprise, while touching on current issues faced by businesses, such as globalisation, technological advancements and increased customer expectations.

If studying Economics, you will have the opportunity to develop an understanding of key economic concepts and their practical real-world applications, while engaging with contemporary economic debates and issues.

Studying Financial Economics will seek to deepen your understanding of the role financial systems and markets play in the modern world, both in the UK, which remains one of the world’s prominent financial centres, and within an international context.

Global opportunities
Through our links with institutions across Europe, Asia and America, you may have the opportunity to enhance your degree with international experiences (fees and visas may apply). Previous students have attended an annual economics students meeting in Poland, as well as experienced exchanges with partner universities in Germany and China.

Possible careers
As well as offering various economics degrees which provide highly sought-after economic analysis skills, our courses also give extensive exposure to how businesses and other organisations operate in different markets and contexts. Recent economics graduates have entered careers including derivative traders, swaps analysts and marketing managers, with a range of prestigious employers including the Bank of England, the Government Economic Service, Vodafone and HSBC.

Further information
Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

The course is beyond my expectations. I’m studying a subject I love, as well as gaining an abundance of skills.

Milena Damjanovic
Business Economics BA (Hons)
Art, Design and Fashion

Subjects in this section:
Architecture, Automotive, Interior and Product Design
Art and Design
Fashion and International Fashion Business
Architecture, Automotive, Interior and Product Design

Why Architecture, Automotive, Interior, and Product Design at Coventry?

Our subjects aim to blend creative and artistic with strong technical footings. We look to give you chance to explore, create and learn how to design innovative structures and products that deliver a rich user experience. We rank 5th in the UK for Architecture (Guardian University Guide 2020).

Architecture aims to challenge you intellectually and creatively, with a course blending technical and artistic skills in designing new spaces and buildings around our everyday lives and needs. With a focus on communication, context and imagination, we use a hands-on approach to learning.

Automotive and Transport Design is an award-winning course with a prestigious history of successful alumni. During the course you will work on innovative live briefs set by industry professionals and learn from people working at the forefront of automotive design.

Interior Architecture and Design aims to give you the chance to explore spatial design at its most innovative. The course gives you the chance to develop your technical knowledge and understanding of volume and space, light, function and use.

Our Product Design course aims to teach you to future-proof design innovations with forward-thinking design methodologies. We look to equip you with a range of skills, giving you opportunity to create all types of product — from wearable technology to luxury aircraft seating.

Specialist facilities

Our long-established and highly regarded degrees seek to equip you with a broad range of skills from drawing and sketching, to visually communicating and presenting design concepts. Our students have access to brilliant facilities, including robotic milling, laser cutting, rapid prototyping, 3D printing and excellent clay modelling facilities.

Possible careers

Our Automotive and Transport Design students have helped design many of the vehicles in circulation today for employers ranging from Aston Martin and Jaguar Land Rover, through to VW and Volvo. Our designers have gone on to work for companies including Imagination, GMP Design, Furnish Interior Design, India Jane, Creation Shopfitters and HÅLLNING.

Employability support

Our annual end-of-year Degree Show, which is open to the public and guests from industry, could give you the opportunity to showcase your work and potentially launch your career. Our students also exhibit their work externally in London at the New Designers event, allowing them to showcase to potential employers.

Why Art and Design at Coventry?

We’ll support your creative ambitions and you’ll have opportunities to share and develop your ideas with professionals in your field of work.

Our staff are creative practitioners within the fields of illustration, animation, contemporary art, design and music. Their highly-acclaimed work includes the Guardian award-winning online comic series Dawn of the Unread, creative projects for the Cultural Olympiad London 2012, exhibitions at Bangkok Cultural Arts and Cultural Centre, as well as other exhibitions and performances of work at galleries such as the MAC, Aspex, BMAG, the Herbert, the Ethnographic Museum, Krakow and the ICA.

It’s an exciting time to study the arts at Coventry. Our city has been named as the UK City of Culture 2021, which marks the beginning of an incredible few years of culture and celebration. Coventry University students, on these courses, will have the opportunity to be involved in this work as part of our cultural strategy.

Foundation Art, Design and Media Practice aims to enable you to explore and experiment across a wide range of creative disciplines. It is a one-year full-time preparatory experience to prepare you for studio-based, undergraduate higher education programmes.

Our practice-based Fine Art course aims to challenge and inspire you, developing the creative, technical, critical, reflective and enterprising skills to help you forge a successful and sustainable career in contemporary art.

Developed in conjunction with games industry employers like Radiant Worlds, our exciting Games Art course is designed to help equip you with the distinctive skillset required to be a successful games artist – integrating art school training with games technology know-how and familiarity.

While studying our Graphic Design course, you’ll be challenged to come up with creative solutions to engage, instruct and entertain all types of audiences, depending on both the business and the brief, expertly adapting your designs to suit a full range of print and multimedia platforms.

We have become like a family on this course. I can go in and ask questions, get honest feedback from my peers and rely on them if I have any trouble.

Dilyana Valtchanova
Games Art BA (Hons)
Art and Design (continued)

Our ambitious Illustration and Animation course aims to help prepare you for the challenges of a globally-competitive world. As visual platforms continue to dominate the media, there is a growing demand for artists to be able to interpret and capture our environment in newly eye-catching and imaginative ways.

Harnessing your creative skills and turning them into exciting career prospects is our aim on the Graphic Design course. Supported by industry-standard software, a broad range of workshops and dedicated studio space, this popular course aims to help prepare you to work in the growing contemporary field of graphic design.

Possible careers
Graduates have gone on to work for a number of well-known companies including Image+, the Royal Shakespeare Company, Rocksteady Studios, Marvel Studios, Müller Dairy, McDonald’s, and Saatchi and Saatchi. Many of our alumni pursue careers as exhibiting artists or become curators at museums and art galleries. Some of our graduates have progressed to postgraduate study here on our suite of MA courses, while many others have attended a range of institutions including the Royal College of Art.

Global opportunities
Over the past few years, we’ve offered exciting international study placement opportunities in the schools of Art and Design at institutions in Sweden, Germany, Spain and Finland. Our students have also gone on study trips to Berlin, Venice and Paris (fees and visas may apply).

Employability support
We celebrate our students’ creativity and craftsmanship at our annual end-of-year Degree Show. Open to the public and guests from the creative industries, these events give you a valuable platform to showcase your work and potentially launch your career.

Further information
Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

I was a nurse for 30 years and had wanted to complete a formal art qualification for a while. The range of facilities and the skill set of the tutors at Coventry are great.

Sue Hadlum
Foundation Art and Design Diploma
Fashion and International Fashion Business

Why Fashion and International Fashion Business at Coventry?

Fashion is a fast-paced, dynamic and evolving industry that’s fuelled by society, technological advances and future markets.

Our fashion and textiles students are award-winning too; successes include Ren Wong being crowned Young Designer of the Year 2016 at the Clothes Show Live and Natasha Smith winning Emerging Designer of the Year at the Midlands Fashion Awards 2017.

Our fashion courses aim to focus on design, trends and market influence, aiming to give an understanding of the global nature of fashion design. We place a strong emphasis on employability throughout our courses to help you develop the skills you need to have a successful career in the fashion world.

Our International Fashion Business students work alongside our Fashion students developing concepts on retail spaces, branding and visual merchandising. Our students look to future-proof and lead the fashion and textile industry by addressing global issues like sustainability, fair trade and other ethical issues.

Global opportunities

Previous students have attended Berlin Fashion Week and Premiere Vision (the largest European fashion, accessory and textile trade show) in Paris for inspiration and to gain an insight into the scale of the industry they’re entering. Fees and visas may apply. Former students have also travelled to London to visit exhibitions and retail environments.

Possible careers

Recent graduates from these courses are employed in a range of professional environments and companies including Kelly Hoppen, Belle International and Fresh Ego Kids, Sainsbury’s Tu, Asda George, Annie Greenabelle for Topshop, Beyond Creative, Claire’s Accessories, ASOS, New Look, Primark and United Clothing. Some of our graduates have gone on to start their own businesses or become freelance photographers, stylists or make-up artists.

Employability support

Past graduates have gone on to become highly successful entrepreneurial designers as well as working for leading national brands. Our fashion courses foster a collaborative approach to learning and you’ll work closely with other students recreating industry live projects. Our students have the chance to exhibit externally at highly regarded London shows like London Graduate Fashion Week and New Designers.

Why Business and Management at Coventry?

Businesses need brilliant minds. With a track record for business education that spans more than 50 years, our courses provide you with a great opportunity to prepare for the real world by giving you the chance to learn about a variety of business disciplines. Whether you’re interested in management, operations, logistics, or entrepreneurship, we can help you develop your business acumen and international outlook.

Our Business Administration course aims to reflect business thought and practice with a focus, where appropriate, on the application of theory to real business issues. Our aim is to provide you with a business degree, on successful completion of your course, that should equip you for that equips you for careers in local, national or international markets.

A business is only ever as good as its people, and all businesses need good people. Our Business and Human Resource Management course is currently accredited by the Chartered Institute of Personnel and Development, and has a focus on practice-led learning, giving you the opportunity to develop a solid understanding of people management alongside other key business functions.

Do you see yourself as a future business leader, keen to understand how businesses solve problems and tackle risks? If so, our Business Management course provides you with the opportunity to develop a grounding in business management theory, skills, tools and techniques, before specialising in one of our focus areas covering supply chain management, leadership, or global practice. The course also benefits from the prestigious EPAS accreditation, recognising our focus on helping you develop the skills needed for your future career.

One of the many things that attracted me to my course was the accreditations that it came with, along with the university’s facilities.

James Boon
Business Management BA (Hons)
Business and Management (continued)

Designed with a specific focus on business in a European context, our European Business Management course gives you the opportunity to gain experience of doing business in a variety of European countries.

Year 1 is spent studying with a partner institution in either Finland, Germany or Spain while Year 2 is spent in Belgium, with the final year being studied in Coventry. There is also opportunity to apply to enter the course directly in the final year. Please see the course web page for details on application routes, visa requirements, etc.

Aimed at students with a keen interest in creating their own entrepreneurial venture or project alongside academic study, our Enterprise and Entrepreneurship course has creativity at its heart, and offers you the opportunity to develop your personal entrepreneurial skills through dedicated modules, as well as explore enterprise in-depth through a final-year research project.

International businesses now touch the lives of almost everyone across the globe; it is therefore important for anyone working in business to have a strong cross-cultural understanding. Our International Business Management course aims to develop knowledge and practical skills regarding the international business environment, including the cultural aspect of how to conduct business around the world.

Global opportunities
You have the opportunity to enhance your personal development and employability prospects with our international experience opportunities (fees and visas may apply). Previous field trips have included Cape Town, Doha, Prague, Miami and Cuba, while students have also engaged in Online International Learning projects with partners across Europe, Asia and the Middle East, including DFDS Logistics, a Swedish logistics firm.

Specialist facilities
Our business students have access to our Business Simulation Suite, which utilises simulation software to give you the opportunity to improve your business skills through hands-on learning. You could be tackling decision-making problems in our Strategy Lab or pitching your ideas in our Boardroom Simulator – both designed to help smooth your transition to the real world of business.

Possible careers
There are a wide range of possible careers available for Business and Management graduates, with graduates having an excellent foundation to move into a variety of roles, from management and HR, to advertising and marketing, and to work for companies in a wealth of different sectors.

Further information
Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

The thing I enjoy most about my course are the current, relevant industry examples that my lecturers use to explain the topics.

Sabrina Tamang
International Business Management
BA (Hons)
Why Law at Coventry?
Studying Law can sharpen the mind, build an analytical skillset and develop problem-solving abilities – qualities that are not just valued in the legal field, but in business too. We’ve been teaching law for more than 50 years and, by studying a law degree with us, you will have the opportunity to benefit from this wealth of experience.

Our Law LLB (Hons) course gives you the opportunity to gain the foundations of legal knowledge in Years 1 and 2, before being able to specialise in a specific area of law through our final-year pathways: business law, trade and finance law, international law, criminal law and justice, and social justice. We also offer a final-year pathway that allows a broader approach to legal study. This means you have the flexibility to gain a crucial grounding in law before deciding to specialise in an area that particularly interests you, or matches your career aspirations.

We are also proud to be able to offer students a powerful professional element to their learning through our Coventry Law Centre Legal Clinic. This service gives our current law students the chance to gain valuable experience working alongside practising lawyers, from a leading law firm’s pro bono department, to offer free legal advice to people from the local community.

Specialist facilities
Located in the Law School’s George Eliot building, our mock courtroom (or Moot Room) provides students with the chance to practise their legal skills in a realistic environment. You could have teaching sessions in the Moot Room, as well as the opportunity to get involved in our annual mooting competition, complete with gowns and wigs.

Global opportunities
Coventry Law School, as a member of the International Association of Law Schools, is proud to have an international outlook, offering many global opportunities for students to enhance their learning experience (fees and visas may apply). Previously these have included Online International Learning projects, which have seen students work collaboratively with peers in our partner institutions, and field trips which have either been related to a module or offered to all law students. Recent field trips have included the Hague in the Netherlands, the site of the International Court of Justice, plus Nebrija University in Madrid and Stellenbosch in South Africa.

Possible careers
Law graduates can pursue a variety of careers, including becoming a barrister, practising lawyer, solicitor or teacher. Some of our recent graduates have gone on to work for PwC, the Crown Prosecution Service and a variety of international law firms. The skills learned on the course are also transferable to a variety of career paths outside of law, such as recruitment, management and accounting.

Further information
Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

The staff at Coventry University are really approachable, friendly and helpful. You can feel the genuine interest they have in you as a student.

Theophila Akpenyi-Hilary
Law LLB (Hons)
Marketing

Why Marketing at Coventry?
Marketing plays a massive part in our everyday lives – and is present in most exchanges of goods and services. This is true whether you are buying a new pair of jeans, having your hair cut or discovering the best coffee in town.

Marketing is a core function in all organisations, whether they operate for profit or not. Organisations constantly need to design (and re-design) products and services to meet our ever-changing needs and wants. It is therefore key that organisations understand these needs and wants to be able to develop creative and effective methods to communicate with existing or potential customers.

Our marketing courses aim to give you Chance to develop knowledge and expertise in different areas of business and marketing. They will allow you to choose a particular facet of marketing, from how to manage the entire marketing process to more specific parts of marketing, such as advertising, digital marketing or market research.

By studying a marketing course with us, upon successful completion of your course, you could benefit from our membership of the Chartered Institute of Marketing’s Graduate Gateway programme, giving you the chance to gain a professional qualification or award alongside your degree, with our courses mapped to provide exemptions to CIM modules (additional fees apply). Our Advertising and Marketing course also has EPAS accreditation that helps to assure the degree’s vocational relevance and further embeds creativity and innovation in the course modules.

Global opportunities
There is also the ability to enhance your degree with international opportunities (subject to availability, application, additional costs and meeting applicable VISA requirements). Recent students have worked with peers in Malaysia, Singapore and the Netherlands, while others have visited Belgium and Dubai to take part in marketing activities in international teams.

Specialist facilities
Designed to be used by our marketing students, our DigiComm Lab is equipped with industry-standard software and devices. Here, you can get to grips with the Adobe suite, Behance and Wordpress, and be taught in a collaborative environment designed to replicate working in a real-life marketing or advertising agency.

Possible careers
As a successful graduate from one of our marketing courses, you should be well equipped to take up a variety of roles within the sector, such as marketing manager, copywriter or social media manager. Our graduates have gone on to have successful careers in a variety of organisations including Nike, Microsoft, Goldman Sachs and L’Oréal.

I love how my lecturers will explain a theory to us, and then ask us to apply it to a real-world situation.

Annaleigh Dixon
Advertising and Marketing BA (Hons)
Why Sport and Event Management at Coventry?

Coventry is a great place to study either Event Management or Sport Management. We were the European City of Sport in 2019 and have also been named the UK City of Culture 2021, with an extensive programme of large scale events planned throughout the year and beyond.

It’s not only the city receiving accolades; our courses are too, with both Event Management and Sport Management being ranked 3rd in the UK by the Guardian University Guide 2020, as part of its Hospitality, Event Management and Tourism cluster.

Our experience in teaching and researching event and sport-related subjects goes back 30 years. As the sectors have changed, so too have our courses – to reflect the needs and demands of both students and industry. They are courses with a strong applied management focus, with numerous links to industry, taking place in a city and region which continues to have many large scale events, such as the ones mentioned above.

Our Event Management course is designed to help prepare you for the fast-paced and exciting events industry, with a strong focus on solving real-world working problems. Alongside combining the study of events with management theory, you will have the opportunity to develop your knowledge and skills relating to project management, a key skillset for graduates looking to build careers in this sector.

Our Sport Management course aims to teach you about management in the sports sector, offering opportunities to gain practical experiences, learn from practitioners, and grow your own professional network.

We are particularly proud of our many industry links that can provide various work experience opportunities, application of theories and guest lectures.

Global opportunities

You will have the opportunity to enhance your degree through a variety of international experiences (subject to availability, application, additional costs and meeting applicable VISA requirements). These can range from international field trips, collaborative study activities with students based overseas or studying at another institution for a year. Examples of past visits include trips to Seville, Berlin, Amsterdam and Kuala Lumpur, to name but a few.

Possible careers

Successful graduates from these courses should be equipped to thrive not only in their specific sectors, but also in marketing, business or general management. Our graduates have gone on to work in a variety of leading sports and events organisations, such as the NEC, the Ricoh Arena, Chelsea Football Club and the ICC.

Employment support

To ensure you are able to gain practical experience in the sector, students may be given opportunities to engage in a volunteering activity or work experience at local, national or international event venues and sports teams, with previous students volunteering at large scale concerts, such as Rihanna at the Ricoh Arena, and at events such as BBC Sports Personality of the Year.

Jennifer Wan

Ethical Hacking and Cybersecurity

BSc (Hons)

I am amazed by the level of content delivered. Not only am I always learning, but I am striving to reach my goals with the help of lecturers and the facilities available to me.

### Why Computing at Coventry?

Our computing-related courses focus on practical applications in industry, research and everyday life. We place an emphasis on your future employability, developing a wide range of technical, analytical, design and professional skills, many of which are gained from placement experiences and practical lab sessions. Whether your passion lies in developing software, learning how to prevent cyber-attacks, creating games or mobile apps, we aim to have the right course for you.

Our Computer Science course offers a combination of theory and practice in traditional areas of computer science, including programming and algorithms, computer architecture, networking, system design and implementation. To advance your specialist knowledge and skills further, the course offers the opportunity to progress from your undergraduate degree straight to a master’s level qualification with our MSci course.

Our Computing course is a full stack developer degree, which aims to teach you the fundamental range of skills necessary to become a software developer. The course is designed to equip you with key programming, analysis and design skills including (but not limited to) back and front-end web development, internet-of-things development, user experience design, quality assurance and testing, system administration and security.

Ethical Hacking and Cybersecurity offers the opportunity to learn, identify and analyse the threats posed to modern information structures and develop the knowledge and skills to be able to advise companies on how to secure their systems. We place a strong emphasis on sound investigative procedures, logging and reporting, which is particularly suited to work within law enforcement agencies, as well as consultant organisations.

Computing (continued)

Our Games Technology course gives you the opportunity to develop your understanding of code design, testing and graphics, while equipping you with specialist skills in programming. Coventry University has access to industry-standard software, including Unity Games Engine, 3DS Max and Visual Studio. The course aims to give you a distinct advantage in starting your career, with recent graduates or internship students undertaking placements at Microsoft, Exient, Sony and Pixel Toys.

Information Technology for Business is designed to help prepare you for careers in the design, delivery and management of IT systems within a business. The skills learned could also be applicable to careers in web development, data analysis, content management, business analysis and project management. The course aims to teach you the fundamentals of software development and its application in driving business strategy and competitiveness in an international market.

A new course in 2020, Interactive Media and Web Technologies responds to an increasing demand in the creative industries for imaginative individuals with a flair for developing creative user interfaces, combined with web and media content development capabilities. Upon success completion of the course, you should have acquired the ability to integrate contemporary design with the technical skills necessary to implement complex interactive user interfaces.

Specialist facilities and support
Our specialist facilities include a CISCO lab (maintained by CISCO-certified staff), cybersecurity lab, ethical hacking lab, games technology lab, mathematics lab, Mac lab, parallel programming testbed and virtual labs.

Programming Support Centre
Our Programming Support Centre is a dedicated session for students on any computing degree to get extra support with programming. There’s no need to make a booking, just drop in.

Possible careers
The technical content of our courses is reviewed and updated to reflect what is currently important and in demand in industry. We aim to help position you for a range of employment opportunities, from software, web and mobile development to roles in user experience, database/systems administration, IT business analysis and project management.

Further information
Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

Joshua Lewis-Handley
Computer Science
BSc (Hons)

Coventry University has given me the opportunity to explore my interests in greater depth, with guidance from knowledgeable and enthusiastic lecturers.
**Mathematics, Physics, Statistics and Data Science**

### Why Mathematics, Physics, Statistics and Data Science at Coventry?

Studying mathematics could help you to develop the analytical and problem-solving skills that are in high demand by employers. Our courses aim to provide a sound theoretical foundation in core areas of mathematics, but also allow plenty of opportunities for practice-based applications, often to real problems using real data sets and industry-standard software.

Your first year aims to lay the foundation for the more advanced study of mathematics, consolidating previous learning and exploring some of the advanced concepts in algebra, calculus, statistics, mathematical modelling and numerical analysis. At the end of your first year, you can choose to study mathematics alongside statistics or physics.

Our integrated master’s in Data Science brings together a range of mathematical, statistical and computational techniques, which incorporate probability, predictive analytics and advanced modelling to extract value and make sense of multiple sets and large amounts of data.

Construction

Why Construction at Coventry?
All of the physical, built and fabricated surroundings that are needed for everyday life play a vital role in society. Training in this subject area could open up routes into an exciting, diverse and challenging career that may enable you to help shape the built environment of the future.

Currently ranked 4th in the UK for Building and Town Planning and 5th in the UK for Architecture (Guardian University Guide 2020), Coventry has been educating construction professionals for more than half a century. Today we continue to keep in step with the changing needs of industry, its technological advancements and the growing importance of its social and environmental impact.

Global opportunities
In the second year, we organise an international field trip to provide you with an opportunity to experience the built environment in another country (fees and visas may apply). In the last four years, students have attended field trips in Malta, Rome, Italy and Barcelona.

If you opt for a sandwich year, you can spend time studying abroad (subject to application and availability – additional costs and visas may apply). We currently have links with other universities in Malaysia, Oman, Canada, France, Germany, Poland and the Netherlands, which provide opportunities for student and staff exchanges and joint student projects.

Specialist facilities
Our facilities include a civil engineering workshop, composites facility, environmental chamber, hydraulics lab, materials lab, building services lab, metrology lab and the simulation centre – our interactive people training and development facility.

Possible careers
The practical nature of our courses aims to place emphasis on your future employability, developing a wide range of technical, analytical, design and professional skills, many of which are gained from placement experiences.

Possible careers could include architectural technologist, building services engineer, construction manager, construction project manager, building surveyor or quantity surveyor.

Further information
Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

The course has helped me gain a greater understanding of construction industry processes and how the other disciplines tie in with my everyday role as a site manager.

Thomas Butcher
Construction Management
BSc (Hons)
Why Geography, Energy and Disaster Management at Coventry?
From learning how historical and modern activities affect our cultural and built environment, to studying the patterns of the planet so we might predict potential hazards in the future – if you are interested in making a difference to people’s lives around the world, then we could have the course for you. With more than 40 years of expertise, Coventry is ranked as the 10th best university in the UK for Geography and Environmental Studies (Guardian University Guide 2020).

Global opportunities
All students are given the opportunity to complete an overseas field trip as part of their studies (subject to availability – additional costs and visas may apply). In recent years, students have visited China, Taiwan and Italy to observe and evaluate emergency management approaches or understand the measures that can be taken by people to address the natural hazards. Our current students explored The Gambia in West Africa to experience first-hand the workings of village communities and the challenges they face in education and health.

The optional sandwich year provides you with additional opportunities to broaden your international perspective by either studying or working abroad for a year (subject to application and availability – additional costs and visas may apply).

In the past, some students have chosen to study related subjects in Madrid, while others have undertaken placements volunteering in schools in South Africa, Jordan, Hawaii and Mexico. Others have undertaken placements with GNS in New Zealand and with the United States Geological Survey in California.

Specialist facilities
Facilities include a soils laboratory, geotechnics laboratory, CAD studios, high specification computer laboratory, map room and the simulation centre – our interactive people training and development facility.

Possible careers
Typically, our students seek roles with utility companies, research institutes, government agencies, charitable organisations, field test centres, local authorities and consultancies, or they move on to postgraduate study to obtain master’s or PhD qualifications.

Why Aerospace and Aviation at Coventry?
The UK has the second largest aerospace industry in the world, employing around 230,000 people in over 3,000 companies (gov.uk, 2018), including BAE Systems, Airbus, GKN and Rolls Royce. The aviation industry supports in excess of 65 million jobs worldwide (IATA, 2018), with global passenger numbers forecast to grow from 3.8 billion to 7.7 billion by 2036 (ATAG, 2018).

Our Aerospace and Aviation courses offer innovative learning experiences and field trips coupled with strong industry links and placement opportunities.

Our Aerospace Technology course aims to develop a thorough understanding of the fundamental principles of aerospace engineering and management. Primarily based upon mechanical systems for aerospace vehicles, you will also have the opportunity to gain a good knowledge of aerospace project management.

The Aerospace Systems Engineering course is centred upon systems for aerospace vehicles and the requirement to design total system solutions. The course takes a more theoretical approach to aerospace engineering, with a greater emphasis on design and analysis.

Global opportunities
You have the opportunity to undertake a placement year or study year abroad after your second year (subject to application and availability – additional costs and visas may apply). We have traditionally run a range of overseas field trips, including a visit to the Emirates Maintenance Centre in Dubai for Aerospace students. Aviation Management trips have previously included visits to airport operators and airlines in Hong Kong, the USA, Canada and the UAE (subject to availability – additional costs and visas may apply).

Specialist facilities
Our High-Performance Engineering Centre includes flight simulation systems, a modified, vertical take-off Harrier Jet, a 1/5th scale wind tunnel designed by the Mercedes AMG Petronas Formula One team and a suite of CNC machining cells. Aviation Management students will also have access to our extensive media library of aviation-specific video and audio material.

Possible careers
Our Aerospace courses aim to produce successful graduates with the skills to become detail-design engineers and engineering managers, both in aerospace and the wider engineering context, in fields such as aircraft and components design and manufacture, maintenance and testing, propulsion systems, flight simulation, aviation, avionics and patent engineering.

Our Aviation Management course aims to prepare you for a wide range of career options within the aviation industry either in the UK or overseas – from airline and airport management to air transport consultancy, roles with industry suppliers and manufacturers or in international logistics.

Further information
Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

My course covered many aspects of theoretical study, but most importantly provided me with exciting opportunities to apply everything I’ve learnt into practical projects.

Emilia Mungiu
Aerospace Systems Engineering BEng (Hons)
Automotive and Motorsport Engineering

Why Automotive and Motorsport Engineering at Coventry?
If you have a passion for cars, an enthusiasm for engineering and design, together with excellent maths and IT skills, these professionally accredited courses will help put your interests and practical skills to good use.

Focusing on how engineering is used in automotive applications, our Automotive Engineering course is ideal for those seeking leadership positions in the development of new technologies and the design of future vehicles.

Our Motorsport Engineering course aims to support you in transforming into a motorsport engineer skilled in carrying out a comprehensive range of mechanically related tasks, in areas such as stress, temperature, kinematics and dynamics.

Both courses respond to the demand for engineers with strong analytical and problem-solving skills to ensure the industry remains at the cutting edge of innovation. Both courses enable you to qualify first at undergraduate level, and then you can choose to follow the MEng pathway, a master’s degree level, ideal for those seeking leadership positions in the development of new technologies and design of future vehicles.

You will work with staff on real-world problems from industry, commerce and research groups, as you would in professional practice. This means that you will have the opportunity to develop professional skills at the same time as you learn the technical content of your degree.

Global opportunities
You will get opportunity to undertake a placement year or study year abroad after your second year (subject to application and availability – additional costs and visas may apply).

Previously, students have studied at HAN University of Applied Sciences in the Netherlands, Esslingen University in Germany, Damen Shipyards in the Netherlands, CERN in Switzerland and Bertrandt in Germany.

Specialist facilities
Facilities include industry-standard software and access to our High-Performance Engineering Centre, which includes a 1/5th scale wind tunnel designed by the Mercedes AMG Petronas Formula One team, full motion Cruden F1 simulator, chassis design and test facility, engine test cells, full-size vehicle shaker rig, metrology laboratory, composites material laboratory and a suite of CNC machining cells.

Possible careers
Career opportunities in relation to Motorsport Engineering include becoming a race mechanic or race engineer, roles as a manufacturing assistant engineer, composites laminator, design engineer, dimensional management engineer, or operations manager in motorsport engineering or related industries.

Our Automotive Engineering course can lead to a range of technical, professional and managerial roles within the automotive industry. We also aim to provide you with an understanding of the design criteria required to create a successful brand and product, setting you on the path to registering and practising as a Chartered Engineer, once you have completed both a BEng and MSc or a single MEng degree.

Why Civil Engineering at Coventry?
Responsible for planning, designing and building society’s essential infrastructure, civil engineers take a lead role in maintaining the quality of our personal and professional lives, managing a range of construction projects, from bridges and buildings to transport links and stadia.

Throughout your course, you will have the opportunity to develop technical knowledge, construction practice and undertake integrated project work. You will have the opportunity to learn the principles of civil engineering including engineering materials, analysis and design, highways and surveying, contract and project management, and ground engineering.

Global opportunities
Civil engineering is a global industry and these courses attract students from around the world, including Europe, China, Africa, India, Brunel, Malaysia and the Middle East, providing a multicultural learning experience.

If you opt for a sandwich year, you can spend time studying abroad; we currently have links with universities in Malaysia, Oman, Canada and the European Union (subject to application and availability – additional costs and visas may apply).

Specialist facilities
Facilities include a civil engineering workshop, composites facility, environmental chamber, hydraulics laboratory, materials laboratory, building services laboratory, metrology laboratory and the simulation centre – our interactive people training and development facility.

Possible careers
In recent years, the demand for civil and structural engineers has continued to rise, particularly in countries such as Australia, Singapore, New Zealand and China.

Possible careers could include civil engineer, environmental engineer, geotechnical engineer, site engineer or structural engineer. Graduates from these courses have gone on to work for engineering consultancies, contractors and local authorities, such as Arup, Mott MacDonald, Buro Happold, Atkins, Severn Trent and Warwickshire County Council.

Further information
Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

Accreditations and memberships which may apply.
For more details on renewals, see page 18.

My three years studying at Coventry has not only given me a passion for civil engineering, but also new knowledge, independence and friendships.

**Why Electrical and Electronic Engineering at Coventry?**

Electrical and electronic engineers perform a critical role in today’s modern world, from designing and developing systems for almost every type of industry, to advancing the technology in our homes and businesses – from heat, light and power to telecommunications and transport.

Our industry-informed courses give you the opportunity to develop hands-on experience with computer hardware as well as electrical and electronic systems. You could have the opportunity to discover the technology behind communication networks, embedded computer systems and electric vehicles.

The emphasis in these courses is on practical design and development, with access to the innovations that are changing the world of engineering. During your studies, you will have the opportunity to benefit from our links with industry, including companies such as IBM, National Grid, Mercedes Benz and Severn Trent Water amongst others.

**Specialist facilities**

Our specialist facilities include industry-standard software and access to our High-Performance Engineering Centre, electronics and electrical power laboratory, microelectronics laboratory, power laboratory and a dedicated project laboratory.

**Global opportunities**

We have organised a number of international field trips for our past students (subject to availability – additional costs and visas may apply). These have included attendance at the annual European Embedded Digital Signal Processing (eDSP) group, working with local staff and students in Lithuania, France and Germany; visiting the University of Shanghai for Science and Technology (USST) and visiting Jiang Su SAS-Tech Auto Industrial Company in Taicang City.

**Possible careers**

The practical nature of our courses places an emphasis on your future employability, developing a wide range of technical, analytical, design and professional skills, many of which may be gained from placement experiences.

The technical content is reviewed and updated to reflect what is currently important and in demand in industry.

Possible careers could include power system engineer, control engineer, protection engineer, electrical and electronic engineer or circuit design engineer.

**Further information**

Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

Accreditations and memberships which may apply. For more details on renewals, see page 18.

This course content is correct at the time of going to print. We regularly review our course content, to make it relevant and current for the benefit of our students. For these reasons, course modules and entry requirements may be updated. 2021 course web pages to go live summer 2020.
Mechanical and Manufacturing Engineering

A national skills shortage and Government push to promote the STEM agenda means that mechanical and manufacturing engineers are currently among the most sought-after and highly paid professionals in UK business.

These courses are designed to develop the next generation of highly skilled, specialist engineers. Industry-related projects will help to give you a feel of what the demands and expectations will be in the workplace, as well as enabling you to practise and apply your skills to real engineering projects. You will also have the opportunity to develop practical, hands-on experience in preparing, running and analysing results from experimental testing and numerical analysis.

Our suite of Mechanical Engineering courses are ranked 3rd in the UK (Guardian University Guide 2020).

Global opportunities

You will have the opportunity to participate in field trips abroad (subject to availability – additional fees and visas may apply), which have recently included trips to Poland, Bulgaria, China, Belgium and the USA.

Mechanical Engineering students are also encouraged to undertake a placement year or study abroad year after their second year of study (subject to application and availability – fees and visas may apply). Previously, students have studied at HAN University of Applied Sciences in the Netherlands, Esslingen University in Germany, Damen Shipyards in the Netherlands, CERN in Switzerland and Bertrandt in Germany.

Specialist facilities

Facilities include industry-standard software and access to our High-Performance Engineering Centre, which includes a 1/5th scale wind tunnel designed by the Mercedes AMG Petronas Formula One team, a suite of CNC machining cells, automotive workshop, chassis design and test facility, engine test cells, full-size vehicle shaker rig and metrology laboratory.

Our Manufacturing Engineering students have full use of the Institute for Advanced Manufacturing and Engineering (AME), based at Unipart’s Coventry site. This “Facility on the Factory Floor” allows you to experience technology on the manufacturing front line, including robotic automation, forming, joining, analysis and simulation, metrology and product verification technology.

Possible careers

Our courses provide successful graduates with a route into many careers within the global engineering industry, including aerospace, automotive, rail, marine, chemical construction and defence.

Our partnership with the Unipart Manufacturing Group aims to ensure the Manufacturing Engineering course is highly vocational in nature, designed to produce industry-ready graduates should be well prepared for their first role.

Further information

Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

Choosing to study at Coventry is one of the best decisions I have ever made. My lecturers have a ready-to-help mentality which made me feel comfortable.

Subjects in this section:
English and Languages
History and Politics
English and Languages

Why English and Languages at Coventry?
Our English and Language courses give students an opportunity to develop a thorough grounding in language and linguistics, developing critical thinking, analytical, written and spoken communication skills, which are vital in almost any career.

Students are taught using traditional, digital and other innovative teaching methods and platforms. The course teams aim to facilitate learning through observational and collaborative ways that empower students to take risks and explore their creativity.

With extensive professional links, you may have the opportunity to attend lectures and workshops with poets, playwrights, authors, renowned applied linguists and journalists (subject to availability). In the past, these have included Professor David Crystal, the former Political Editor of the Irish Sunday Mirror and Editor-in-Chief of Classic Cars and Michael Binyon OBE, former Moscow Correspondent of The Times.

Possible careers
Recent successful graduates of these courses have gone on to work within education, marketing and public relations, journalism, and research coordination for companies including Stonegate, Granta Magazine, Deutsche Bank, and Oxford University Hospitals Foundation Trust. Graduates of these courses have also gone on to work for language service providers abroad and in the UK.

One of the best feelings I’ve had while on my course is feeling challenged and when you feel challenged, you grow. The tutors have been very supportive, allowing us to think for ourselves.

Niall Every
English Language and Teaching English as a Foreign Language (TEFL) BA (Hons)
History and Politics

Why History and Politics at Coventry?
At Coventry you’ll have the opportunity to engage with history and politics in creative, inventive and exciting ways. All our teaching staff are research active and we bring our disciplines to life by focusing on contemporary issues, using innovative methods, and celebrating the development of a critical imagination.

We maintain strong relationships with organisations throughout the UK, including the local city councils, the Houses of Parliament and Coventry Refugee Centre, organising a range of guest talks and workshops. This has previously included British MPs, high commissioners from African states, representatives from local charities and Non-Governmental Organisations (NGOs), and speakers from major global corporations.

We pursue innovative approaches to research and content creation. For example, our History students have the opportunity to learn documentary film-making and digital content creation as a part of their course.

Student support is one of our top priorities and you’ll be joining a lively, welcoming and friendly community. Our highly accomplished and multidisciplinary teaching team includes respected authors and experts in research in the UK, France, Germany, Italy, the Middle East, Africa and North America.

Global opportunities
Our courses have a strong international focus and we have links to a number of institutions and partner universities around the world. Recently, we’ve visited anti-Mafia organisations such as Addiopizzo and Libera in Sicily, explored post-war Germany in Berlin and examined war, peace and identity in Amsterdam, The Hague and Brussels, as well as trips to Vienna, Budapest, Bratislava and New York (additional fees and visas may apply).

Possible careers
Past graduates are now employed in the private sector in industries ranging from banking and finance to media, and across the public sector in education, the civil service, local authorities, politics, charities and NGOs.

### Why Biosciences at Coventry?

We will fuel your scientific curiosity and encourage you to investigate key questions in contemporary science.

Coventry ranks 8th overall for Forensic Science (Complete University Guide 2020) and 10th for career prospects in Biosciences (Guardian University Guide 2020).

On the Analytical Chemistry and Forensic Science course, you will have the opportunity to learn techniques used in the investigation of criminal offences, in areas including fibre analysis and toxicology, alongside molecular sciences.

Our Biological and Forensic Sciences course blends the study of human biology with the rigorous scientific techniques used in forensic laboratories, including analysis of blood, fibres, fingerprints, drugs, documents, DNA and fire/explosives residue to solve crime.

Our new Pharmacology course aims to provide a thorough understanding of medicinal compounds and their effects on living systems. The course combines aspects of cell biology, human physiology, biochemistry, genetics and molecular biology, underpinned by chemical principles.

### Specialist facilities

The multi-million pound Alison Gingell building is home to microbiology, cell culture, molecular biology/genetics, biochemistry and forensic science laboratories, allowing you to work in a professional environment from day one.

### Possible careers

Biosciences graduates work in roles across a wide range of industries including medical research, drug development and environmental analysis.

This course content is correct at the time of going to print. We regularly review our course content, to make it relevant and current for the benefit of our students. For these reasons, course modules and entry requirements may be updated. 2021 course web pages to go live summer 2020.
Food, Nutrition and Dietetics

Why Food, Nutrition and Dietetics at Coventry?  
It’s impossible to ignore the headlines about the impact on society of food, nutrition and diet-related health challenges, as well as issues of food quality and safety.

Coventry University is ranked joint 2nd for graduate prospects and 7th overall for Food Science (Complete University Guide 2020).

Dietitians are qualified health professionals who assess, diagnose and treat diet and nutrition problems. Translating the latest nutrition science into understandable and practical information about food, they provide education and support to enable people to manage their health and to treat nutrition-related disease. Accredited by the British Dietetic Association, our Dietetics and Human Nutrition course has a particular emphasis on public health and evidence-based practice. Graduates will be eligible to apply for registration as a dietitian with the Health and Care Professions Council (HCPC).

Our Food Science course is designed to help to prepare the next generation of food scientists and food-related professionals for the food science and technology, and consumer science industries. Focused on food science, product design, food analysis, quality assurance, and food safety, you will have the opportunity to develop an understanding of the complex commercial nature of the food industry, as well as the interactions between food composition, nutrient metabolism and health.

Our versatile Food Safety, Inspection and Control course encompasses a variety of food issues with both a UK and international focus. Designed to meet the needs of the food industry and regulatory agencies, it covers skills including how to assess food safety risks, advise on food hygiene and safety, inspect food and food premises, and understand and apply legislation relating to food.

Drawing on the expertise of professionals from nutrition, public health and dietetics, as well as academics from biological and analytical sciences, our Nutrition and Health course is centred on human nutrition, health, psychology and behaviour of eating, and public health. It aims to enhance your understanding of the scientific basis of nutrition with an emphasis on human health and disease.

Possible careers  
Depending on the course you study, there are a number of career options for graduates in the area of food, nutrition and dietetics. Many graduates work in the food or pharmaceutical industries, in areas such as new product development or food safety. You can also work in public health and the leisure and sport industries.

Further information  
Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

Accreditations and memberships which may apply. For more details on renewals, see page 18.

Alfadhul Ahmed Almubarak  
Nutrition and Health BSc (Hons)
Sport, Exercise and Therapy Sciences

Why Sport, Exercise and Therapy Sciences at Coventry?

Sport and exercise science is now not only an area that we consider for top class athletes, we also explore how exercise science informs and underpins everyday life, helping people to live healthier and more fulfilled lives.

Endorsed by the British Association of Sport and Exercise Sciences (BASES), our Sport and Exercise Science course is designed to provide you with a strong scientific understanding of human anatomy, physiology, psychology and biomechanics. It will give you the opportunity to learn how the healthy human body works during exercise, as well as how sport and physical activity promote health.

With a thorough grasp of the theory and science that underpins the development of participants in sport, successful completion of our Sports Coaching degree will allow you to become an effective coach. You could also gain a national governing body qualification with the degree.

Sports therapists use sport and exercise principles to prevent, treat and rehabilitate injuries within recreational, training and competitive environments. Accredited by the Society of Sports Therapists, our Sports and Exercise Therapy course aims to provide the essential foundations of knowledge and to develop your clinical practice skills. From the second year onwards, you’ll have the opportunity to engage with clients in our on-site sports therapy clinic, and as immediate responders offering pitch-side support to our student teams and organisations.

Specialist facilities

The multi-million pound Alison Gingell building features specialist laboratories for sport science, biomechanics, strength and conditioning, a running track with force plates, 3D motion capture system for biomechanical analysis, sports therapy clinic and treatment practice rooms. There are also dedicated research areas for physiology and an environmental chamber. Specialist equipment includes the Alter G treadmill, Isokinetic Dynamometry, bod-pod and Vicon 3D motion analysis.

Possible careers

Sports and exercise scientists, therapists and coaches work with athletes at all levels of sport or can work within the leisure industry or for the national governing bodies of sports. Opportunities also exist in cardiac and other rehabilitation teams in the NHS or in sports development and health programmes.

Media and Performing Arts

Subjects in this section:
Media
Music and Theatre
This course content is correct at the time of going to print. We regularly review our course content, to make it relevant and current for the benefit of our students. For these reasons, course modules and entry requirements may be updated. 2021 course web pages to go live summer 2020.

Why Media at Coventry?
Media at Coventry encourages you to think and work critically, creatively, imaginatively and professionally. We’re ranked 9th in the UK for Film Production and Photography, as well as 2nd in the UK for Journalism, Publishing and Public Relations (Guardian University Guide 2021), so our graduates are highly regarded.

Dependent on the course, our Media students are issued with a laptop or tablet (pre-loaded with the latest suite of industry-standard software). For more details and conditions, visit [www.coventry.ac.uk/media-tech-pack](http://www.coventry.ac.uk/media-tech-pack).

Staff and students have a strong track record of collaborative applied research and classroom-based projects with organisations including Google, Jaguar Land Rover and BT.

Global opportunities
Our courses have a strong international focus and we have links to institutions and partner universities around the world. Past international study trips have been to New York, Paris, Barcelona, Dublin and Madrid to visit key industry events.

Specialist facilities
Media courses are based in the Ellen Terry building, a converted 1930s art deco cinema. Our facilities include music studios, video recording, music editing suites and radio studios. Media courses have access to The Tank Studio, a live HD audio and video production studio that houses high-end broadcasting technology. You’ll also have the opportunity to access high-standard professional media equipment through our Media Loan Shop.

Possible careers
Our graduates have become executive producers in Hollywood, BBC documentary makers, DJs for national radio stations and journalists at Sky News. Other areas of graduate employment include digital marketing IoT development, UI/UX design and testing, web and mobile app development and, increasingly, in augmented and virtual reality development.

Further information
Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

Accreditations and memberships which may apply.

Why Music and Theatre at Coventry?
Here at Coventry, we encourage collaborative working across all the arts. Our ethos is to provide an environment to develop creative, dynamic and able artists, musicians and practitioners who are versatile, resourceful and ready for a career in the creative industries.

You’ll be taught by our experienced faculty staff, who are practitioners, as well as invited professional guests who have previously included Frantic Assembly and Tony Iommi of Black Sabbath.

Global opportunities
Our music and theatre courses have a global outlook. Our Theatre students have the opportunity to work on the groundbreaking Immersive Telepresence in Theatre project developed in conjunction with Tampere University in Finland. The project received Gold in the Arts and Humanities category at the Reimagine Education Awards, 2016, widely regarded as ‘the Oscars of Education’. In 2018, the project also was awarded a double Gold for best Arts and Humanities and best Hybrid Learning project at Reimagine Education and was highly commended at the Times Higher Education awards.

The project has collaborated with Theatre Academy at the University of the Arts, Helsinki, the University of Gothenburg, Sweden, Adam Mickiewicz University, Poznań and Purdue University, USA.

Specialist facilities
Courses are based in the art deco Ellen Terry building, which is an ex-cinema updated to house professional purpose-built spaces.

These include: five recording studios, two flexible performance spaces with lighting and sound control rooms, rehearsal rooms, two theatre workshop / set construction spaces and wardrobe facilities.

Our Music Technology students also receive a laptop that’s pre-loaded with the latest suite of industry-standard software. For more details and conditions, visit www.coventry.ac.uk/media-tech-pack.

Possible careers
Recent graduates from these courses have worked with the Belgrade Theatre, the Birmingham Rep, the Old Vic Theatre in Stoke-on-Trent, the BBC and the Roundhouse in London. Our graduates have pursued careers as performers, producers, actors, recording engineers, composers and sound designers for film, television and games.

Employability support
We have close industry links with many established national and international theatre, dance and music organisations, including Frantic Assembly, Mandala Theatre, Taking Birds, Theatre Absolute, Big Brum, Desperate Men, Acrojou and The Fabularium.

### Why Healthcare Professions at Coventry?

Paramedics and Operating Department Practitioners (ODPs) are at the forefront of patient care, working in dynamic environments and making a significant contribution to patient outcomes. Placements in practice are a key feature of these courses and our superb simulation facilities and expert staff will give you the opportunity to be prepared to make a difference in the real world.

Paramedics are often the first emergency service on the scene. They can administer a range of life-saving treatments and provide vital information to people suffering from traumatic injuries and/or medical problems. Our Paramedic Science degree is designed to equip you with the necessary skills and knowledge to apply for registration with the Health and Care Professions Council as a qualified paramedic.

Working in a specialist and dynamic environment, ODPs provide care during the anaesthetic, surgical and post-anaesthetic or recovery phases of a patient’s journey. You will have the opportunity to work alongside professional staff within the NHS and the private sector. Successful completion of these courses will make you eligible to apply for registration with the Health and Care Professions Council as a qualified ODP.

### Specialist facilities

Our multi-million pound Alison Gingell building features a mock ambulance, operating theatre and scrub room, hospital wards, critical care settings, community housing and other real-life environments relevant to practice. This means you can practise and develop your clinical and interpersonal skills in a safe but realistic environment. We also have excellent relationships with local NHS trusts – including the West Midlands Ambulance Service.

### Possible careers

Paramedics do not just use their skills on ambulances, they also work on ships, in doctors’ surgeries or in community-based healthcare. ODPs work in operating theatres and other critical care areas in both the NHS and the private sector. Careers in public health can include working for the NHS or private companies, Non-Governmental Organisations or in pharmaceutical research.

### Further information

Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.
Why Nursing and Midwifery at Coventry?
A career in Nursing or Midwifery can be one of the most rewarding, challenging and varied professions there is. Our ‘learning through exploration’ approach to teaching means you can practise and develop your clinical and interpersonal skills in a safe but realistic environment.

We are ranked 4th in the UK for Nursing and Midwifery (Guardian University Guide 2020). We have a range of courses giving you the chance to focus on specialist fields of nursing practice. Placements give you an opportunity to put learning into practice in a real healthcare workplace.

Adult nurses work with a wide spectrum of service users across a vast range of services and settings – from A&E, critical care, medical and surgical wards to hospices, nursing homes, GP practices and in people’s own homes.

It takes a very special person to nurse a child or young person. Our Children and Young People’s Nursing course aims to develop your understanding of children’s very specific health needs and how a healthy child develops towards adulthood to minimise the impact of illness.

Learning Disabilities Nursing is a great career choice if you are compassionate and keen to support people through the physical, mental and social challenges facing people with learning disabilities.

The mental health charity Mind stated in 2017 that, in any given week, one in six people in England report they have experienced a common mental health problem. Delivering research-based interventions to facilitate better mental health, our Mental Health Nursing course is designed to help improve welfare of service users and their families.

Midwives play a pivotal role in supporting the health and wellbeing of women and their families during all stages of pregnancy, childbirth and the early postnatal period. You will have an opportunity to develop an understanding of the various approaches to childbirth and the professional skills required to lead in multidisciplinary settings, placing the mother, baby and family at the centre of care.

Specialist facilities
Our multi-million pound Alison Gingell building features a mock ambulance, operating theatre, hospital wards, midwifery suite, critical care settings, community housing and other healthcare environments relevant to practice. We also have excellent relationships with local NHS trusts.

Possible careers
These specialist courses enable you to work with the relevant service users in hospitals, doctors’ surgeries and community healthcare settings.

Further information
Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.
Occupational Therapy and Physiotherapy

Why Occupational Therapy and Physiotherapy at Coventry?

Occupational therapists help people with a variety of difficulties and disabilities to participate in activities that hold personal meaning and value to them, for example leisure interests or living with greater independence. Physiotherapists enhance the health and wellbeing of their clients by restoring functional movement following illness or injury. Both professions contribute significantly to enhancing the quality of life of their clients.

We rank 10th overall for both Physiotherapy and Occupational Therapy and 1st for career prospects in Physiotherapy (Complete University Guide 2020).

Our “learning through exploration” approach to teaching is delivered in our simulation facilities, so you could have the opportunity to practise and develop your clinical and interpersonal skills in a safe but realistic environment, before you go out to placement. As one of the largest providers of occupational therapy education in the UK, you will be taught by an expert team of research-active, clinical specialist, registered occupational therapists.

Our Occupational Therapy course, currently accredited by the Royal College of Occupational Therapists, combines academic study with a number of practical placements. These placements occur in a variety of settings (NHS, social care, charitable organisations and private practice) where you will be supported by a practice educator.

Upon graduation, you will be eligible to apply for registration with the Health and Care Professions Council (HCPC). This allows you to work in a variety of fields such as paediatrics, elderly care, mental health and more.

Becoming a physiotherapist gives you the chance to have a challenging, rewarding and satisfying career. Accredited by the Chartered Society of Physiotherapy (CSP), our Physiotherapy course, delivers the skills, knowledge and experience to allow safe, effective physiotherapy practice.

One feature of the course is that your skills development and essential learning takes place in your first year, before you go on placements in the second and third years of your degree. This enables you to be well prepared and ‘ready to go’ by the time you enter professional settings. On graduation, you can apply to register with the Health and Care Professions Council (HCPC).

Specialist facilities

Our multi-million pound Alison Gingell building provides excellent facilities for teaching. It features dedicated laboratories for anatomy, electrotherapy and manual skills, hospital wards, critical care settings, community housing and other real-life environments relevant to practice.

Possible careers

Occupational therapists and physiotherapists work with a wide client base, in a variety of clinical and community settings. This can be in the workplace or people’s own homes. Physiotherapists can work in sports clubs and health centres, or in medical environments supporting recovery.

Further information

Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

The time I have spent here has helped me grow holistically as a person. Along with the great academic resources, I think that there is a place where everyone can fit in at Coventry University.

Olaoluwakitan Adegbola
Occupational Therapy BSc (Hons)
Psychological, Social and Behavioural Sciences

Subjects in this section:
- Criminology and Forensic Investigations
- Psychology
- Social Sciences
- Social Work, Childhood and Youth Studies
This course content is correct at the time of going to print. We regularly review our course content, to make it relevant and current for the benefit of our students. For these reasons, course modules and entry requirements may be updated. 2021 course web pages to go live summer 2020.

### Why Criminology and Forensic Investigations at Coventry?

This group of courses aims to look at the causes of criminality and the various means by which society attempts to deal with it. Our “learning through exploration” approach to teaching is delivered using superb facilities that could help you develop your skills using mock crime scenes and virtual reality scenarios.

Ranked joint 4th for career prospects in Criminology in the Guardian University Guide 2020, our courses aim to give you the opportunity to gain experience through industry engagement, work experience and international field trips (additional fees and visas may apply).

Our Criminology course aims to provide you with a critical perspective to be able to answer important questions such as “what causes crime?” and “do prisons work?”, while casting an analytical eye over a criminal phenomena.

Combining two closely related disciplines, our Criminology and Law course aims to explore the often emotive issues surrounding crime, punishment and justice. You will have opportunity to consider the strengths and shortcomings of the legal system and the philosophical, political, economic, social and moral issues which shaped it and affect us today.

Our fascinating Criminology and Psychology course explores the role of crime and its control through the criminal justice process, drawing on aspects of applied psychology and the impact of crime and punishment. You will study issues surrounding crime, society and their associated psychological aspects, to help you understand how, and why, people think and behave in the context of crime.

Studying our Forensic Investigations course can help to develop your understanding of scientific methods of forensic analysis, as well as investigative techniques. It includes the interpretation and presentation of analytical evidence to explain or solve criminal or civil cases. We focus on providing practical experience, using real-life case studies and scenarios in our crime scene room and simulation community houses.

### Possible careers

These courses aim to help prepare you to work in a range of roles in the criminal justice system, including as a scene of crime officer, probation officer or in community safety and crime prevention. There are also opportunities to work in fraud investigation or cyber crime in the private sector.

### Further information

Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

### My course offered everything I wanted to explore. It has broadened my knowledge of all the opportunities available to me after graduating.

Sangeetha Kumar
Criminology and Law BA (Hons)
Psychology

Why Psychology at Coventry?
We have a passion for the many dimensions of psychology, exploring the behaviours, thoughts and actions of people, and applying these to the understanding of real-world problems.

Our psychology courses aim to provide a comprehensive grounding in the major psychological approaches to the study of human behaviour.

All of our psychology courses are accredited by the British Psychological Society (BPS).

Forensic Psychology focuses on engaging students with theories and application of psychological perspectives and techniques that help to explore human behaviour. It aims to help you to understand how psychology is applied to criminal behaviour, and how to select and report appropriate methods for this fascinating field.

Our Psychology course takes a scientific approach to understanding the human mind. You’ll have the opportunity to learn from our expert staff how to investigate people’s thoughts, feelings and behaviours using psychological research methods. Covering psychological theory, research and practical skills, it aims to help you understand how psychology is applied to real life, learning from a range of case studies, guest speakers and field trips (subject to availability, application, additional costs and meeting applicable VISA requirements).

Sport and exercise psychologists use scientific research methods to explore how people’s thoughts, feelings and behaviours affect their sports performance. On our Sport and Exercise Psychology course, you’ll study key factors, such as motivation, commitment, mental toughness, self-confidence, stress, anxiety, attitude to injury and concentration and learn how to support athletes at all levels to optimise their performance.

Specialist facilities
Our psychopharmacology laboratory is used to investigate and test ideas. You will have access to equipment for testing human responses or use EEG (electroencephalography) technology to measure brain waves, enabling you to conduct ethical experiments and collect primary data.

Employability
Work experience is a key part of our psychology courses, helping to ensure that you graduate not only with academic qualifications, but with relevant work experience and a host of transferable skills.

Possible careers
A BPS-accredited psychology degree is the starting point for a range of careers in various fields of psychology including forensic, child, education or sport psychology. You may also consider careers in counselling or wellbeing (further study may be required for some careers).

Further information
Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

Social Sciences

Why Social Sciences at Coventry?
At Coventry University, you will have the opportunity to engage with the social sciences in constructive, inventive and exciting ways.

All our teaching staff are research active and bring our disciplines to life by focusing on contemporary issues, using innovative methods, and celebrating the development of a critical imagination.

Our courses are hands-on, giving you the opportunity to investigate and document a situation, create and analyse your own data, and draw your own conclusions about the nature of society.

We maintain strong relationships with organisations throughout the UK, including the local city councils, Coventry Refugee Centre and Coventry Haven, organising a range of guest talks and workshops. This has previously included representatives from local charities and Non-Governmental Organisations (NGOs), and speakers from major global corporations.

Student support is one of our top priorities and you’ll be joining a lively, welcoming and friendly community. Our highly accomplished and multidisciplinary teaching team currently includes respected authors and experts who have carried out research in the UK, France, Germany, Italy, the Middle East, Africa and North America.

Global opportunities
Our courses have a strong international focus and we have links to a number of institutions and partner universities around the world. Recently, we’ve visited anti-Mafia organisations such as Addiopizzo and Libera in Sicily, explored post-war Germany in Berlin and examined war, peace and identity in Amsterdam, The Hague and Brussels, as well as trips to Vienna, Budapest, Bratislava, Gothenburg (additional fees and visas may apply).

Possible careers
Our social sciences degrees are designed to help prepare you for future careers shaping policy or informing social action in local or national government, education, research, charity leadership and management. We also have a dedicated team to support you with finding placements and helping students to progress to successful careers.

Recent successful graduates are now employed in the private sector in industries ranging from banking and finance to media, and across the public sector in education, the civil service, police forces, local authorities, politics, charities and Non-Governmental Organisations (NGOs).

Dwayne Morgan
Sociology BA (Hons)
Why Social Work, Childhood and Youth Studies at Coventry?

These courses are designed to help prepare you for a range of careers where you can make a real difference to people’s lives. Our values-driven approach aims to help you understand the factors which create barriers for some of the most vulnerable members of society, and enable you to contribute to enhancing the life chances of people in social need.

Our Childhood, Youth and Education Studies course can open the door to a range of rewarding careers working with children and young people, helping to create a better future for the next generation.

Our multi-disciplinary approach enables you to explore a diverse range of subjects, such as education, sociology, psychology, health and welfare, safeguarding, and policy and practice. This will help to give you a far deeper insight into the behaviours, attitudes and influences of children and young people in their communities and society at large.

Importantly, you’ll have the opportunity to put theory into practice, gaining relevant experience in a range of organisations. These could include charities and social enterprises together with more traditional settings, like local councils and schools.

International perspectives on childhood and youth will be threaded throughout the course, enabling you to develop a global understanding of how the health, wellbeing and social mobility of children and young people are promoted by practitioners. You will also have the opportunity to join international study visits or have an international placement (fees and visas may apply).

Coventry University has been educating social workers for more than 50 years and the course is grounded in practice, so that you experience first-hand the contemporary challenges and rapidly changing patterns of social work provision.

There aren’t many careers or degree courses that make you feel like you’re giving back to society in the way that social work can.

On our Social Work course, you’ll initially study a range of academic topics designed to help you better understand people’s needs and life journeys, then you’ll put theory into practice on placement in a range of social work and care settings, dealing with complex situations and learning alongside experienced social work practitioners.

This course is professionally accredited by Social Work England (SWE). Upon successful completion of this course, you will be eligible to apply to SWE to register as a social worker.

Possible careers

Childhood, Youth and Education Studies graduates can work in youth and community work, child and family support or progress to postgraduate teacher training courses. Social workers work in a variety of settings, supporting vulnerable people in schools, community settings, or third sector organisations supporting particular service users, such as homeless people.

Further information

Please visit our website for detailed course information including subject-specific entry requirements and current course fees. See page 148 for more information.

Accreditations and memberships which may apply. For more details on renewals, see page 18.
Top-up courses

We offer a number of courses that enable students to ‘top-up’ their existing qualifications to gain a full undergraduate degree.

If you have successfully completed a Higher National Diploma (HND) or Foundation Degree and want to study further, you could progress onto the final year of an honours degree course with a top-up degree. There is also the opportunity to enter some courses in the second year, if you have a Higher National Certificate (HNC).

A HND or a Foundation Degree is an excellent qualification in itself, but you may have career ambitions that could be fulfilled with an Honours degree. It typically takes one further year of study to top up your HND or Foundation Degree.

By topping up your current qualification to an honours degree, you can help to demonstrate to an employer that you have the academic, organisational and management skills needed for your chosen career path. It may also lead to even better opportunities in the future.

International students who want to improve their English and have already completed a degree can study English for Business BA (Hons), a top-up degree that has a dedicated English Language element.

The top-up courses offered by the Faculty of Health and Life Sciences are designed for qualified health professionals who want to achieve a degree level award.

Please contact the relevant faculty directly for information on these courses.

www.coventry.ac.uk/top-up-courses
Coventry University London offers you the opportunity to study a business-related degree in the capital of the UK. Set at the heart of one of the most successful business and financial centres in the world, we are just minutes from the Bank of England, the London Stock Exchange and many other world-leading organisations.

Opportunities in the heart of London
Make the city your classroom by studying at Coventry University London. Our bespoke courses in Business, Marketing, Management, Accounting and Finance, Fashion, and Hospitality and Tourism aim to give you first-class teaching, modern facilities and a London City student experience. We believe there is no better place to learn about business than in the centre of London’s financial district.

Industry links
You will have chance to develop business skills through a range of experiences, from work-based learning in global organisations to our networking events with industry leaders. We have relationships with many employers, such as The Ritz London, Genesis, Deloitte and Barclays.

Practical business application
We put employability at the heart of everything we do, to help equip you with the skills valued by employers. All of our courses are designed to be interactive and relevant to the business world. You will benefit from a mixture of lectures, seminars and group work, while many assessments are based upon coursework.

Careers and employability
Our dedicated Careers, Employability and Enterprise team are available to offer specialist careers advice, including support in learning the skills to market yourself to employers, guidance in identifying a career plan and preparing for interviews and graduate assessment centres. We recently hosted a mock assessment day at Tottenham Hotspur Football Club where students were able to experience typical one-to-one interviews, presentations and group exercises first-hand.

Entrepreneurship
Entrepreneurship is at the heart of all of our courses. Whether you are wanting to launch your own business, apply for graduate schemes or work elsewhere, then, just having commercial acumen and thinking in an entrepreneurial way will be important. Whether it be in the classroom or in our specialist Enterprise Hub, our teams are there to help you achieve your goals.

Learn from industry professionals
Not only will you be taught by a highly qualified academic team with considerable industry experience, but you will also have the chance to learn from industry experts through guest lectures and masterclasses.

Our students have enjoyed learning about the daily operations of world-renowned hotel The Ritz London, how to be a successful entrepreneur from Channel 4’s Secret Millionaire, Mike Greene, and the challenges of running a highly successful fashion brand, including putting on catwalk shows at London Fashion Week, from Victoria Lovelock, Production Manager at Topshop Unique.

Work experience opportunities on all courses
You will have an opportunity to develop your business skills through a range of work-related experiences or simulations. We help to prepare you for internships or other work-related projects, such as consulting projects, entrepreneurship projects and more. Please be aware that such opportunities may be subject to additional costs, application, availability and/or meeting any applicable visa requirements.

This course content is correct at the time of going to print. We regularly review our course content, to make it relevant and current for the benefit of our students. For these reasons, course modules and entry requirements may be updated. 2021 course web pages to go live summer 2020.
CU offers a flexible style of university education which is designed to fit around your life. We aim to provide career-focused courses, coupled with placement opportunities to help prepare you for the world of work. Students benefit from a variety of modern teaching facilities and a choice of three campuses. We offer a range of academic qualifications all of which are awarded by Coventry University.

A nationwide offering
The relationship between CU campuses gives you the opportunity to move between each campus after completing an academic year. This means you can study in the home city, in the capital city or on the coast.

The CU Coventry campus relocated in March 2019. This new £33m teaching space is designed to give students a bright, open learning environment.

CU London’s campus opened in 2017. Based in the Grade II listed and former Dagenham Civic Centre, CU London offers top quality facilities including a law court, labs, IT suites, breakout study spaces and an on-site restaurant.

CU Scarborough, located on the stunning Yorkshire coast, opened the doors to its seaside campus in September 2016. The student-centred design means everything you need is located under one roof.

Study modes that fit modern lifestyles
CU offers a number of flexible study options, ensuring you can study at a pace that suits you.

Full-time classes take place at a fixed time each day, in either the morning or afternoon, so you are able to plan your studies around your life. At CU, we understand a September start doesn’t suit everyone, which is why we also offer November, January, February, April and June intakes.

If you’re looking to get a degree via part-time study, we offer a variety of options including evening and Saturday classes, with opportunities to begin your course in October, January, April and June. Depending on how quickly you would like to finish your course, you can complete a degree in as little as three years.

For selected courses, you could complete your degree in two years via accelerated learning. You’ll follow the full-time study pattern but you will study six blocks per year instead of the standard four, thereby completing your degree in two years rather than three.

An alternative style of university education
CU’s offering is specifically tailored to make higher education accessible. We try to keep our class sizes small to give you even more contact hours with tutors and, in an attempt to ease the pressure of university life, we’ve moved away from end-of-year exams.

We offer a range of BA, BSc, BEng and LLB qualifications, (certain courses are only available at specific campuses). Our courses are also available as HNC Level 4 and HND Level 5 stages.

Foundation Years provide an entry route into degree-level study. They are suitable for those who have completed some Level 3 study, such as A-levels, and want to change subject area or for those who don’t meet the entry criteria to start a degree. If you successfully pass this stage, you are guaranteed a place on a relevant CU degree course.

At CU Coventry and CU Scarborough, we offer a range of Access to Higher Education courses. These are Level 3 qualifications which help students without traditional qualifications to prepare for higher education study. They offer an introduction to a subject area as well as providing the skills needed for study at university. If you successfully pass your Access diploma, you are guaranteed a place on a relevant course at CU.

1Accelerated learning only.

2Law & Practice LLB (Hons) available at CU London and CU Scarborough only. Law & Practice BA (Hons) available at CU Coventry only.

The tutors are the first thing I would mention. You can talk to them on the same level and learn from their experience.

Marta Olkiewicz
Tourism & Hospitality Management
BA (Hons)
Coventry University
Wrocław, Poland

At Coventry University Wrocław, we aim to offer a career-focused experience to our students, one that is traditionally academic but is also designed to help you progress in your chosen career.

We offer two study styles, making our degrees accessible to a wide range of people. You can currently study our initial degree offerings in either full-time or part-time modes.

Get a UK degree in Poland
Our brand-new campus will be located to the south of the city-centre in Wrocław, a ‘hotspot’ for academia and investment from large international companies.

Supporting the innovative education model that Coventry University is bringing to Wrocław, the campus will offer students the chance to study in classrooms and IT suites purpose-built for their needs – on the first two floors of a brand new building.

Career-focused courses
All of our initial degree offerings are vocational, meaning they are designed to maximise progress on your chosen career path.

A modern approach to teaching
With opportunity for career-focused placements, all of our degree courses are taught in English to students who are able to study at a pace that best suits them, without the pressure of year-end exams.

Study one module at a time
Studying at university can be demanding. To give our students the best chances of succeeding, you will only study one module at time. This means you can give your full attention to each topic.

Block learning
Our degrees can be started in September, November, January, February, April or June. This structure, along with the convenience of regular hours, means you get the opportunity to fit your studies around your lifestyle.

Our learning style and multiple intakes, combined with no end-of-year exams, are just some of the reasons why our offering is so tailored to meet the needs of modern students.

Course offering
Our initial course offering consists of a selection of career-focused undergraduate honours degrees.

Business Management and Leadership BA (Hons)
This varied degree aims to supply you with the skills and knowledge needed for successful entry into management. This is an applied course and recognises the multidisciplinary approach that is needed in business leadership. Throughout your degree, you will get chance to study the details of operating markets, information technology and leadership practice, demonstrating a capability to maintain auditable records of your work.

Cyber Security BSc (Hons)
This course aims to examine the principles and threats which underpin computer systems, networks and the software development process. By studying this course, you will get the opportunity to become competent and confident in a range of prevalent topics, such as operating systems, network security, programming language, penetration testing, ethical hacking and more.

Digital and Technology Solutions BSc (Hons)
By studying this course, you should gain a good understanding of the role of digital technologies in business and how it is used to gain competitive advantage and streamline functions. You will also be introduced to the management of key data and the development of information systems, supported by hardware and software components.

www.coventry.ac.uk/wroclaw
Entry and fees

Two of the biggest concerns that many students have when deciding to apply to university are meeting the entry requirements for the course, and the cost of studying and potentially living away from home.

The following information will help you to understand how we assess course applications, as well as the options that could be available you in terms of financial support.

Please be sure to always refer to the specific course pages on our website for the latest and most accurate information regarding detailed entry requirements and tuition fees, or contact us directly at ukadmissions@coventry.ac.uk.

Entry requirements

Each of our undergraduate courses has a set of entry requirements that you will need to meet to gain access to the course. Once we have received your application, we will assess the qualifications you have achieved and the ones for which you are studying, along with your personal statement and reference. If you are unsure about something before you submit your application, please contact our admissions team for advice.

Within this prospectus, you will find typical A-level and BTEC entry requirement grades for each course. However, please be aware that we accept a wide range of qualifications, including the IB Diploma, CTEC and Access qualifications. Some courses may also require you to have studied certain subjects at GCSE or A-level1.

Some of our courses (especially those that are creative or professional in nature) may also require you to attend an interview or submit a portfolio.

Applying from outside the UK?

Entry requirements and fees may differ depending on where in the world you are based. Please refer to the relevant course pages, Student Contract and the Tuition Fee Terms and Conditions for specific entry requirements and fees for your country. www.coventry.ac.uk/legal-documents

Fees and finance

Tuition fees – The current undergraduate course tuition fee for UK Home students is £9,250 per year. Prices may change due to inflation and governmental factors. At the time of printing this prospectus, tuition fees for courses starting in September 2021 have still to be confirmed, so it is always worth checking our website for the latest information regarding tuition fees.

Cost of living – As well as your course fees, you will also need to consider the cost of living. While your cost of living will depend on your lifestyle and spending habits, you could find your money goes further in Coventry than in many other parts of the UK. Numbeo.com, a worldwide database, listed the cost of living index in Coventry as 20% lower than in London in August 20182.

Financial support – As an undergraduate student, you may be entitled to two types of financial support – tuition fee loans and maintenance loans.

A tuition fee loan usually covers your course fees in full per year and is paid directly to the university. However, you can also apply for a maintenance loan to help you with your living costs whilst at university – and this is paid directly into your bank account3.

Student loans are not like standard loans that you would receive from a bank, in the sense that you only start paying them back once you are employed and earning over a certain amount of money per year.

For more information regarding financial support, including eligibility details, please visit www.gov.uk/student-finance.

Application guide

1. Find

There are a few ways you can get more information before applying – you can check out courses on our website or you can compare them on the UCAS and Unistats websites. Forums like The Student Room are also a good source of background information on student life.

2. Visit

If you have not already done so, then visit us at an Open Day. You will get the chance to speak to students and lecturers, and to see our fantastic facilities first-hand – it’s the best way to get a feel for living and studying in Coventry.

3. Apply

Once your heart is set on a course, you can apply through UCAS for full-time study. You can apply directly to us for part-time study* or if you’re applying from outside the UK/EU*, you can apply through UCAS. Be sure to submit your application before the 15 January 2021 deadline.

4. Prepare

If you are invited to an interview, audition or portfolio review, then this will be communicated to you by email and will contain a booking link. Take a look at our online course pages for advice on what is required for the course for which you have applied.

5. Wait

Keep an eye on any updates to your application on the UCAS Hub. You can sign in at any point after you have applied. You will be able to check if any of your university choices have offered you a place, as well as reply to your offers.

6. Reply

Once you have received all your decisions from the universities to which you have applied, the next step is to choose your ‘firm’ and ‘insurance’ universities. To help you decide, we invite all of our offer holders to an Applicant Visit Day. These are usually held between the January and March in the year of entry.

7. Results

Hopefully, you will have met the grades needed – check the UCAS Hub on results day to see whether you have been accepted onto the course. If you have not received the grades you were expecting, get in touch with us – we may have spaces available through Clearing.

8. Welcome

Congratulations – and welcome to Coventry University. There will be lots to do when you arrive, including enrolling and attending your induction. During Welcome Festival, you’ll have the opportunity to make new friends and find out more about our Students’ Union societies.

*EU students should be aware that there may be a change to UK laws following the UK’s exit from the European Union. This may change their student status, their eligibility to study part-time and/or their eligibility for student finance. Coventry University will act in accordance with the UK’s laws in force in relation to student tuition fees and finance at that time.

1 or equivalent qualification.
3 Proof of household income may be required to determine your eligibility.

www.coventry.ac.uk/nextsteps
A message from our Vice-Chancellor

As both the Vice-Chancellor and a double graduate of Coventry University, you will struggle to find someone for whom this university means more than it does to me. That’s why it gives me great pleasure to hopefully be able to play a small part in your decision to study with us.

I hope we have shown you in this prospectus what sets Coventry apart. Our forward-thinking approach, modern facilities and focus on practical learning have resulted in Coventry being ranked the 15th top university in the UK as well as the University of the Year for Student Experience 2019.

We are proud to be consistently rated highly in the National Student Survey, as well as being rated Gold for outstanding teaching and learning. The best thing about this, especially from your point of view, is that it shows we have a great track record in delivering a quality education that meets our students’ expectations.

It’s an exciting time for the city too – since our historic inception back in 1843 as the Coventry School of Art and Design, we have played an integral role in the narrative of the city, and are proud to have contributed towards Coventry being named UK City of Culture 2021. This is a fantastic achievement for our city and we cannot wait to see what winning this award brings for us in the near future.

Come to one of our Open Days and discover for yourself why thousands of students choose this award-winning university every year.

We’ll put your future first.

Professor John Latham CBE
Vice-Chancellor and CEO, Coventry University
Extraordinary Professor, Stellenbosch University

Open days

If you want to find out more about the university and the subject(s) in which you are interested, then come to an Open Day. It is a great opportunity to meet our academic staff and current students and to ask them any questions you may have.

It is also the best way to get a real feel for what it would be like to study here. You will have the opportunity to find out more about our courses, our approach to teaching and learning, and our facilities. You can also find out about the support we offer to all our students, including careers advice and international placement opportunities.

You will be able to go on a walking tour with a current student and see first-hand our student accommodation, on and around campus.

We occasionally run smaller ‘drop-in’ style events on specific weekday afternoons. These are more informal opportunities for you to speak to our staff and to get a taste of what we can offer.

Alternatively, you can contact us throughout the year to see if we can arrange a weekday student-led tour for you. These offer an extended walking tour of the campus and its immediate surroundings, with the option to finish with lunch in The Hub in the centre of campus.

For a virtual tour, visit virtualtours.coventry.ac.uk

To find out more about Open Days, or to book your place, please visit our website.
